Pennsylvania Railroad.

In connection with some remarks on the reported increase of business and profits of the Pennsylvania Railroad Company, as compared with the corresponding time last year, the Newark Daily Advertiser says:

Superintendent Barker and other officers of this company recently went over the New York division of the line, testing the track throughout by means of an automatic machine, which detects and registers on a tape connected with the car axles every imperfection or disturbance of alignment. The track being divided into sections and fractions of a section, the register gives a literal diagram of the whole, at the same time indicating the locality of any defect which may exist. The track was found in excellent condition. Hereafter a similar examination and test will be made regularly every fortnight. The process of introducing stone ballast is going forward as fast as material can be procured.

Statement of the Public Debt of the United States, June 1, 1878.

DEBT BEARING COIN INTEREST.

Totals	$64,628,512 00	$1,615,587 80

Interest paid by United States, $37,896,334 50; interest repaid by transportation of mails, &c., $9,452,577 03; balance of interest paid by United States, $28,443,757 47.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, May 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

American Anthracite Coal in Italy.

A despatch from the United States Consul at Genoa, Italy, indicates that important results are likely to follow the recent introduction of American anthracite coal into the non-coal producing portions of Southern Europe by the Philadelphia and Reading Railroad Company. Two cargoes have been received during the past quarter, and the experiment, which at first threatened failure, has proved a gratifying success. When first put on the market the highest bid was but 22 francs ($4 25) per ton, an amount insufficient to cover freightage from New York. On its becoming known that the coal was well adapted for smelting purposes the price at once advanced to 40 francs ($7 72) per ton, which covers cost and freights and leaves a fair margin for profits. Heretofore English coke, selling at 60 francs ($11 58) a ton, has been almost exclusively used by Italian iron founders; but as American anthracite, on trial, yields equally good results, if not better, there is no reason why it should not command the market. Over two hundred thousand tons of English coke are annually consumed in the Mediterranean basin. For this trade American anthracite bids fair to become a successful competitor.

American Railroad Journal.

Saturday, June 29, 1878.

Financial and Commercial Affairs.

A comparatively moderate demand has been reported, since our last, from all responsible sources, for Money, on call, or in the discount line; and, with a steady accumulation of capital at this centre, rates for accommodation have been ruling very easy for borrowers, leaving, at even the low current figures, important balances unemployed from day to day, which served to stimulate purchases of the public funds, and of other interest bearing securities, on investment account. Call loans have been quoted here at from 1½@4, with 2½@3 per cent as the basis of the principal negotiations, and very choice to strictly prime mercantile credits were rated at 2½@5, the best grades of short date passing readily at 2½@3½ per cent per annum. The City bank exhibit of last week indicated an increase in the loan and discount average of $74,600, and a decrease in the item of circulation of $75,000. The average of deposits was cut down $401,100. The legal tender reserve was augmented $2,964,000; and the specie average reduced $2,035,500. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $16,190,575, against $15,161,800 the preceding week, and $17,608,550 the week ending April 20th (the latter the highest aggregate yet reached this year.) The City bank exchanges in currency reached $861,644,610, or a daily average of $60,274,102.

The outstanding amount of legal tender notes is $346,748,818. The National bank circulation is now $321,160,760 of currency notes and $1,482,-

120 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $5,824,000.

Government Securities have been more active, heavy purchases of the favorite issues having been made on home investment account, at generally stronger prices, closing on Wednesday quite firmly. At the close on Wednesday the current quotations were as follows:

United States 6s, 1881, registered, 107¼@107⅛; do. coupon, 110¼@110⅛; 5-20s, 1865, new, registered, 102@102¼; do. coupon, 105@105¼; do. 1867, registered, 105⅜@105½; do. coupon, 105⅜@105½; do. 1868, registered, 107¼@108; do. coupon, 110¾@111¼; ten-forties, registered, 108½@108¾; do. coupon, 108½@108¾; five per cents, 1881, registered, 106⅜@106¾; do. coupon, 106⅜@106¾; 4½ per cents, 1891, registered, 103⅞@104⅛; do. coupon, 103⅞@104⅛; 4 per cents, 1907, reg., 100⅛@100⅜; do. coupon, 101@101¼; sixes, currency, 120⅜@120¾.

The Secretary of the Treasury on Thursday of last week issued another call for $5,000,000 of the new 6 per cent 5-20 bonds of 1865.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $349,727,450, and $13,858,000 as security for public deposits.

The income of the Government from internal revenues last week was about 2½ millions, and from Customs last week about 2¼ millions.

State bonds have been in fair request but irregular as to values closing more firmly. Railway Mortgages have been moderately active, chiefly for investment account, but prices have fluctuated widely especially on other than the favorites of the actual interest bearing obligations. And in the line of Railway and Miscellaneous share property business has been to a fair aggregate, but characterized by more or less irregularity and depression, under various adverse influences, rallying, however, quite sharply at intervals, and leaving off with a fair show of firmness in the instance of the more prominent of the speculative favorites.

Gold has been weak, and comparatively tame. Speculative operations have been devoid of spirit. The customs call has been light; and the export drain utterly insignificant. The extremes during the week have been 100⅛@100⅞, closing on Wednesday at 100⅛@100⅜ as against 100¾ on Wednesday of the preceding week. The specie outflow last week was only $10,025—making the total exports of specie hence since January 1, $8,520,958 against $18,455,329 the same time in the preceding year. The imports of specie at this port last week were to the amount of $170,494 (mainly from Port au Prince and Aspinwall) and since January 1st have been $12,961,726 as against $7,262,589 same time in the preceding year. The Customs demand for gold in the local market last week reached $1,867,336 or an average of $227,889 per day.

Foreign Exchange has been more sought after and quoted firmer. Bankers' sixty day bills on London closed on Wednesday at $4 85@$4 86; sight bills on London at $4 87@$4 88 to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,892,128 as against $6,184,258 the corresponding week of 1877. The week's import entries of Foreign Merchandise at New York included $677,736 of Dry Goods, and $5,214,392 of General Merchandise. The week's exports of Domestic Produce and Miscellaneous Goods from this port were to the aggregate value of $5,851,520 against $5,711,029 same week in 1877; and since Jan. 1 have been $164,289,546 against $129,506,296 same time last year.

Metals have been moderately sought after with values quoted irregular. Iron has been in limited request. Eglinton Pig Iron quoted at $21 50@$22; Glegarnock $23; Coltness $24; No. 1 American Pig at $16 50@$17 50; No. 2 do. at $15 50@$16 50. Forge $15@$15 50. New Iron Rails at works $33@$37. Old Rails $18@$18 50. Wrought Scrap $20@$21. Steel Rails, on the basis of $42@$45. Ingot Copper 16⅜@16½. Domestic Pig Lead 3⅞cts.

Business in the leading kinds of Domestic Produce has been quite active. Export dealings have been to a liberal aggregate. Breadstuffs closed generally lower, Provisions higher. Cotton has shown little animation, the trade for spot cotton being confined to small lots for spinner's immediate use. The market showed a decline on Friday last which was partially recovered on Saturday. The prices at the close of the week were 11.51c. for June, 11 53c. for July, 11.55c. for August, 11.23c. for September, 11.05c. for October, 10.91c. for November, 10.90c. for December, and 10.95c. for January. On Monday the sales of spot cotton were only 91 bales, and 166 bales Tuesday. Stock in New York, 120,544 bales. Stock at the ports consolidated, 190,209 bales. Naval Stores and Petroleum have been moderately inquired for at, however, easier figures. Foreign merchandise has been in less demand with values, in several instances, showing less firmness.

At the auction sale of Scranton Coal on Wednesday 50,000 tons sold within the range of $3 25@$3 90, as against $3 25@$3 60 at the preceding sale, showing a further advance.

An active movement has been noted in Ocean freights which have been quoted generally stronger though closing somewhat irregularly. Accommodation for Grain, Provisions, Petroleum and Naval Stores in most request. For Liverpool steamer rates at the close for Grain quoted at 8d. per 60lb. Flour, at 2s. 6d. Provisions, 32s. 6d.@45s.; Leather, 45s @50s. Measurement Goods at 20s.@23s. 9d. per ton; Cotton, ½d. per lb. Liverpool, by sail. Cotton, 3-16@7-32d. Grain at 7d.; Flour, 2s. 3d.; Measurement Goods, 15s.@20s. Tobacco 27s. 6d.@30s.; Oil Cake at 21s. 3d.@22s. 6d. Grain rates on charter hence for Cork and orders left off at 6s. 3d.@6s. 4½d.; for the Continent Grain at 5s. 9d.@6s.6d. and from Baltimore for Cork and orders, 6s.@6s. 3d. and from Philadelphia at 5s. 9d.@6s.; from Boston at 5s. 7½d.@5s. 10½d. and from Montreal at 6s.@6s. 3d. and from San Francisco to the United Kingdom (new crop) at 50s.@60s. Refined Petroleum hence for the United Kingdom direct 4s. 3d@4s. 7½d.; Cork and orders, 4s. 6d.@4s. 9d.; for the Continent, 8s. 9d.@4s. 4½d., for the Baltic at 5s. @5s. 3d. and Java at 32@35cts. and Japan 37½@42½cts. and for French ports (crude) at 4s. 3d.@4s. 6d. Gibraltar and orders at 4s. 9d.@@5s. 9d.; do. in cases, from N. Y. to Italian ports, at 26@29cts. and Adriatic 29@32cts. and Constantinople 29cts. and Odessa 33½@34cts. Cotton by sail from New Orleans to Liverpool ½@5-16d.; Ky. Tobacco from New York to Spain at 32s. 6d.@37. 6d. and to France at 32s. 6d. @35s. Naval Stores from Wilmington, Charleston, or Savannah for Cork and orders at 4s. 3d.@4s. 9d. and 6s. 3d.@6s. 9d. Lumber from New York to Montevideo at $14 and 5 per cent primage. Savannah to Cadiz $15. Savannah, Brunswick, or Union Island to the River Platte $19@$19 50; Quebec to Milbourne £7. Deals from St. John (N. B.) to Liverpool at 65s.@67s. 6d. Through Provision freight room by steam from the West for Liverpool quoted at the close at 48@53½cts. per 100lbs. as to routes.

Inland freights are low but very active. By lake from Chicago to Buffalo, corn is taken by propeller at 1⅛ cents per bush; and by canal from Buffalo to New York, at 3⅜ cents per bush. Add to these rates elevator charges in Buffalo and the rate per hundred pounds from Chicago to New York is 13¼ cents.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Winona and St. Peter 1st mort., 101; Rome, Watertown and Ogdensburg 7s, consol., 82; Central of New Jersey conv., ass., 69; do. 1st consol., ass., 72¼; Missouri, Kansas and Texas R. ☞ The bids for the completion of the Cincinnati Southern road, under the last bill, are to be opened on July 12th, and those for the completion and lease of the road on the 18th.

OFFICE OF THE CENTRAL PACIFIC RAILROAD CO.,
No. 9 NASSAU ST., NEW YORK, June 28, 1878.

THE COUPONS OF THE FIRST MORTGAGE Bonds of the Central Pacific Railroad Company, the Western Pacific Railroad Company and the California and Oregon Railroad Company, due July 1, 1878, will be paid in gold at the office of FISK & HATCH, No. 5 Nassau street. Holders presenting ten or more coupons will leave them for examination, in which case a receipt will be given and payment made on the following day.

C. P. HUNTINGTON,
Vice-President.

OFFICE OF THE NEW YORK ELEVATED RAILROAD COMPANY, No. 7 BROADWAY,
NEW YORK, June 19, 1878.

THE INTEREST ON THE BONDS OF THIS company due July 1, 1878, will be paid on and after that date, on presentation of the coupons at the Corn Exchange Bank.

J. A. COWING, Treasurer.

THE HOUSTON & TEXAS CENTRAL RAILWAY
FIRST MORTGAGE GOLD COUPONS,
DUE JULY 1,
WILL BE PAID BY
JOHN J. CISCO & SON, 59 Wall street.

Uniforms for Railroad Officials.

It is now universally conceded that a distinctive dress for railway officials when on duty is desirable. Many roads have already uniformed their men, whilst others have only taken the matter under consideration. In a very few instances the passenger conductors have voluntarily adopted a uniform without waiting for "orders." But there are many advantages from the railway officer being readily and promptly recognized in uniform, against few disadvantages.

The passenger entering a station or a train knows instantly to whom he should apply for information. The railway officer, himself, if handsomely uniformed, feels an additional motive for the prompt and careful discharge of his duties. He feels that all eyes are naturally upon him.

We were prompted to discuss this matter by a recent visit to the establishment of the gentleman whose advertisement appears elsewhere in our columns as NICOLL THE TAILOR. From a small business as a merchant tailor his trade has become enormous. No similar establishment on the continent has equal facilities for the equipment of railroads in uniform. Suits of any style or material for the entire force of a railroad can be completed and shipped within a few days. We heartily commend Mr. Nicoll to the consideration of superintendents and all interested in railway uniforms.

☞ Mr. C. H. Hudson, Superintendent of the Chicago Division, has been promoted to the position of General Superintendent of the Ohio Division of the Baltimore and Ohio Railroad, vice W. C. Quincy resigned. Mr. Quincy still retains the position of President and Director of the Central Ohio and the Sandusky, Mansfield and Newark Railroads, all controlled by the Baltimore and Ohio.

☞ A certificate of incorporation has been filed in the office of the Secretary of State of Ohio of the Cincinnati Suburban Steam Railway Company, with termini at Cincinnati and Madisonville, all in Hamilton county, capital stock $300,000, in shares of $50 each, by E. F. Evans and others.

☞ Engineers are busy making a survey of the proposed route for the new railroad from Rochester to Farmington, New Hampshire.

Union Pacific Railroad.

The Vice President of the Union Pacific Railroad Company has issued a circular to the stock holders, dated Boston, June 21, 1878, in which he says:

The large sums due to this company from the United States government, for transportation services, amounting to about $3,000 000, for nearly half of which judgment has been recovered, and in the opinion of our counsel judgment for the residue will soon be obtained, are withheld by the government on the ground of its unsettled claim of five per cent of the net earnings of the company. The principles on which such claims rests, as well as the amount thereof, are in litigation, and cannot be determined until the final judgment of the Supreme Court of the United States has been obtained, which decision it is hoped can be speedily had. The recent legislation of Congress has also led to some perplexing questions as to the policy and the legal rights of the company. In this attitude of affairs, that the action of the company may be cautious and conservative, it is deemed wise by the Executive Committee that the usual quarterly dividend of July 1 be passed.

Creosote as a Preservative for Railroad Ties.

The growing scarcity of oak, heretofore the best material readily procurable for ties, has set scientific men at work to discover some process whereby more common and less valuable woods may be substituted for oak. In New England, Canada and the more northern parts of the country now opened by railroad lines, there is an abundance of "soft" woods, fir, hemlock, spruce, etc., but oak is not now plentiful, and maple, beech, birch and the whole list of "hard" woods are not durable when exposed to the weather.

Any process then, not too expensive, which will render the cheap woods hard and durable will be an important matter in railroad economy.

A Mr. E. R. Andrews who has been experimenting with creosote as a wood preservative, publishes some results in a late number of the *Gas Light Journal*. Those experiments seem to prove conclusively that wood of a porous nature which will readily absorb the creosote, becomes in consequence hard, firm, not affected by changes of temperature and not subject to decay. He states that common woods so treated will last for twenty years when in use as railroad ties. Not only do they become hard so as not to wear under the rails, but spikes once driven into them do not work out, nor are they liable to rust as in woods not treated with creosote. These are matters of peculiar interest to those in charge of tracks and road-bed repairs.

Among the varieties of wood treated white pine is said to become hard enough for use as ties. Yellow pine also readily absorbs creosote, and when so treated makes a cheap and durable tie. Hemlock, which is an abundant wood of little value or durability, when treated in a bath of creosote becomes the equal of oak when put to use directly from the forest.

Many Western roads have always been dependent upon regions far distant from them for their ties. Not only were the ties a matter of great expense, but when the transportation required to bring them from the place of growth to the place for use was taken into account, the construction account of the roads became formidable. By the creosote bath, according to Mr. Andrews, the cottonwood so common in the West and Southwest becomes an excellent substitute for oak as a railroad tie. Heretofore the cottonwood had little or no value except for fuel. Even for that purpose its use was principally confined to steamboats upon the rivers. Coal mines having been opened over so wide a territory, coal has generally displaced wood for fuel; since which the cottonwood has scarcely been considered of any value for any purpose.

Let it be clearly demonstrated that cottonwood makes a good and durable railroad tie, and its use by many thousand miles of railroad will be immediate and certain. The use of creosote as a wood preservative is not new. Mr. Andrews seems to have improved upon former methods, as he has by his own statements gained largely upon previous results. Railroad managers will not be slow in testing the truth or fallacy of his claims since so large an amount is involved.

St. Cloud, Grantsburg and Ashland Railway.

The St. Cloud, Grantsburg and Ashland Railway Company is the title of an association just formed to build a narrow gauge railroad from the St. Croix river from some point in T. 37 or 38 N., R. 20 W., in an easterly direction via Grantsbury to an intersection with the North Wisconsin Railway, being a distance of 50 miles, and wholly within Burnett county, Wisconsin. The capital stock is fixed at $250,000 of 25,000 shares at $10 each, all of one class. The directors are: John Comstock, J. M. Whaley, Hudson; Ira Griffin, Geo. Badger, O. Cook, Oshkosh; Canute Anderson, L. Grettum, A. Ahlstrom, W. E. Talboys, John Fleming, John Swenson, and Aug. Cassel of Burnett county. It is expected that the road will ultimately be extended westward via Rush City to St. Cloud, and eastward to Ashland on Lake Superior.—*Lake Superior Times.*

☞ Articles of incorporation of the Omaha and National Park Railway have been filed with the Secretary of State of Nebraska. The object of this company is the construction of a railway and telegraph line from Omaha, Nebraska, through Dakota and Wyoming, to the National Yellow stone Parks, to connect with the Northern Pacific Railroad in Montana, east of the one hundred and thirteenth meridian. A bill was introduced in the U. S. Senate on the 12th inst., by Senator Saunders, proposing to grant a right of way and forty sections of land per mile in aid of the above road.

☞ The Hartford, Md., Democrat says that the engineer corps of the Baltimore and Delta Railroad, under the direction of Major P. P. Dandridge, have located about six miles of the line between Forest Hill and Water's Mill, and are at present engaged at the crossing of Winter's run. As there is very little straight line on this part of the road, the adjustment of the numerous curves upon the ground, so as to avoid unnecessary and expensive cutting and filling, is a work requiring great care and engineering skill, and progress is necessarily slow.

☞ The Pittsburgh Chronicle says that the Southern branch of the Pittsburgh Southern Railroad to Morgantown via Kammerer, Hillsboro, Carmichaels and Mt. Morris, is under contract, and the grading, as far as the National road, a distance of fifteen miles, will be finished within ninety days. Two corps of engineerr under the charge of Mr. T. P. Roberts are now engaged making surveys between Morgantown, Mt. Morris and Carmichaels.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 20th inst., the sixtieth call for the redemption of 5 20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 20th day of September next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 60,001 to 62,000, both inclusive; $100, Nos. 103,001 to 106,000, both inclusive; $500, Nos. 72,001 to 74 000, both inclusive; $1,000, Nos. 130,001 to 135,000, both inclusive. Total coupons, $2,500,000.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,101 to 2,200, both inclusive; $100, Nos. 17,151 to 17,500, both inclusive: $500, Nos. 10,001 to 10,200 both inclusive; $1,000, Nos. 33,101 to 38,700, both inclusive; $5,000, Nos. 8,901 to 9,100 both inclusive; $10,000, Nos. 16,751 to 17,100, both inclusive. Total registered, $2,500,000. Aggregate, $5,000,000.

☞ The Newtown (Md.) Record says that the subject of the extension of the Worcester and Somerset Railroad was before the meeting of those interested at Drummondtown on Wednesday last, and the prospects for its consummation are very flattering. The following were the board of directors elected for the Peninsular Railroad: Wm Painter, W. E. Ward, John S. Bates, W. U. Schoolfield, U. H. Painter, U. M. Sclott and O. H. Brown. The board of directors subsequently elected Gen. Wm. Painter president of the company.

☞ The new railroad now in course of construction between Eldred and Tarport, McKean County, Penn., will be completed and in running order by the 1st of July. The road is of a three-foot gauge, the same as the Olean, Bradford and Warren Railroad, and will pass through the Knapp creek oil territory to Rixford, thence over the mountains to Boyd Valley, and down Kendall creek to Tarport. It penetrates the very heart of the northeastern oil field, and will doubtless prove a remunerative enterprise to its projectors.

☞ Morgantown (W. Va.) has voted to subscribe $20,000 to the capital stock of the proposed Pittsburgh, West Virginia and Southern Railroad, to which must be added $15,000 heretofore subscribed by individual citizens of Morgantown. Seven surveyors are now laying out the route of the road from Grafton to Morgantown. The construction of the road is now only a matter of time.

☞ The new ferryboat, to ply on the Detroit river for the Canada Southern Railway Co., is to be a side-wheeler, 267 feet over all, 39 feet wide at the waterline, and 64 feet on deck, with 14 feet depth of hold. She will carry sixteen cars on two tracks.

☞ The gross earnings of the Philadelphia and Erie Railroad Company for the month of May, 1878, were $238,024 08, the expenses, $208,673 71, and the net earnings $34,350 37.

Wooden Rails for Steam Roads.

As we have lately described, there seems quite a disposition now to build wooden railways for steam locomotives in regions where wood is plenty, and the expense of iron cannot be borne. This has been so far reduced to practice that Eastern locomotive builders are announcing styles of locomotives which are especially adapted to use on wooden rails. One of these firms has prepared an interesting statement of the best timber to use in these roads and how to lay them. The kind of timber to use is of course a local question to be decided according to available supplies. It is said that the best wood is maple, laid with the heart up; hard pine is used in the South. The simplest form of wooden rail is a stringer cut in 16 to 20 feet lengths, and of such cross section as the kind of wood or weight of engine requires. Six inches square stringer is the size we would generally advise, although five inches face by seven inches depth is as good. Four inches face by six inches depth, or five inches square will answer for our smallest engines, if the wood is good; still smaller sizes may be used by placing the cross ties close together, say two feet or two and a half feet between centers; for large stringers, four feet between centers will answer. When worn out on the top the stringer may be reversed, and when again worn may be used for ties.

The ties are easiest fitted and laid if made uniform, and of about the same size lumber as the rails; six inches square is heavy enough. Any cheap lumber not specially liable to decay will do. Ordinary hewn ties may be used, but not being uniform are less convenient for cutting out recesses for rails. They should be at least three feet longer than the width of the track between rails.

The ties must be cut out accurately and uniformly to receive the rails. The recesses should be about three inches deep, and be at the top face of the tie an inch, and at the bottom of the recess one and one-half inch wider than the rail. The inner faces of the recesses are perpendicular, and the distance between them is the gauge of the track. The bottom of the recess should be level, and ties laid well to afford proper bearing for the stringer.

Wedges made of any cheap wood, or better, of ends of stuff left from rails, are driven on the outsides of the rails. They are made of right shape to fit the space left; the reason for making this space wider at the bottom than at the top is to keep the wedges from working up, so that the rail may be held securely in place.

The stringers must be arranged to break joints on the ties. Both stringers should not break joint on the same tie; the stringers are sometimes sawed off diagonally instead of perpendicularly, so as to be lapped and spiked together. The lumber for a hard pine wooden road costs about $450 per mile.

With another style of wooden road the stringer is made of hemlock or any cheap lumber, and a maple strip four to five inches wide and two and one half to three inches thick is spiked on the stringer. By this plan, such a part of the rail as is worn out may be removed without taking up the stringer. This maple strip may be replaced by a T iron rail considerably lighter than would be required if laid directly on cross-ties. We would strongly advise this instead of strap iron.

A wooden rail is very slippery when wet, and hard to keep clear of snow and ice in freezing weather. On very bad curves and steep grades a wooden rail is impracticable, and iron must be used.

A locomotive has but one-half or two-thirds the power on wood that it has on iron; the friction useful for traction is less, and the flange friction is greater. Locomotives for wooden rails require to be very strongly built and to be evenly balanced; the weight should be less and the drivers larger than for the same size cylinders on iron rail.

Generally speaking we would dissuade any one from laying a wooden rail. In cases where lumber is cheap, and iron very dear, it may be advisable to operate a wooden road, as for instance where a cheap improvement on an ordinary country wagon road is needed. To do any considerable business on the very best wooden road that can be built, will in the words of one of our customers, who has tried the experiment, "require a very rich concern." Parties using animal power for hauling on a wooden rail, if content not to greatly increase the load, may effect a very considerable saving by using a locomotive; but for transportation upon a scale of any magnitude, wooden roads are very unsatisfactory and almost impracticable.—*Pacific Rural Press.*

The Coal Trade.

For the week ending June 15, the total anthracite production, as reported by the several carrying companies, amounted to 459 268 tons, against 468,932 tons in corresponding week last year, a decrease of 9,664 tons. The total amount of anthracite mined for the coal year is 6,045,710 tons, against 8,361,443 tons for same period last year, a decrease of 2,315,733 tons. The quantity of bituminous coal sent to market for the week amounted to 74,925 tons, against 74,033 tons in corresponding week last year, an increase of 922 tons. The total amount of bituminous mined for the year is 1,073,111 tons, against 1,376,543 tons for corresponding period last year, a decrease of 303,432 tons. The total tonnage of all kinds of coal for the week is 534,193 tons, against 542,935 tons in corresponding week last year, a decrease of 8742 tons. The total tonnage of all kinds of coal for the coal year is 7,118,821 tons, against 9,737,986 to same date last year, a decrease of 2,619,165 tons. The receipts at Perth Amboy for the week ending last Saturday, June 22, were 22,530 tons, the shipments 20,248 tons, leaving a stock on hand of 40,998 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of June was 104,773 tons, of which 83,098 tons were coal, and 21,675 tons coke. The total carried for the year is 2,091,620 tons, of which 1,631,555 tons were coal and 460,065 tons coke. These figures embrace all the coal carried over the road, east and west. The Reading Railroad carried 70,000 tons of coal last week to Port Richmond, whilst 52,000 tons were shipped thence, leaving the stock on hand at Port Richmond last Saturday about 139,600 tons.—*Phila. Ledger, June* 24.

The Coal Combination. --- Allotments for July.

The monthly meeting of the Anthracite Board of Control was held at the office of the Delaware and Hudson Canal Company in this city on the 24th inst. Among those present were: Thomas Dickson, President of the Delaware and Hudson Canal Company, Chairman; F. B. Gowan, President of the Philadelphia and Reading Railroad; Samuel Sloan, President of the Delaware, Lackawanna and Western; Thomas Hoyt, President of the Pennsylvania Coal Company; Drs. Linderman and Wilber, of the Lehigh Valley Railroad Company; Mr. Graeff, representing the individual operatives on the line of the Philadelphia and Reading Railroad; Receiver Clark, of the Lehigh and Wilkesbarre Coal Co., and Judge Lathrop, Receiver of the Central Railroad of New Jersey. All the parties in the combination were represented, with the exception of the Pennsylvania Railroad Company, for which road F. B. Gowan, President of the Philadelphia and Reading Railroad, held proxies.

The Board decided to fix the output of coal for the month of July at 1,500,000 tons. In 1877 the amount mined for the same month was 1,763,497 tons, and in 1876 1,360,474 tons. The output fixed by the Board for this present month was 1,733,658 tons, which, as compared with the amount fixed for July, shows a decrease for next month of 233,658 tons.

The quota of all the companies will be equalized by July 1. The following allotments of coal were made for the month of July:

	Tons.
Philadelphia and Reading Railroad.....	429,375
Lehigh Valley Railroad.....	296,250
Central Railroad of New Jersey.....	198,575
Delaware, Lackawanna & Western R. R.	191,250
Delaware and Hudson Canal Company..	187,200
Pennsylvania Railroad Company.....	114,375
Pennsylvania Coal Company.....	87,975
Total.....	1,500,000

The question of increasing the price of coal was brought up before the Board, but they declined to take any action in that respect, on the ground that they have no right to fix prices, that privilege belonging to the companies alone.

The meeting then adjourned.

Subsequently the representatives of the Lehigh Valley Railroad held a meeting and decided to raise the price of stove coal twenty cents and of chestnut twenty-five cents per ton. All other sizes remain at the same prices. The steamboat sizes were not changed on account of the competition with bituminous coal. It is understood that the other companies will conform to these rates.

☞ A certificate of incorporation has been filed in the office of the Secretary of State of Ohio of the Springfield, Troy and Northwestern Railroad company, with termini at Springfield and Troy, through the counties of Clark and Miami; capital stock, $150,000, in shares of $50 each, by B. Neff and others.

WHO WANTS MACHINERY!

We have for sale the *Largest and Most Varied Assortment* of Machinery, both NEW and SECOND-HAND, to be found in the hands of any firm in the United States, and we offer at prices far below the market value. Send stamps for our No. 17 PRINTED LIST, fully describing over 1,200 machines with price affixed to each, comprising from one to a dozen machines of each of the following articles, with many others not named.

Anvils	Clothespin Machinery	Hay Presses	Planers, Iron
Ax Handle Lathes	Dovetailers	Horse Powers	Planers, Wood
Bellows	Drop Presses	Hub Machinery	Portable Mills
Belting	Drill Presses	Hoisting Engines	Power Hammers
Blowers	Daniels Planers	Hydraulic Presses	Portable Engines
Brushers	Door Machinery	Irregular Moulders	Printers' Machinery
Band Saws	Edgers	Jacks	Pipe, steam & water
Buzz Saws	Elevators	Jig Saws	Planers & Matchers
Bolt Cutters	Extractors	Jack Screws	Portable Grist Mills
Bolt Machines	Emery Wheels	Looms	Rolls
Bobbin Lathes	Engines, 1 to 300 h p	Lathes, Iron	Re-Saws
Boring Machines	Excelsior Machines	Lath Machinery	Radial Drills
Boiler Feed Pumps	Fans	Lathes, Wood Turning	Rivet Machines
Boilers, 1 to 100 h p	Forges	Leather Belts, 2 to 24 i	Ring Spin'ing Frames
Box Board Matchers	Fire Pumps	Matchers	Rubber Belt'g, 2 to 24i
Blind Slat Crimpers	Foot Lathes	Mortisers	Saws
Blind Slat Tenoners	Fire Engines	Mill Spindles	Scales
Box Board Machinery	Friction Clutches	Milling Machines	Shears
Cards	Gearing	Moulding Machines	Saw Mills
Chucks	Grist Mills	Nut Tappers	Saw Arbors
Cupolas	Governors	Nut Machinery	Surfacers
Crushers	Gear Cutters	Pumps	Swing Saws
Cob Crackers	Gauge Lathes	Punches	Steam Pumps
Circular Saws	Grindstones	Pickers	Steam Yachts
Cotton Machinery	Gray & Woods' Plan'r	Pulleys	Steam Gauges
Circular Saw Mills	Hose	Pulp Pumps	Spoke Lathes
Clapboard Machines	Heaters	Power Presses	Steam Hammers

Shingle Mills, Skein Winders, Sash Machinery, Spining Machines, Stationary Engines, Tenoners, Trip Hammers, Upright Engines, Upright Boilers, Vises, Veneer Saws, Victor Lathes, Variety Moulders, Whistles, Wire Rope, Water Wheels, Woolen Machinery, Yachts.

No matter what machine or machines you are in want of, do not purchase until you send for and read one of our LISTS, and see the prices at which we sell. *State fully just what you want.* Address:

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further precedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

Mr. Vanderbilt's Policy.

The financial world was not a little surprised recently at the publication of an open letter from Mr. W. H. Vanderbilt to the Chicago *Times* concerning a freight policy for the grain-carrying railroads. Mr. Vanderbilt is not a letter writer, nor is he a man accustomed to publish his views of present or future operations. This first of all surprised his contemporaries and others interested in railroad management. But his policy as given in his letter to the *Times* is more calculated to astonish and puzzle than the fact that this policy originated with him.

A late election of officers transferred the control of the Canada Southern Railroad to Mr. Vanderbilt. The Canada Southern was a competitor, but not a very active or successful one, with the Lake Shore and Michigan Southern Railroad of which Mr. Vanderbilt already held control. Here, then, were two competing lines brought virtually under the same management, and the ordinary looker-on would expect increased profits and lessened expenses—general prosperity as the result. He might not find it so.

Leaving out of the account all movements and fluctuations of the stock market so far as Mr. Vanderbilt is concerned, we desire to discuss simply his remarkable freight policy as set forth in his *Times* letter.

He declares the roads are now carrying grain at a loss, which is true; and he furthermore advocates a pooling agreement by the competing roads whereby uniform and higher rates will be maintained. Acting upon the presumption that Mr. Vanderbilt understands his own position as well as that of competing carriers thoroughly, his proposition to raise or maintain freights at anything above present figures seems incredible. The precise condition of things is this: An extraordinary amount of freight, eastward bound, is being carried by rail and water at low rates. The present rate from Chicago to New York by water being 13 cents per hundred pounds. Already the quantity of grain arriving at the Western shipping centres shows a marked falling off, which will continue until September. The causes for this sudden shrinkage in freight offerings are, labor upon the corn crop, and the harvesting of wheat and other small grains. This harvest work is imperative. No matter how high the price of grain or how low the rate of freight, no temptation will draw the farmer from his wheat field when the grain is fit for the reaper. That establishes beyond argument the certainty of lessened freight offerings for the months of July and August.

It is hardly to be expected that water rates on eastward bound freight will advance when the amount to be carried is steadily lessening. The water rates must largely govern rail rates. If, then, the present water rate on grain from Chicago to New York, 13 cents per 100 pounds, or its equivalent rail rate, is a loss to the roads, will any combination of the competing roads modify or lessen present losses?

That, really, is the freight problem Mr. Vanderbilt is trying to solve. And by no process of reasoning can we reach a satisfactory conclusion. The most careful calculation seems to bring this result: Any combination of rail lines to advance present freights will result in loss to the roads and gain to the water carriers. Then has Mr. Vanderbilt blundered? It certainly looks like it. Until he offers solid reasons—profits—for a combination now of rail lines we must question the wisdom and the expediency of his policy.

Boston, Hoosac Tunnel and Western Railway.

By an act of the last Legislature approved May 17, the Troy and Boston road was given permission within forty days from the passage of the act to assign their lease of the Southern Vermont Railroad to the State in order to afford access to the Tunnel from New York by other corporations. The time has expired and hence they decline to surrender the lease. The act further provided that in case the Troy and Boston Company did not assign the lease, "the consent of the Commonwealth is hereby given, so far as the same may be lawful and its title or interest is concerned, to the Boston, Hoosac Tunnel and Western Railway Company, a corporation duly established under the laws of the State of Vermont, to enter upon, and use and locate, construct and maintain, under the laws of the State of Vermont, a railroad upon the rights of way and railroad lands of said Troy and Greenfield Railroad in the State of Vermont, otherwise called the Southern Vermont Railroad, and upon such parts and portions of the same as may be necessary to construct their railroad through the State of Vermont, but not interfering with the tracks of the present road, nor entering within one rod of said tracks, except as may be necessary for connection with the Troy and Greenfield Railroad at the State line of Massachusetts."

The act further provided that the provisions relative to the Boston, Hoosac Tunnel and Western Railroad Company, which are stated in detail, shall take effect whenever the Boston, Hoosac Tunnel and Western Railway Company of Vermont, shall file in the office of the Secretary of this Commonwealth a valid and effective agreement, ratified by a vote of its stockholders, and satisfactory to the Attorney General, to accept the same, and that all the terms and conditions therein named shall be complied with: provided, such agreement shall be so filed within forty days of

the passage of this act, and said agreement shall be recorded in the town clerk's office of the town of Pownal, in the State of Vermont. This agreement was filed in the proper time.

Dayton and Michigan Railroad.

The income of this company for the year ending March 31, 1878, was as follows:

From passengers	$245,607 55
" freight	560,984 52
" mails and express	35,246 69
" rents	4,829 40
" Toledo elevator	18,164 80

Baltimore and Ohio Railroad.

The Board of Public Works of Maryland, at their meeting held at Annapolis on the 29th ult., received in settlement from the Baltimore and Ohio Railroad Company $100,540 64, being the amount of all claims for taxes on the gross receipts. Also the sum of $366,000 in bonds and $370 56 in cash, in compromise of the State's claims arising out of the former one-fifth passenger receipt tax on the Washington Branch from April, 1872, and the five semi-annual five per cent dividends to December 31, 1877. The bonds are of the denomination of $1,000 each, 6 per cent, running ten years. These payments are in accordance with the terms of the act passed at the last session of the Legislature, and since accepted at a meeting of the stockholders of the company.

Cincinnati, Hamilton and Indianapolis Railroad.

The income of this company for the year ending March 31, 1878, was as follows:

From passengers	$120,086 05

The Sale of the Annapolis and Elkridge Railroad Postponed.

The Drum Point Railroad Company and its trustees, W. G. Harrison and F. W. Brune, having desired to sell the Annapolis and Elkridge Railroad under a mortgage held by the first named corporation, were prevented from making such sale by an injunction obtained by the latter named company.

Judge Gilmor, of the Baltimore Circuit Court, before whom the hearing of the injunction case came, gave his opinion substantially as follows: by the Maryland statute law only courts of the counties in which the mortgage property is located have jurisdiction. In this case the railroad in question being in Anne Arundel county, the Baltimore Circuit court would not properly have jurisdiction. The sale advertised to take place on the 2d July by the trustees in Baltimore would not be sustained. The Judge intimated that the filing of a bond in Anne Arundel county would give the court of that county jurisdiction for all purposes necessary to pronounce upon the formal proceedings necessary to a foreclosure and sale.

The State of Maryland having a large interest in the Annapolis and Elkridge Railroad, was represented in the hearing before Judge Gilmore by Attorney General Gwinne, and ex-Judge W. H. Tuck. A similar injunction will be asked for whenever proceedings for a sale shall be commenced in Anne Arundel County.

Cincinnati, Richmond and Chicago R. R.

The income of this company for the year ending March, 31, 1878, was as follows:

From passengers	$60,866 75
" freight	123 980 18

Bureau of Railroad Accounts.

The Bureau of Railroad Accounts, provided for by Congress at the last session, was organized in the Department of the Interior at Washington on the 1st inst. by Mr. Theophilus French, the newly appointed Auditor. Mr. Southwick Guthrie, of Iowa, formerly Cashier of the United States Treasury, was appointed book-keeper of the bureau, and Mr. August Duddenhausen, of Ohio, who for a number of years has been associated with Mr. French in the Treasury Division, of Accounts, was selected as assistant book-keeper. The duties of the Auditor, under the direction of the Secretary of the Interior, will be to prescribe a system of reports to be rendered to the bureau by subsidized or land grant railroads, whose roads are in whole or in part west, north, or south of the Missouri River; to examine the books and accounts of said railroads once a year, and at such other times as may be deemed necessary, to verify their reports; to assist the Government Directors in all matters that come under their cognizance when requested to do so; to see that the laws relating to said railroad companies are enforced; to furnish such information to the several departments of the Government in regard to tariffs for freight and passengers as may be required or deemed expedient; and to render a report to the Secretary of the Interior on the accounts, af-

fairs, condition, &c., of said railroads for each fiscal year.

Lake Shore and Michigan Southern Railway.

At a meeting of the directors of the Lake Shore and Michigan Southern Railway company, held at Cleveland, Ohio, on the 26th ult., the following statement from the auditor as to the business of the road for the six months ending with June 30, 1878, was presented:

	1877.	1878.
Gross earnings (June partly estimated)	$6,461,166	$6,663,318
Operating expenses & taxes (June partly estimated)	4,628,119	4,292,105
Per cent of expenses	(71⅙)	(71⅙)
Net earnings	$1,833,047	$2,371,213
Interest, rents and dividend on guaranteed stock	1,387,800	1,380,000
Balance	$445,247	$991,213

From the balance of 1878 there have been paid $200,000 for a subscription for that amount of the stock of the Pittsburg and Lake Erie Railroad Company, and $80,000 for lands in Chicago. The former was to aid in the construction of a line from Pittsburg by way of Youngstown, running over the Mahoning Coal Railroad, leased by this company and reaching the company's line at Ashtabula and the water front and docks at Ashtabula Harbor. This enterprise will, it is believed, contribute largely to this company's traffic at remunerative rates—sufficiently to amply compensate for the investment. The land at Chicago has long been considered necessary for the convenient and economical transaction of the company's business. Some years ago negotiations for its purchase at $150,000 were carried on. Being in market at the price now paid and other parties being desirous to purchase and improve, so as to practically place it out of the reach of the company in the future, it was taken.

About five thousand tons of steel rails have been laid during the six months and the excess of cost over old rails taken up has been charged to operating expenses.

During the six months $70,000 was paid on account of the Ashtabula accident—all claims for which, except five or six, are now disposed of.

The road and property of the company have been fully maintained at its standard condition. There is no floating debt nor any outstanding obligations in that nature.

C. P. Leland, Auditor.

The board were of the opinion that it would not be at this time sound policy to increase the funded debt by the sale of bonds for expenditures on capital account, and resolved to appropriate the balance for the six months of 1878, as follows:

Sinking fund, six months		$125,000
Payments made on Ashtabula accident		70,000
Subscription to stock in Pittsburg and Lake Erie Railroad Company		200,000
Purchase of land at Chicago		80,000
Making		$475,000
Dividend of 1 per cent payable on August 1, 1878	$494,665	
Leaving surplus of	21,548	
		516,218
Total, as above		$991,218

☞ In the Circuit Court, at Richmond, Va., on Saturday, June 29, 1878, Judge Welford entered an order in the Chesapeake and Ohio Railroad case, which is preliminary to the reorganization of the company. The judge approved the form of the deeds of sale. Joseph Bryan and Henry T. Wickham were appointed trustees to receive the deed of trust and to execute the trust thereof. The cause is still to remain upon the docket of the court.

Portsmouth, Gt. Falls and Conway Railroad Bonds.

The Supreme Court of Massachusetts rendered, on the 1st inst., a decision in the matter of the Eastern Railroad Company against William C. Rogers and others—a bill in equity by the complainant corporation against the Trustees appointed under a legislative act of 1876, to determine whether said Eastern Railroad Company should apply the earnings of its railroad to the payment of interest on the bonds of the Portsmouth, Great Falls and Conway Railway Company to the amount of $1,000,000 issued by the latter company and guaranteed by the Eastern Railroad Company. A full court has sent down the following rescript:

"Decree to be entered that it is not the duty or right of the Eastern Railroad Company to apply the earnings of its railroad to the payment of interest on the bonds of the Portsmouth, Great Falls and Conway Railroad Company as it shall from time to time accrue and become due. By several agreements between the Portsmouth, Great Falls and Conway Railroad Company, the Eastern Railroad Company in New Hampshire, and the Eastern Railroad Company, and the last named corporation agrees to pay, as or in lieu of rent for the leased railroads of the other two corporations, the same dividends to the stockholders of the other two corporations which it pays to its own stockholders. Such agreements do not create any liability on the part of the Eastern Railroad Company to pay the principal or interest of bonds issued by the Portsmouth, Great Falls and Conway Railroad Company; its only liability on these bonds is by virtue of its contract of guarantee entered into when it negotiated such bonds."

Republican Valley Railroad.

The Burlington and Missouri in Nebraska have issued a circular stating that it is proposed to build a road from Hastings (a point on their road thirty miles from Kearney Junction, where it connects with the Union Pacific) into the valley of the Republican River, to be called the Republican Valley Railroad, of which the Burlington and Missouri in Nebraska are to take a perpetual lease. Capital to be $1,000,000, and Bonds limited to $853,000; the Bonds to be first mortgage, to run forty years at six per cent. The Burlington and Missouri in Nebraska to pay as rent interest on the Bonds and the same rate of dividend after January 1, 1879, as it pays on its own stock. The $853,000 Bonds is offered to the stockholders of Burlington and Missouri in Nebraska, each 100 shares to pay $1000 and receive ten shares stock in the new road and a Bond of $1000, which is considered equal to a dividend on Burlington and Missouri in Nebraska stock of 6 to 9 per cent.

☞ The Chesapeake and Ohio Railroad Company, whose property and franchises were recently purchased by a committee of bondholders, was reorganized on the 1st inst. with C. P. Huntington, of New York, as President; A. S. Hatch, New York, First Vice President; William C. Wickham, Virginia, Second Vice President, and W. M. S. Dunn, Engineer and Superintendent.

☞ The directors of the St. Paul and Duluth Railroad Company, elected on the 22d ult., are: John P. Ilsley, William H. Rhown, Edward A. Rollins, Edward M. Lewis, George Whitney and Frederick R. Shelton, of Philadelphia, James Smith, Jr., Wm. Dawson and Charles H. Graves, of Minnesota. At a meeting of the new board the former officers of the company were re-elected.

Kings County Central Railroad.

This is another of the new railroads to Coney Island. The line is three and one quarter miles long, and runs near to the main entrance to the Cemetery of the Holy Cross, near the County Buildings of Kings County and the Kings County Penitentiary, connecting with the Manhattan Beach Railroad four and one half miles from Coney Island. This line is considered to have superior advantages in the matter of winter travel; whilst as a Summer route to Coney Island it has in common with others a pretty direct line from Brooklyn to Manhattan Beach.

This road has been built by Mr. E. B. Litchfield who is understood to be sole owner. The Manhattan Beach Railway Company hold a 99 year lease of the road. By the terms of this lease Mr. Litchfield is to receive two-fifths of the gross receipts; the lessees to furnish rolling stock, and pay all expenses for running trains and keeping the road in order.

Brooklyn, Flatbush and Coney Island R. R.

This road was formally opened for public travel July 1. The Summer time table went into effect on the 2d. The line of road is about six and a half miles long; commencing at the company's depot at the Willink entrance to Prospect Park, Brooklyn, and terminating at the Hotel Brighton, Brighton Beach, Coney Island. About 1000 invitations were issued by the company most of which were accepted. The first train with the invited guests on board made the trip over the road in about 14 minutes. At the Hotel Brighton there was a banquet, followed by speeches and general hilarity. James N. Smith is President of the company.

☞ The Supreme Court of the State of Arkansas decided on the 29th ult. that the $3,000,000 of levee bonds of the State were illegal and void, on the grounds that the bill providing for their issue did not pass the Lower House of the Legislature in the manner prescribed by the constitution. There was an undisputed majority in favor of the bill, but the clerk omitted to enter the names of the members voting in the negative at large upon the journal. This the Court decided was a fatal omission and the bonds are therefore void.

☞ The grading of the Southern Branch of the Pittsburgh Southern Railroad to Morgantown, W. Va., via Kammerer, Hillsboro, Carmichaels and Mt. Morris, is under contract, and the grading, as far as the National road, a distance of fifteen miles, will be finished within ninety days. Two corps of engineers, under the charge of Mr. T. P. Roberts, are now engaged in making surveys between Morgantown, Mt. Morris and Carmichaels.

☞ The preliminary survey of the Farmington and Rochester, N. H., Railroad has been completed, showing the distance to be 7¾ miles. The estimated cost is placed at less than $100,000.

☞ Work has been resumed on the Nova Scotia, Nictaux and Atlantic Railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

(From the North American June 22, 1878.)

A Victory for a Philadelphia House.

On our table we have the Official Report of Awards, Group XXV., published by J. B. Lippincott, of this city, and on turning its pages we notice a well deserved compliment to a Philadelphia firm. We take pleasure in giving unsolicited to our numerous readers the clause referred to, viz: "A comparatively modern form among weighing machines is the railway platform scale, of which the conditions are, that it shall always be ready for action and admit of loads as great as forty tons being rolled upon it without injury to its suspension. The construction of these machines is most developed in the United States, and the plan of Riehle' Bros. of Philadelphia, has appeared to the Judges to offer the greatest guarantee of accuracy and durability. Owing to the great size of these machines their manufacture in other countries was represented only by models or designs."

Statement of the Public Debt of the United States, July 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$6,500 00

Western Pacific bonds, 1862-4	1,970,560 00	59,116 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	48,849 60
Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $37,896,334 50; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $28,014,890 25.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Chicago, Rock Island and Pacific Railroad.

The following circular has been issued by the Chicago, Rock Island and Pacific Railroad Company:

TREASURER'S OFFICE,
CHICAGO, ROCK ISLAND AND PACIFIC R. R. CO.,
No. 13 WILLIAM STREET, NEW YORK.

A quarterly dividend of 2 per cent upon the capital stock of this company has been declared, payable August 1, 1878, at this office. In addition to this a dividend of 2 per cent has been declared on the capital stock of the Iowa Southern and Missouri Northern Railroad Company, held by the Treasurer in trust for the stockholders of this company. Your proportion of this dividend will be equal to 25 per cent of the amount of your dividend on the stock of the Chicago, Rock Island and Pacific Railroad Company, held by you, or 50 cents per share.

A like dividend will be paid on the stock of the Iowa Southern and Missouri Northern Railroad Company on the first days of November, 1878, and February and May, 1879.

FRANCIS H. TOWS, Treasurer.

☞ About 35 miles of the Pittsburgh and Lake Erie Railroad between Youngstown and Beaver Falls have been completed, and between Pittsburgh and Beaver Falls work is being prosecuted actively. It is confidently expected that the road will be opened for business on the 1st of November next.

American Railroad Journal.

Saturday, July 6, 1878.

Financial and Commercial Affairs.

The heat and the holiday are two substantial reasons for a very quiet unprofitable week. The heat drove away multitudes of families, and the male portion left behind intent upon business has speedily followed their households to the hills or the seashore. The national holiday coming this year in the middle of the week has tended to spoil the entire week for business purposes. A plethora of Money has been the condition of the market. More lenders and offerings than borrowers. And a number of causes seem to indicate a continuance of the present condition. The excess of our export trade over our imports, now continued over several months, is steadily swelling the volume of available funds held by the New York banks. The drain of money westward to move last season's crops has ended and our balances are now being swelled again from that quarter. Again, the payment by the Government of its July interest has added other millions not needed; so the complaint is of having too much money with very little use for it. New York is not alone entitled to complain of dulness in general. In San Francisco, of the three Stock and Mining Boards, the San Francisco, the Pacific, and the California; the two first named boards adjourned over for the entire week; leaving the remaining board and the street to do the little business there was to be done. From Philadelphia money is reported in large supply. Call loans are made at 2@3 per cent. Commercial paper is in demand at 3½ @5 per cent, but is scarce. At Baltimore a similar state of the money market prevails. The

mills and manufacturers of New England who recognize Boston as their source of money supply, are reported as making comparatively light demands which are easily met. Call loans have been quoted here at from 1@4, with 2@3 per cent as the basis of the principal negotiations, and very choice to strictly prime mercantile credits were rated at 2½@5, the best grades of short date passing readily at 2½@3½ per cent per annum. The City bank exhibit of last week indicated a decrease in the loan and discount average of $1,993,500, and an increase in the item of circulation of $24,300. The average of deposits was enlarged $581,500. The legal tender reserve was further augmented $1,529,400; and the specie average $1,242,200. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $18,816,800, (the highest aggregate reached this year) against $16,190,575 the preceding week. The City bank exchanges in currency reached $349,403,759, or a daily average of $58,233,957.

The outstanding amount of legal tender notes is $346,743,313. The National bank circulation is now $323,078,164 of currency notes and $1,432,120 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $5,656,000.

The U. S. Sub Treasury receipts in June were $47,428,319 (of which $6,196,636 from Customs;) payments, $45,518,855, (of which $4,977,224 were for coin interest.)

An increase in the public debt of the United States in June was reported to the amount of $2,149,381 18, caused by the payment of $3,859,920 85 on account of deficiency appropriations.

The Treasury disbursements in June reached $14,767,443, including currency, $2,653,479 09; special fund for redemption of fractional currency, $10,000,000 00; special deposit of legal tenders for redemption of certificates of deposit, $46,755,000 00; coin, $197,415,132 99; including coin certificates, $44,367,000 00; outstanding legal tenders, $346,681,016 00; on account of civil and miscellaneous, $4,847,891 68; on account of war, $3,918 068 21; on account of navy, $3,649,686 59; on account of Interior (Indians and pensions), $2,851,796 50. This is exclusive of payments made on account of the interest or principal of the public debt of the United States.

More demand has been noted for Government Securities which have been quoted stronger in price closing on Wednesday quite firmly. At the close on Wednesday the current quotations were as follows:

United States 6s, 1881, registered, 107⅜@107¾; do. coupon, 107½@107¾; 5-20s, 1865, new, registered, 102⅝@102¾; do. coupon, 102½@102¾; do. 1867, registered, 105⅞@106⅛; do. coupon, 105⅞@106⅛; do. 1868, registered, 108@108⅛; do. coupon, 108@108½; ten-forties, registered, 109@109¼; do. coupon, 109⅛@109¼; five per cents, 1881, registered, 107⅛@107⅜; do. coupon, 107@107¼; 4½ per cents, 1891, registered, 104½@104⅝; do. coupon, 104½@104⅝; 4 per cents, 1907, reg., 100¼@100⅜; do. coupon, 100¼@100⅜; sixes, currency, 120¾@121; Central Pacific gold bonds, 105¼@105½.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $349,126,400, and $13,858,000 as security for public deposits.

The income of the Government from internal revenues last week was about three millions, and from Customs last week about two millions. The receipts from internal revenue for the fiscal year ending July 1, as reported at the office of the Commissioner of Internal Revenue, were $110,503,746, showing a decrease of $8,367,231, as compared with the preceding year.

A fair investment movement has been noted in State bonds which have been quoted rather firmer, in the instance of the more prominent loans. Railway Mortgages have been in moderate request, chiefly for investment account, with prices showing rather wide fluctuations for the favorites of the actual interest bearing obligations. And in the line of Railway and Miscellaneous share property business has been less active, but indicative of a generally more confident temper in the speculation.

Gold has been without much animation, and has varied little in price. The extremes during the week have been 100½@100¾, closing on Wednesday at 100⅝ as against 100¾ on Wednesday of the preceding week. The specie outflow last week was only $58,524—making the total exports of specie hence since January 1, $8,579,482 against $19,561,172 the same time in the preceding year. The imports of specie at this port last week were to the amount of $63,150 and since January 1st have been $13,024,876 as against $7,841,049 same time in the preceding year. The Customs demand for gold in the local market last week reached $1,371,000 or an average of $228,500 per day.

Foreign Exchange has been in moderate request and quoted weaker in price. Bankers' sixty day bills on London closed on Wednesday at $4 85@$4 85½; sight bills on London at $4 87@$4 87¾ to the £ stering. The week's imports of Dry Goods and general merchandise were to the specie value of $3,977,512 as against $8,220,740 the corresponding week of 1877. The week's import entries of Foreign Merchandise at New York included $720,932 of Dry Goods, and $3,256,580 of General Merchandise. The week's exports of Domestic Produce and Miscellaneous Goods from this port were to the aggregate value of $7,107,529 against $4,439,242 same week in 1877; and since Jan. 1 have been $171,397,075 against $133,945,538 same time last year.

Metals have been in generally limited demand with values quoted weak. Iron has been slow of sale. Eglinton Pig Iron quoted at $21 50@$22; Glengarnock $23; Coltness $24; No. 1 American Pig at $16 50@$17 50; No. 2 do. at $15 50@$16 50. Forge $15@$15 50. New Iron Rails at works $33@$37. Old Rails $18@$18 50. Wrought Scrap $20@$21. Steel Rails, on the basis of $44@$45. Ingot Copper 16¼. Domestic Pig Lead 3½cts.

A fairly active movement has been reported in the leading kinds of Domestic Produce but at generally easier prices. Export dealings have been less extensive. Breadstuffs closed as a rule weaker, Provisions heavy. Cotton has been in slack request for prompt delivery, mainly for spinning purposes, at slightly reduced figures. Low Middling left off at 11 1-16@11 3-16; Middling at 11 7-16@11 9-16. And in the way of options, a restricted business has been noted, with prices at the close quoted 11.60c. for July, 11.58c. for August, 11.26c. for September, 11.10c. for October, 10.96c. for November, 11.10c. for December. Stock in New York, 113,200 bales. Stock at the ports consolidated, 173,160 bales. Naval Stores and Petroleum have been in less request and quoted cheaper. Refined Petroleum for early delivery closed here at 11. Foreign merchandise has been in light demand with values, in several instances, showing some depression.

Business in Ocean freights has been steady and active though closing weaker. For Liverpool steamer rates for Grain were 7½@8d.; Flour, 2s. 9d.; Provisions, 32s. 6d. Measurement Goods at 20s.@23s. 9d. per ton; and Cotton, ½d. per lb.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE GRAND CENTRAL DEPOT
NEW YORK, June 28, 1878.

THE DIRECTORS OF THIS COMPANY have this day declared a dividend of ONE Per Cent. upon the capital stock, payable on the first day of August next at the office of the company in Grand Central Depot.

THE TRANSFER BOOKS will be closed at 3 o'clock P. M. on Friday, the fifth day of July next, and will be re-opened on the morning of Monday, the fifth day of August next.

E. D. WORCESTER, Treasurer.

OFFICE OF HUKILL GOLD AND SILVER MINING CO., No. 17 BROAD-ST.
NEW-YORK, July 1, 1878.

THE SIXTEENTH REGULAR MONTHLY DIVIDEND OF ONE PER CENT on its capital stock will be paid at the office of the company, as above, on and after Monday, July 10. The books will close on the 4th, and reopen on the 13th instant.

S. V. WHITE, Treasurer.

☞ A further issue of $5,000,000 bonds of the New York Elevated Railroad Company, making $7,000,000 in all, have been admitted by the New York Stock Exchange. The bonds are $1,000 each, numbered from 1 to 7,000. After July 6 there will also be admitted to the list 35 000 shares of stock, in addition to 15,000 already there, making total stock $5,000,000, in $100 shares.

Sales of Railroad Property in 1878.

Under the head of Foreclosure Sales of Railroad Property, to be found elsewhere in our columns this week, are a mass of facts and information which deserves more than a casual notice from the reader. It shows plainly how the financial depression has affected railroad interests This list of sales, etc., has been carefully prepare from authentic sources and is as accurate and complete as possible.

It appears that twenty-six railroads in all wer sold under the hammer in the last six month ending July 1. The value of the property sold was very great in the aggregate; and included some of the most important roads in the country.

In addition, nine other roads advertised to be sold had the date of sale postponed definitely or indefinitely; while four more railroads are advertised for sale at near future dates. To the list given elsewhere may now be added the St. Louis Tunnel and Railroad, sold on the 2d July under foreclosure of a mortgage of 1873. The property was bid in by Charles E. Tracey for the bondholders. Amount paid, $450,000.

Delaware Division Canal.

The holders of the loans of the Delaware Division Canal Company propose to extend its bond s for twenty years from July 1, 1878. The bonded debt of the company is $800,000, and the company has no other indebtedness, but has a surplus fund of $68,000. The capital stock of the company is $1,633,350, and the company's canal is leased to the Lehigh Coal and Navigation Company for ninety-nine years from April 1st, 1866, at an annual rental of about $188,000. The original debt of the company, as announced in the company's circular to loan holders, was $1,200,000, but has been reduced to $800,000 by the operation of the sinking fund of $20,000 per annum required by the original mortgage. The requirements of the sinking fund for $20,000 per year will apply to the extended bonds, and will reduce the debt of the company $20,000 every year.

Cincinnati, Sandusky and Cleveland R. R.

At a special meeting of the stockholders of the Cincinnati, Sandusky and Cleveland Railroad Company, held at Sandusky, Ohio, on the 26th ult. the agreement for funding six of that company's second mortgage coupons, and a modification o the lease of the Columbus, Springfield and Cincinnati Railroad was accepted and ratified by an unanimous vote on 44,618 shares of stock; and at a special meeting of the stockholders in the latter company, held at Springfield on the 27th, the agreement for a modification of the lease of that road was ratified by an unanimous vote.

☞ The New York and New England Railroad Company have decided to pay the bonds of the Hartford, Providence and Fishkill Railroad, on Oct. 1, amounting to $2,055,000, which will enable them to take possession of the road from Providence to Waterbury.

☞ The Philadelphia and Reading Railroad Company shipped 185,500 tons of coal during the week ending Saturday, June 29th.

Foreclosure Sales of Railroad Property.

The first half of the year 1878 has been signalized by the sale of numerous railroad properties; several of them important from their intrinsic value, and the large investments affected thereby. Of these it is now our province to give a list with such details as may be necessary. The scraps here collected will be of use to the future historian of the railroads of the country:

1. PROPERTIES SOLD JAN. 1, TO JUNE 30, 1878.

The Arkansas Valley Railroad was sold at Denver, Col., May 7, 1878, and bought for account of the bondholders. Capital stock paid in $1,520,000, and gold bonds issued $1,125,000. The road was completed from Kit Carson to La Junta, 76½ miles, and would have been extended to Pueblo, 63½ miles further west; but the extension of the Atchison, Topeka and Santa Fe Railroad to that point rendered such extension needless, and the existing road a losing institution. It was leased to the Kansas Pacific. The probability now is that the tracks will be transferred to some more inviting line.

The Ashburnham Railroad was sold at Fitchburg, Mass., January 10, 1878, and purchased for $11,500 by the mortgage trustee. The road is only three miles long, and had a mortgage $12,000. The stock amounted to $100,000, one-half subscribed by the town of Ashburnham. The equipment had been sold at sheriff's sale.

The Baltimore, Philadelphia and New York Railroad was sold in May, 1878, and purchased by parties connected with the Wilmington and Northern Railroad Company for $75. The company was organized to build a line from Philadelphia to Baltimore, and was to do other great things in the way of branches and extensions. Its promises were magnificent, and resulted in a capital stock of $86,800, bonds to the amount of $350,000, and a floating debt of $66,221 57. This property was sold once before (Dec. 4, 1876,) and a new company organized Jan. 6, 1877.

The Billerica and Bedford Railroad was sold at Bedford, Mass., June 6, 1878, by the assignees in bankruptcy and bought in by B. F. Brown on account of the creditors for $9,000. The road was of 2-foot gauge, and 8.63 miles in length, extending from North Billerica to Bedford, and equipped with two engines, 4 passenger cars and 7 freight cars. It was the first road of the kind ever constructed, and is said to have cost about $60,000. The company's report to the railroad commissioners gives the stock paid in at $39,730, and debt claims at $24,000.

The Brownsville, Fort Kearney and Pacific Railroad was sold January 18, 1878, and purchased by parties said to be acting under direction of the Burlington and Missouri River Railroad Company in Nebraska. The road extends from Brownsville to Tecumseh, and is 35 miles in length and unfinished. A mortgage of $309,000 was the cause of the trouble. Somewhat over two years ago it was consolidated with the Nebraska Railroad.

The Buffalo, Corry and Pittsburg Railroad was sold April 19, 1878, to satisfy 1st mortgage for $700,000. It was bought for the bondholders for $75,000. The road extends from Corry, Pa., to Brocton, N. Y., 43.2 miles, and has been operated by the Allegheny Valley Railroad Company since 1873. It was once before (June 17, 1868,) sold in bankruptcy, and has been in litigation ever since.

The Chesapeake and Ohio Railroad was sold at Richmond, Va., April 2, and purchase for account of reconstruction committee for $2,750,000. The road extends from Richmond, Va., to Huntington, W. Va., 427.79 miles, and has several small branches—in all 6.81 miles. The purchase money is sufficient to cover all claims having priority to the bonds of the Chesapeake and Ohio Railroad Company. The re-organization recognizes every class of securities, and creates two grades (6 and 7 per cent) of preference stocks wherewith to settle for coupons overdue, etc., to the extent of $10,000,000. The stock and bond accounts of the re-organization amount to $54,000,000. The largest net earnings yet made on the road were those of 1875-'76, in which year they amounted to $356,476.

The Chicago, Clinton and Western Railroad was sold at Iowa City, Ia., March 8, 1878, to satisfy certificates of indebtedness amounting to $350,000 for $141,500 bid for certificate holders. The road is only partially finished.

The Chicago and Iowa Railroad was sold March 9, 1878, and purchased by 2d mortgage bondholders for $900,000. The road extends from Aurora, Ill., to Forreston, Ill., and is 80 miles long. The bonds are 8 per cents—1st $600,000, and 2d $1 150,000. Capital stock wiped out $1,828,000. Default on 2d mortgage coupons was made July 1, 1877. The line connects the Chicago, Burlington and Quincy with the Illinois Central Railroad.

The Chicago and Southern Railroad was sold at Chicago, April 24, 1878. The road is 20.5 miles in length, from Dolton to Chicago, and was built as an extension of the Chicago, Danville and Vincennes Railroad, which failed to pay the lease rental, and the line fell into disuse. It was purchased for $155,000 by parties said to represent the Grand Trunk (Ca.) Railway Company. The mortgage was for $320,000.

The Danville, Hazleton and Wilkesbarre Railroad was sold at Bloomsburg, Pa., March 20, 1878, and purchased for account of Bondholders for $400,000. Capital stock, $658,500; funded debt—1st mortgage 7 per cents $1,400,000, and 2d mortgage 7 per cents $47,000; and floating debt $187,000. The road extends from Sunbury to Tombicken, 43.44 miles, and is operated by the Pennsylvania Railroad Company. The company was re-organized (May 1, 1878,) under the name of the Sunbury, Hazleton and Wilkesbarre Railroad.

The Erie Railway was sold at New York April 24, 1878, and purchased by re-construction trustees. The property was bought for $6,000,000, for account of the security-holders joining in the re-construction scheme. The company was re-organized under the title of the New York, Lake Erie and Western Railroad Company, the necessary articles having been filed April 26, 1878. The property was transferred to the new company June 1, 1878. The road is having a third rail laid from Waverly to New York, the line from Waverly west to Buffalo already having such a contrivance.

The Iron Mountain, Chester and Eastern Railroad was sold at Springfield, Illinois, February 28, 1878, for $50,000. The road extends from Chester, Ill., to Tamaroa, Ill., 40.7 miles, with a coal branch of 1.3 miles. Capital account at latest date—stock, $1,000,000; bonds, 7s, gold, $660,000, and floating debt $194,600. It is now the Wabash, Chester and Tamaroa Railroad.

The Lake Erie, Alliance and Wheeling Railroad was sold at Alliance, Ohio, May 11, 1878, and bought for account of the Cleveland Rolling Mill Company, for $36,000. This is a 3 foot road, in course of construction, and completed from Alliance, north to Braceville 19.3 miles. It was opened May 1, 1877. Paid up stock, $221,080; 7 per cent bonds $10,000, and floating debt $128,887 09. These figures refer to June 30, 1877.

The Michigan Lake Shore Railroad was sold at Allegan, Mich., June 19, 1878, under a decree of the United States Court, to satisfy the mortgage of bondholders. Converse, of Boston, and Wade, of Cleveland, representing the bondholders, bid in the road at $165,000. All but $5,000 of this sum will be required to pay the receiver's certificates for rolling stock. The purchasers represent a pool of 819 bonds out of a total of 880. It is understood that a new company will be formed, and the line of road extended to Battle Creek, and steamboat connection made at Grand Haven.

The New Orleans, Mobile and Texas (W. Div.) Railroad was sold at New Orleans, May 31, 1878, and bought in on account of bondholders for $350,000. The property consisted of 63 miles of completed road, 60 miles of graded road and the right of way thence to the Texas Line. Only the completed road, however, was sold; the remainder having been excepted from sale on petition of Morgan's Louisiana and Texas Company; said company having begun proceedings to condemn the unfinished line for their own use. This property was once before (1874) sold and bought in by the Mortgage Trustee; but no re-organization of the company was effected. The sale is absolute and without encumbrance.

The Ohio Central Railroad was sold at Bucyrus, Ohio, March 26, 1878, and purchased for account of bondholders for $107,000. This road, formerly the Atlantic and Lake Erie, is completed from Moxahala, to New Lexington, 9 miles, and from Bremen to Newark, 27 miles, the two sections being connected by the Cincinnati and Muskingum Valley line. Floating debt large and bonds unsalable. Stock ($1,122,430) wiped out.

The Pensacola and Louisville Railroad was sold at Pensacola, Fla., May 6, 1878—the road for $50,000 and the lands separately from 10 to 25 cents per acre. The mortgage was for $600,000, of which $585,000 were outstanding. The road extends from Pensacola to the Alabama Line, 45 miles. This sale completes the transfer to and fixes the ownership of the property in the Pensacola Company, which succeeded the Pensacola and Louisville Company by purchase in April 1877.

The Port Royal Railroad was sold at Port Royal, S. C., June 6, 1878, to satisfy 1st mortgage for $2,500,000, and bought in by Union Trust Company, Trustees, for account of bondholders for $500,000. The road extends from Port Royal, S. C., to Augusta, Ga., 112 miles, with sidings, etc., 6 miles, and an equipment consisting of

engines, 6 passenger, 4 baggage, and 160 freight cars. The latest returns showed capital stock paid in $3,000,000, and 1st mortgage 7 per cent gold bonds sold $1,800,000, and a large floating debt. Reorganized June 2, 1878, as the Port Royal and Augusta, with a capital of $750,000; 1st mortgage 6s, $250,000, and income bonds 6s, $1,500,000—total stock and bonds $2,500,000.

The South Mountain Railroad was sold at Lebanon, Pa., at Sheriff's sale June 4, 1878. No track is laid, but a considerable amount of work has been done between Harrisburg and Hamburgh. The projected line extends to the Delaware River whence it will be extended by the South Mountain and Boston Company to the Poughkeepsie Bridge. The sale was subject to a first mortgage for $1,000,000, and the property and franchises bought in by the attorney for the bondholders, who are about to proceed in foreclosure.

The Springfield and Northwestern Railroad was sold at Springfield, Ill., February 23, 1878, for $100,000. All bondholders to share in the reconstruction who will pay their share of the expenses. The road is completed from Springfield to Havana. It cost $180,000 in stock and $1,000,000 in bonds.

The Utah Northern Railroad was sold at Salt Lake, Utah Ter., April 3, 1878. The road is of 3-foot gauge, and at date of sale was completed from Ogden to the Montana line, 80 miles. It is now being extended into Montana Territory. It was purchased in the interest of the Union Pacific for $100,000, and has since been re-organized

The Utica, Ithaca and Elmira Railroad was sold at New York, April 30, 1878, for $50,000. The road extends from Elmira to Cortland, 72 miles, and was built at a cost of $3,200,000. Capital stock $1,589,800; 7 per cent gold bonds $1,500,000, and floating debt $250,000. It is essentially a coal road. The sale was a compromise, and the company has been re-organized as the Utica, Ithaca and Elmira Railway Company, with a capital of $2,000,000, and no bonds. The old bondholders resided chiefly in England.

The West Wisconsin Railroad was sold at Madison, Wis., March 1, 1878, and purchased for account of the bondholders. The road extends from Elroy to Hudson, 177½ miles. The bonded indebtedness was $5,583,000. The company has been re-organized on the basis of an issue of $3,000,000 1st mortgage bonds on all property except lands, and $2,700,000, 2d or land mortgage bonds. The new company takes the name of Chicago, Milwaukee and Minnesota. The property was transferred April 30, 1878.

The White Water Valley Railroad was sold at Connersville, Ind., May 2, 1878, and purchased for account of the bondholders. The line extends from Hagerstown, Ind., to Harrison, 63 miles, and is equipped with 7 engines, 6 passenger, 4 baggage, etc., and 160 freight cars. Capital stock $380,025; 8 per cent bonds $1,021,840, and floating debt $203,879 57. A new company called the Whitewater Railway Company has been organized, and the road will be operated in connection with the Fort Wayne, Muncie and Cincinnati Railroad.

The Wilmington and Reading Railroad was sold at Philadelphia January 29, 1878. The property sold consisted of a branch from Birdsboro', Pa., to Poplar Neck, near Reading, Pa., and the interest of the W. & R. Company to a lease made in 1874 by the Berks County Railroad Company to the said W. & R. Company. The amount of the sale was $6,000, subject to the existing mortgage. The main line was sold two years ago and reorganized as the Wilmington and Northern, to which it is probable the branch purchased as above will be transferred.

The Wyandotte, Kansas City and Northwestern Railroad was sold at Kansas City, Mo., January 22, 1878. The road is of the 3-ft. gauge and runs from Kansas City to Lexington, Mo., 42 miles. The purchasers re-organized as the Kansas City and Eastern, and intend to continue the line eastward to Booneville, Mo.

2.—PROPERTIES ADVERTISED, BUT SALES POSTPONED, ETC.

The Cherokee Railroad was advertised to be sold at Carterville, Ga., May 7, 1878. No further information.

The Chicago and Illinois River Railroad was advertised to be sold May 31, 1878. Indefinitely postponed.

The Columbus and Gallipolis Railroad was advertised to be sold at Columbus, Ohio, May 30, 1878. The order of sale was, however, set aside by the court in order that some plan might be agreed upon which would protect the minor creditors.

The Leavenworth, Lawrence and Galveston Railroad was advertised to be sold June 5, 1878. Sale postponed to July 10.

The New York and Hackensack (now New York and New Jersey) Railroad was advertised to be sold May 29, 1878. No further information.

The New Jersey Southern Railroad was advertised for sale May 24, 1878. Indefinitely postponed.

The New Jersey West Line Railroad was advertised to be sold June 29, 1878. No further information.

The New York and Oswego Midland Railroad was advertised to be sold March 15, 1878. No bidder at reserve price ($2,500,000) and indefinitely postponed.

The Southern Maryland Railroad was advertised to be sold at Washington, D. C., June 5, 1878. Sale indefinitely postponed.

3.—FUTURE SALES ADVERTISED.

Alexandria and Fredericksburg.—At Alexandria, Va., July 1. Pending litigation may postpone such sale.

Leavenworth, Lawrence and Galveston.—At Kansas City, Mo., July 10.

Mobile and Ohio.—At Mobile, Ala., August 19, 1878.

Paris and Danville.—At Danville, Ill., July 10.

Selma, Marion and Memphis.—At Marion, Ala., July 8.

☞ The First Mortgage Bonds, of all numbers, from 2,560 down, of the Louisiana and Missouri River Railroad company are admitted by the Stock Exchange as good delivery, and the Guaranteed Preferred stock, into which these bonds are convertible, and into which $271,000 have been converted, is placed on the free list. There are but $1,854,000 of the bonds now outstanding, as, in addition to conversions, $485,000 have been redeemed and cancelled. The road is under lease to the Chicago and Alton Railroad Company.

The Coal Trade.

For the week ending June 22, the total anthracite production, as reported by the several carrying companies, amounted to 402 034 tons, against 427,370 tons in corresponding week last year, a decrease of 25,336 tons. The total amount of anthracite mined for the coal year is 6,467,744 tons, against 8,788,813 tons for same period last year, a decrease of 2,641,069 tons. The quantity of bituminous coal sent to market for the week amounted to 75,003 tons, against 74,261 tons in corresponding week last year, an increase of 742 tons. The total amount of bituminous mined for the year is 1,348,114 tons, against 1,450,804 tons for corresponding period last year, a decrease of 102,690 tons. The total tonnage of all kinds of coal for the week is 447,037 tons, against 501,631 tons in corresponding week last year, a decrease of 24,594 tons. The total tonnage of all kinds of coal for the coal year is 7,795,858 tons, against 10,239,617 to same date last year, a decrease of 2,443,759 tons. The receipts at Perth Amboy for the week ending last Saturday, June 29, were 7,200 tons, the shipments 15,000 tons, leaving a stock on hand of 30,000 tons, against 128,000 tons at same date last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of June was 96,401 tons, of which 74,109 tons were coal, and 22,292 tons coke. The total carried for the year is 2,188,021 tons, of which 1,705,664 tons were coal and 482,357 tons coke. These figures embrace all the coal carried over the road, east and west. The Reading Railroad carried 61,000 tons of coal last week to Port Richmond, whilst 59,000 tons were shipped thence, leaving the stock on hand at Port Richmond last Saturday about 141,000 tons.—*Phila. Ledger, July* 1.

WHO WANTS MACHINERY!

We have for sale the *Largest and Most Varied Assortment* of Machinery, both NEW and SECOND-HAND, to be found in the hands of any firm in the United States, and we offer at prices far below the market value. Send stamps for our No. 17 PRINTED LIST, fully describing over 1,200 machines with price affixed to each, comprising from one to a dozen machines of each of the following articles, with many others not named.

Anvils	Clothespin Machinery	Hay Presses	Planers, Iron
Ax Handle Lathes	Dovetailers	Horse Powers	Planers, Wood
Bellows	Drop Presses	Hub Machinery	Portable Mills
Belting	Drill Presses	Hoisting Engines	Power Hammers
Blowers	Daniels Planers	Hydraulic Presses	Portable Engines
Brushers	Door Machinery	Irregular Moulders	Printers' Machinery
Band Saws	Edgers	Jacks	Pipe, steam & water
Buzz Saws	Elevators	Jig Saws	Planers & Matchers
Bolt Cutters	Extractors	Jack Screws	Portable Grist Mills
Bolt Machines	Emery Wheels	Looms	Rolls
Bobbin Lathes	Engines, 1 to 300 h p	Lathes, Iron	Re-Saws
Boring Machines	Excelsior Machines	Lath Machinery	Radial Drills
Boiler Feed Pumps	Fans	Lathes, Wood Turning	Rivet Machines
Boilers, 1 to 100 h p	Forges	Leather Belts, 2 to 24 i	Ring Spin'ing Frames
Box Board Matchers	Fire Pumps	Matchers	Rubber Belt'g, 2 to 24i
Blind Slat Crimpers	Foot Lathes	Mortisers	Saws
Blind Slat Tenoners	Fire Engines	Mill Spindles	Scales
Box Board Machinery	Friction Clutches	Milling Machines	Shears
Cards	Gearing	Moulding Machines	Saw Mills
Chucks	Grist Mills	Nut Tappers	Saw Arbors
Cupolas	Governors	Nut Machinery	Surfacers
Crushers	Gear Cutters	Pumps	Swing Saws
Cob Crackers	Gauge Lathes	Punches	Steam Pumps
Circular Saws	Grindstones	Pickers	Steam Yachts
Cotton Machinery	Gray & Woods' Plan'r	Pulleys	Steam Gauges
Circular Saw Mills	Hose	Pulp Pumps	Spoke Lathes
Clapboard Machines	Heaters	Power Presses	Steam Hammers

Shingle Mills, Skein Winders, Sash Machinery, Splining Machines, Stationary Engines, Tenoners, Trip Hammers, Upright Engines, Upright Boilers, Vises, Veneer Saws, Victor Lathes, Variety Moulders, Whistles, Wire Rope, Water Wheels, Woolen Machinery, Yachts.

No matter what machine or machines you are in want of, do not purchase until you send for and read one of our LISTS, and see the prices at which we sell. *State fully just what you want.* Address:

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further precedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

American Railroad Journal.

New York, Saturday, July 13, 1878.

Financial Blundering.

For nearly half a century the JOURNAL has been an encyclopædia of railroad finance. The financiers and constructors of our early railroads have almost without exception passed away. Their very names, together with the names of the corporations they managed or mismanaged, long ago dropped out of public notice. New men, new enterprises and new regions have come rapidly forward to fill vacancies and to absorb idle capital and lagging interest. And in all this change few points of real value in financiering have been mastered by the railroad president and manager, while still fewer lessons worth remembering have been learned by the investor in railroad securities.

The history of many a railroad, if given in detail, would be as fascinating as half the fiction the booksellers offer us. The truthfulness of the story ought to convey a lesson of value. Yet, strange to say, we who see and even record the passing events, either fail to point the moral clearly, or our readers are strangely blind or forgetful.

That five hundred millions of dollars have been the losses to railroad corporations by financial blundering is not an extravagant statement. That an amount very large if not equal to the sum named has been improperly diverted from the stockholders of American railroads is also true. "The burned child dreads the fire" is an old saw, so old it ought to be true; yet it is not true in the case of railroad investments. The burned child gets burned again and again. Perhaps like the traditional eels, which we are told get used to being skinned, these people who make bad investments finally learn to enjoy their losses. If they have reached that height of human happiness they are to be admired possibly, but not to be envied. If it was true that after twenty-five years of service the master mechanic of a great railroad was not able to tell his directors what the rate per cent of wear and tear had been, how can those directors be expected to steer their corporation safely through all the financial shoals they may encounter? Lacking such necessary knowledge—and this is not an exaggeration—the wonder is that bankruptcies, foreclosures under mortgage, and assignments do not follow so fast as to overwhelm the whole list.

The investor, the stockholder, sees and feels the result of frequent blunders; but he rarely knows with whom or where the blame lies. He does not know that frequent changes of directors and management are damaging; that a want of exact and definite knowledge as to wear and tear and current expenses is like selling goods on a credit without keeping a set of books. He is always ready to believe the gentleman acting as president is competent to manage a great corporation because he has managed his private affairs successfully. These are among the most common causes of disaster to railroads and grief to stockholders. But another must be added to the list which would be wanting without it; it is that extreme readiness to enter Wall street and borrow money upon any pretext. If credit had only been dearer how many millions would have been saved to the railroad stockholders and to the country as well.

The nation owes much of its greatness and prosperity to the railroads. The debt will not and cannot be paid directly, but it need not be overlooked or forgotten. Those persons who invested their money in railroad enterprises builded better than they knew. A multitude lost all by the incompetency—a charitable word—of those intrusted with the management of it; but, great as the private loss has been, the public gain is greater. If from all the past experience—an unpleasant one—sound financial policy is to mark the future, the money lost by countless blunders will not have been wholly wasted.

Chesapeake and Ohio Railroad.

In the City Circuit Court Richmond, Va., on the 9th inst., Judge Welford entered an order directing the distribution of $159,712 10, a portion of the cash proceeds of the recent sale of the Chesapeake and Ohio Railroad, among the stockholders entitled to interest on the indebtedness of the Virginia Central Railroad Company. This was a first lien upon the property of the Chesapeake and Ohio Railroad Company when that company was originally organized. In this distribution the Court had due regard to the priority of the various classes of the Virginia Central Railroad Company's indebtedness among themselves, and also to the fact that by the coupons attached to certain of the said bonds their holders had been allowed interest thereon, while the interest upon the registered bonds had not been allowed from the date of the various semi-annual defaults. Accordingly the Court decreed that interest in full should be paid on the registered bonds and that the residue of the cash under the control of the Court applicable to the payment of the past due interest should be appropriated to overdue coupons, as far as it would go, which will be to take up and extinguish all past due coupons on the second mortgage up to and including the instalments falling due on the 1st of January, 1876. There were present in court the representatives of a very large number of all classes of the Virginia Central Railroad indebtedness, and no objection was made to the decree, especially as the money will be distributed within a very short time. The Court fixed the 22d inst. as the time beyond which

it cannot be postponed. Notice will be published at once designating the mode of application by the parties entitled to receive the amounts due.

Eastern (N. H.) Railroad.

The directors of the Eastern Railroad Company in New Hampshire, in their report submitted to the stockholders at the meeting held on the 9th inst., say:

As you were advised in the last report, the quo warranto suit against this corporation and the Eastern Railroad Company, and the equity suit auxiliary thereto, were at the June term, 1877, of the Supreme Court of New Hampshire, referred to George A. Ramsdell, Esq, of Nashua, to report the facts. After several hearings, the referee made his report at the December term. The report came into the hands of counsel at so late a day that it could not be argued at that term. Briefs have now been submitted on both sides; and the causes were, at the June term, postponed to the adjourned term, August, 1878.

During the hearings, and at other times the evidence produced before the referee, as well as the facts elicited in other ways, have been considered by your directors, and have confirmed them in their previously expressed views of the justice of your cause, and of the value of the property and franchise owned by your corporation. The road was originally built with funds furnished in large part by stockholders resident in New Hampshire; the stock always has been and still is largely held by citizens and corporations of that State; the corporation's duties to the public are exercised there. The income produced by the traffic of the road will yield a net revenue quite sufficient to produce satisfactory dividends. There is no debt; and, as regards the legal proceedings in which we are engaged, your directors still believe "that there is no reason to expect any other result than one favorable to the interests of the corporation."

At the last annual meeting the corporation voted to request of the shareholders a contribution equal to one dollar for each share of stock held by them, to provide funds for the expenses of the contest in which we are engaged. The fact that the desired contribution has been paid on more than three-fourths of the shares in the company, shows not only the confidence of the shareholders in the ultimate results of our proceedings, but that they may be relied on to furnish further contributions should they be needed during the progress of the suits.

At the last annual meeting, the by-laws of the corporation were referred to the directors for examination and revision. It was found needful to obtain certain further changes in our charter before undertaking this duty; and it is the hope of the directors that they may be able to submit, at the coming annual meeting, an act passed by the Legislature of New Hampshire at its present session, containing certain amendments they have deemed it prudent to ask to the Company's charter. The subject of the by-laws will therefore necessarily remain with the directors until another meeting.

The directors have a cash balance on hand of $3,358 84.

☞ The gross receipts of the Grand Trunk Railway Company of Canada for the month of April, 1878, were £145,272, the working expenses, £109,648, and the net profit £35,624; for the month of April, 1877, the receipts were £152,053, the expenses, £109,131, and the net profit £42,922. For the four months ending April 30, 1878, the gross receipts were £608,340, the working expenses £477,651, and the net profit £130,689; for the four months ending April 30, 1877, the receipts were £582,766, the expenses £472,567, and the net profit £110,199—showing an increase in gross receipts of £25,574, in expenses of £5,084, and in net profit of £20,490. The working expenses for 1878 include extra charges for renewals of road and engines of £14,877.

New York and New England Railroad.

It is said that the $2,055,000 with which it is proposed by this company to retire the bonds of the Hartford, Providence and Fishkill Railroad, in order that they may take possession of that road from Providence to Waterbury, has been raised from capitalists largely interested in the success of the enterprise; and that beyond this sum the company has virtually completed negotiations for funds sufficient to pay all underlying indebtedness of that road. From the report of the Legislative Committee last winter it appears that the entire debt and liabilities of the New York and New England Railroad Co. amounted to $4,016,690, and that the estimate of the Railroad Commissioners of the cost of completing the road to the Hudson river was $1,600,000. The total value of the property when completed was reckoned by the Commissioners at $12,695,475, (including, of course, the New York and New England and the Hartford, Providence and Fishkill,) with all the equipments; and the offer to the State was a first lien upon the whole property as security for the loan of the $6,000,000 asked for. The Commonwealth refused the offer, and private capital now comes forward and accepts one precisely similar. The character of the principal subscribers indicates that the New York and New England Railroad will be completed at a day not far distant.

Rotten Car Platforms.

In the Superior Court, this city, on the 5th inst., Judge Sanford rendered a decision denying a motion for a new trial, in the suit brought by Mary Grogan against the New York and Harlem Railroad Company to recover damages for injuries received while attempting to get off one of the defendant's cars. The plaintiff, being disabled, was obliged to use a crutch, and she charges that the platform was so rotten and insecure that the crutch crushed through the platform, precipitating her violently to the floor, and thus causing the injuries complained of. Judge Sanford, in his opinion, after stating that the plaintiff's motion is pressed on the rulings in the case of Weston vs. The New York Elevated Railroad Company, recently affirmed by the Court of Appeals, goes on to say that he is still of the opinion that railway passengers proceeding with ordinary care over platforms and through passages leading to and from their seats in the cars have the right to expect and assume that they may do so without risk of injury to life or limb from unsubstantial, insecure or treacherous footholds; and that carriers of such passengers for hire are responsible for something more than mere ordinary diligence in keeping their platforms in a safe and proper condition for the entrance and egress of passengers into and out of their cars. They are bound, he holds, further, to use all such reasonable precautions against injury as human sagacity and foresight can suggest. The difficulty with the present case is, that upon the evidence nothing short of superhuman provision could have discovered the insecurity of the platform through which the plaintiff's crutch penetrated when she attempted to dismount from the car. The evidence showed, without contradiction, that reasonable and proper precautions were taken by the defendants to prevent such accidents, and the platform had, in the previous experience of the defendants, been found safe and proper for the purposes ordinarily intended. He denied the motion.

California Railroad Matters.

The outlook for considerable activity in railroad building in the great Southwest during the next two years is gratifying in the extreme. The stagnation which has so long prevailed amongst railroad builders seems to have given place to a spirit of push, and considerable animation is already discernable all along the projected lines.

Last week work was ordered re-commenced on the Utah Southern road. This road is owned by the Union Pacific, and is pushing south and west to an outlet on the Pacific Ocean. It is to run south from Salt Lake City via Provo, Nephi, Fillmore and Beaver, to Callville, at the head of navigation of the Colorado river. From there the road will make for the Cajon Pass, which is the only available railroad pass through the Coast Range for nearly two hundred miles.

Before the Utah Southern will arrive within three hundred miles of the Cajon, the Southern Pacific will have its cut-off from here to the Mojave completed and running. This cut-off will save nearly ninety miles of travel between Yuma and San Francisco, and four hours in time, thus saving the company thousands of dollars monthly and cheapening both fares and freights. This route has been decided upon and work may be commenced at any time.—*Colton (Cal.) Semi-Tropic.*

Railroad Portages in Oregon.

A correspondent of the Sacramento Record-Union, writing from Salem, Oregon, under date June 12, 1878, says:

An important proposition is now pending, made by certain enterprising men to the people of the upper country, looking to the construction of additional railroad portages at the Cascades and Dalles of the Columbia river, which shall be free to all competition, and make connecting navigation independent of the Oregon Steam Navigation Company. At the Cascades, about 70 miles from Portland, there is a railroad five miles long, on the north side, and at the Dalles, 45 miles above, commences a road that runs 14 miles to Celilo, on the Oregon side. Thus, with 19 miles of road in operation, which can be built and stocked for $200,000, the Oregon Steam Navigation Company holds in its hand the control of the commerce of the whole upper country, and exacts its own charges for a vast and growing freight and passenger trade that has proved a veritable bonanza to them for twenty years past. The proposition is that the people interested raise $150,000, or give their obligations to that amount, whereupon the roads will be built and conducted in the interest of the producers of the Upper Columbia regions. It is true that the Northern Pacific Railroad is to be built on one of them, but there is mutuality of interest between that corporation and the Oregon Steam Navigation Company. The proposition to obtain extension of time, says the construction is to commence at Umatilla river, over 200 miles east of Portland, and proceed eastward, the evident intention being to make the lower river a connecting link until the main road is completed, then to continue the road to Portland. The bill before Congress requires that company to construct their railroad portages within two and three years, but that can and will be evaded, and the Oregon Steam Navigation Company monopoly be made as everlasting as possible. Within two years' time the construction of independent portages will save the people interested more than three times the cost of their construction.

Then, again the United States has commenced a canal and locks at the Cascades, which may possibly be completed in ten years' time, at the rate appropriations are made and progress made

in work—when a quarter of a century more might be requisite for the building of similar works at the Dalles. The time will come when an immense trade and the products of the vast interior will find their way to the sea unvexed by the exactions of any monopoly, or even by the ten handlings necessitated by the most convenient railroad portages. Even continuous railroad freight will be too expensive. Continuous river navigation, with locks at the different falls and rapids, is the only solution of that question, and in the meantime the people up there can easily construct new portages and railroads, and so have all the benefit free competition on the Columbia river can afford them.

Illinois Central Railroad.

The traffic on the main line in Illinois (707 miles) was in June, 1878, $406,939, against $386,905 in June, 1877—an increase of $20,034; and on the Iowa leased lines $115,020 in June, 1878, against $95,057, in June, 1877—an increase of $19,768—making the gain on the entire line for the month of June $39,797. In addition to the above the earnings on the Springfield division (as estimated) were $14,151. The total earnings of the Illinois Central Railroad were therefore $536,110 in June, 1878, against $482,162 in June, 1877—an increase of $53,948.

For the six months ending June 30, 1878, the traffic on the main line in Illinois was $2,451,671, against $2,174 750 for the six months ending June 30, 1877, an increase of $276,921; and of the Iowa leased lines $748,766 against $599,373, an increase of $149,393—making the gain on the entire line for the six months $426,314. In addition to which the earnings on the Springfield Division were $88,871. The total earnings of the Illinois Central Railroad for the past six months were therefore $3,288,808, against $2,774,123 for the corresponding period of 1877—an increase of $514,685.

The earnings of the Dubuque and Sioux City Railroad in June, 1878, were $75,873, against $58,743 in June, 1877, an increase of $16,630; and for the six months ending June 30, 1878, $486,250, against $364,752 for the six months ending June 30, 1877, an increase $121,498. These figures are included in those of the leased lines, given above.

Alabama Great Southern Railroad.

This Company, formerly known as the Alabama and Chattanooga Railroad, having recently been reorganized under a foreclosure and sale, has been registered in this country with a view to secure the permanent control and management of the line in English hands. The company has taken over the whole interest of the American Company, and has an influential Board of nine Directors. The prospectus states that "the share capital consists of £1,722,600, of which £156,600 has been issued in 'A' shares, bearing a preferential dividend of 6 per cent, the whole of which has been subscribed, and £1,566,000, which has been issued as deferred 'B' shares fully paid up, to the subscribers of the 'A' shares. The total authorized amount of First Mortgage Bonds is $1,750,000 (£350,000), and is secured by a first mortgage to the Farmers' Loan and Trust Company of New York. Of the total of $1,750,000 Bonds, $335,000 (£67,000) have been already applied in America on account of purchase money, liens, and reconstruction; $600,000 (£120,000) are held by the Farmers' Loan and Trust Company, as a deposit until the outstanding liens and claims connected with the purchase are discharged, and will be issued hereafter as and when required. The remaining $815,000 (£163,000) constitute the present issue now offered for subscription, the proceeds of which will be applied in completing the payments for purchase money, liens, and reconstruction and in improving the track, and supplying additional equipment, so as to develop the business of the road." The issue price is £180 per bond, including the first coupon. Interest payable in gold on January 1 and July 1, and the principal repayable in gold January 1, 1908. It is stated that since the purchase of the road was made, the net earnings have been steadily increasing, and are considerably in excess of the amount required to pay the interest on the whole of the bonds.—*Herapath.*

Repudiation in Vermont.

A singular case of repudiation on a small scale has just occurred in St. Albans, Vermont. The town of St. Albans once issued its bonds to aid in constructing the Missisquoi Railroad. The bonds were sold and the road built. Heretofore the interest on those bonds has been regularly voted at the annual town meeting, collected and paid.

It appearing to some of the citizens that they ought to be informed as to the management and condition of the Missisquoi Railroad, it was voted that no farther payments of interest be made until the affairs of the road had been exhibited to the town selectmen.

A correspondence between the Chairman of the Board of Selectmen and the President of the road ensued. The result was a refusal on the part of the road to recognize the town's claim to inspect the road's affairs. Whereupon the town through its Treasurer, acting under instructions from the Selectmen, declined to pay the interest due July 1.

The curious part of the transaction is the fact that the town voted a tax for the payment of the interest in dispute and the money was collected.

Dr. L'Hommedieu, of New York, who is a considerable holder of the bonds in question, with other holders are about to commence legal proceedings against the town. The holders of the bonds must of course recover. For the town, it is said that many of the leading citizens have strongly opposed the course taken by the Selectmen, and have urged prompt payment as heretofore.

The Crops in the Far West.

From a gentleman long resident in the West and connected with the grain trade we have the following report of his late personal observations:

Too much rain has fallen generally, but only the flat prairies of Illinois have suffered seriously from it. The corn crop of central and northern Illinois has been "drowned out" to a large extent. The rains have also interfered with the wheat harvest; by this fall wheat only is meant Southern Illinois has secured in fair condition a rather better than average wheat crop. Oats, rye, barley, and grass are all fair—rather above the average.

In Missouri the prairies are more rolling, and the damage from too much rain is slight and confined to flat bottom-lands. Corn is breast-high and uniformly good. Other small grains and grass fair. Hemp and tobacco whenever noticed looked well and promising.

Along the line of the Kansas Pacific Railroad as far west as the Smoky Hill Valley, crops, especially corn, were unusually fine. The same may be said of the entire State of Kansas. On the line of the Atchison, Topeka and Santa Fe Railroad a large amount of new land has been put under cultivation this season by emigrants. The "sod-corn" of those new settlers was well advanced and vigorous. Many of them would raise enough corn for bread and fodder until another harvest.

In general it may be said of the three States, Illinois, Missouri and Kansas, that the wheat crop is everywhere a good one in quantity and quality. In Illinois alone corn will fall short of the average. In Missouri and Kansas corn will rise considerably above the average so far as may be judged at this early date. An excess of either wet or dry weather up to the 1st September will seriously effect the corn crop in all the States named.

Ohio Central Railroad.

A correspondent of the Shawnee, Ohio, Journal, writing from New Lexington, says it is reported that work will be resumed on the Ohio Central Railroad within a short time, and then adds:

Messrs. Perkins, Livingston, Post & Co., of New York, have taken a contract to finish it from Chauncy to Bucyrus. When completed, this road will furnish direct connection to Columbus, Newark and Cleveland from this place, and open up the Sunday Creek coal fields. It will be a great advantage to the people of Perry county. The opening up of the coal fields will also add largely to the permanent population of the county. This road was commenced eight or nine years ago, and would have been finished then had it not been for the hardness of the times. Its speedy completion will be hailed with delight by all classes of citizens.

☞ A National Narrow Gauge Railway Convention has been called to meet in the Grand Opera House in Cincinnati on the 17th of July. The questions to be considered will embrace everything relative to the construction and operation of narrow gauge lines and a comparison with the standard gauge lines in economy and practical efficiency. The Executive Committee invite the attendance of all officers of narrow gauge roads, built or projected, car builders, manufacturers of rails, locomotive builders and dealers in supplies, that a thorough investigation of the subject may be secured.

☞ The directors of the Metropolitan Elevated Railway Company, elected on the 8th inst., are: William R. Garrison, John Baird, William Foster, Jr.; George M. Pullman, Horace Porter, Jose F. Navarro, George J. Forrest, Williams Adams, Jr.; John P. Kennedy, Fausto Mora and C. H. Clayton. The officers, elected on the 9th inst., are: President, William R. Garrison; First Vice President, John Baird; Second Vice President, William Foster, jr.; Treasurer, John F. Body; Secretary, Charles H. Clayton. Horace Porter, Jose F. Navarro and George J. Forrest were appointed a Committee on By-Laws.

☞ The Pittsburg and Lake Erie railroad was formally opened from Youngstown to Beaver Falls, Pa., on the 3d inst. The track laying had been completed during the day. There were present Supt. Stearns, Contractor McGan, Treasurer George, Solicitor McCreery, and many others specially interested. The celebration took place at Beaver Falls.

☞ The Utah Northern Railroad has been completed to Oneida, 180 miles north of Ogden, Nebraska.

Petroleum in Utah.

A short time ago, while on a pleasure excursion in a tributary of the Spanish Fork Canon, Utah county, a bed of petroleum was discovered by some gentlemen. When first discovered it was a matter of doubt whether it was genuine, but a test has revealed that the article is real and appears to be of high quality. After sinking for about two feet the rock produced twenty to twenty-five per centum of oil, and at about eight feet it will produce perhaps all of fifty per centum. Some twelve gallons of the crude oil was taken from the rock, and specimens have been sent to San Francisco, Chicago, New York and Ohio for chemical analysis. Oil gentlemen in this city pronounce the article good, and give it as their opinion that it can be made a big success. As soon as a chemical examination is made and a result ascertained it will be made known; but it is even now claimed for it that four kinds of oil can be made from the article, and that it possesses medicinal virtues.—*Salt Lake Herald.*

Statement of the Public Debt of the United States, July 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$6,500 00

Sioux City and Pacific bonds, 1862-64	1,623,320 00	48,849 60
Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $37,896,334 50; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $28,014,890 25.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Indianapolis and St. Louis Railroad.

At Indianapolis, Ind., on the 6th inst., Thomas A. Scott and H. B. Hurlburt, Trustees of the third mortgage bonds of the Indianapolis and St. Louis Railroad Company, filed a bill in the United States Court asking a foreclosure of the mortgage, and the appointment of H. B. Hurlburt, the present President, and W. C. Quincy, of Newark, Ohio, as Receivers. They state that diminution of business on the road has caused a floating debt of $200,000, and that they are also unable to meet the July interest on said bonds. Judge Graham refused to appoint two Receivers, and the parties being unable to agree upon one, the application was laid over for further consideration.

☞ The Kendall and Eldred Narrow Gauge Railroad is now open from Eldred, on the Buffalo and Emporium Railroad, to Rexford, in the McKean county oil district. The Lock Haven Journal says that about six miles from the other end of the road have been built and the remainder will be completed in the course of a week.

☞ It now appears that the question of fact upon which the Supreme Court of Arkansas decided the $3,000,000 of levee bonds invalid was not presented to court in arguments of counsel for either side.

Philadelphia Stock Exchange.

American Railroad Journal.

Saturday, July 13, 1878.

Financial and Commercial Affairs.

At the close last week we noted a dull market. The reasons were, apparently, the national holiday accompanied by the hottest weather of the season. The holiday passed off quietly and sensibly, but the heat remained. In spite of the fact that the thermometer has ranged above the "nineties" during the whole week, business has been active at the Stock Exchange, at times even excited.

Our last quotations for Money still rule. Money is in large supply, and, with the exception of borrowers on call, (stock collaterals,) there is small demand and rates are low. Call loans are made at 2@2½ per cent. Commercial paper is scarce and in demand. Prime names are readily discounted at 3@4 per cent, but the offerings of gilt-edged paper are too limited to make reliable quotations. The accumulation of money at this point continues, and bids fair to do so during the month. The export movement in grain and breadstuffs continues largely in excess of 1877. The balance of trade remains still in our favor. The export prices of grain have now fallen to a point hardly remunerative to the producer; but the crops already harvested being large, and the prospects for the growing crops good, shipments abroad must continue even at still lower prices.

The prominent feature of the past week has been an excited and irregular market for railroad stocks. The principal transactions have been in Lake Shore and Michigan Southern and Central of New Jersey. The stocks known in the market as "Grangers," that is, grain-carrying Western

roads, were operated in to a fair extent chiefly by investors. The present business and future prospects of the last named railroads being such as to promise a fair dividend. In the coal roads of Pennsylvania there was an upward movement. At the close they were steady and strong. The reasons given for this movement in the coal roads are: an advance in the price of coal, a temporary suspension of production at the mines in order to maintain present prices, and a new field for the consumption of anthracite, the Kingdom of Italy.

Government securities have continued in good demand both at home and abroad. At the close on Wednesday the current quotations were as follows:

United States 6s, 1881, registered, 107⅛@107⅜; do. coupon, 107⅛@107¼; 5-20s, 1865, new, registered, 102⅜@102⅝; do. coupon, 102⅜@102⅝; do. 1867, registered, 105⅞@106; do. coupon, 105¾@105⅞; do. 1868, registered, 107¾@108¼; do. coupon, 107¾@108¼; ten-forties, registered, 109@109¼; do. coupon, 109@109¼; five per cents, 1881, registered, 105¾@105⅞; do. coupon, 106⅞@107; 4½ per cents, 1891, registered, 104⅜@104½; do. coupon, 104¼@104½; 4 per cents, 1907, reg., 100¼@100⅜; do. coupon, 100¼@100⅜; sixes, currency, 120⅝@120¾.

The coinage at the San Francisco Mint for the fiscal year ending 30th ult. was the largest ever turned out in a single year by this or any other mint. The totals are $41,039,000, in gold, and $13,868,000 in silver—total $54,907,000. The Carson City Mint coined $3,480,000.

At Philadelphia transactions at the Stock Exchange were reported restricted by the extreme hot weather. The clearings of the Philadelphia banks for the last week show an increase of over $4,000,000 as compared with the previous week. Money is quoted in large supply with slight demand. From Baltimore a dull money market is reported. The banks of that city, as in the case of Philadelphia, had largely increased their balances from payments of interest and dividends due July 1.

The currency balance in the Treasury was $11,285,000, including $10,000,000 fractional currency redemption fund. The coin balance was $201,868,000.

In Domestic Produce a fair business has been done in grain and provisions, but as a rule trade was slow and not quite satisfactory. Exports continue large. Cotton continued dull for spot with small sales chiefly for spinners' use. Future deliveries of Cotton at the close were, for July, 11.52@11.53; August, 11.56@11.57; September, 11.26@11.27; October, 11.09@11.10; November, 10.96@10.97; December, 10.96. The reports condensed from various Cotton Exchanges made the following exhibit: From Georgia, the general condition of the crops is good and more promising than last year. From Florida, in the Sea Island district, the crop is not forward, otherwise good. From Virginia and North Carolina the reports are rather unfavorable, but the crop is improving with better weather. From Tennessee, too much rain has injured the crops somewhat, general prospect fair. Heavy rains are said to have damaged the crop in Mississippi and Louisiana. In Alabama the prospect is good. Texas reports are favorable; a larger acreage and a better stand in forty-six counties against twenty counties reporting adversely.

The exports for the week (exclusive of specie) have been in value $5,765,521. Since the 1st of January, $170,213,611.

Silver in London was quoted at the close on Wednesday at 52⅜d. per ounce. Taking the New York price the bullion value of the new silver dollar is now $0 88.94 gold.

Foreign Exchange has been in light demand and closed dull. A slight decline since our last has occurred and we now quote as follows: Nominal rates are 4 84@4 87 for 60 day and sight bills. Actual business has been at 4 83¼@4 83½ for bankers' long, and at 4 86¼@4 86½ for sight exchange.

Gold has scarcely varied in price during the week, closing on Wednesday at 100⅛ against 100⅝ last week.

Metals have been in slight demand and prices may be quoted as unchanged with a dull market and no sales of consequence. We quote Scotch iron unchanged, Coltness, No. 1, $23 75@$24 50; Glengarnock, No. 1, $23 50@$23 75; Eglinton, No. 1, $22 50; American Pig No. 1, $17 50@$18. New Iron Rails at $33@$37; Old Rails at $18. Steel Rails at $44@45. Lead firmer at 3⅞@3¾ for domestic. Petroleum is in steady demand for refined. Cargo lots, 10⅞c.

Ocean freights remain quiet with but little change. Engagements were made to Liverpool by steam at 6⅛@7d. per bushel (60lbs.) for grain; and by sail, same port, 6¼d. per bushel. To Hull by steam for corn, 8d. per bushel; and to Glasgow by steam for corn 8d. To London by steam for measurement goods, 22s. 6d.@27s. 6d Cotton to Liverpool by steam, ¼d.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Indianapolis, Bloomington and Western Railroad.

The holders of the first mortgage bonds of the Indianapolis, Bloomington and Western Railway Company have formed a pool for the purpose of purchasing the road at the sale under the decree of foreclosure now pending. The object is to work in unison with the holders of the first mortgage bonds of the Danville, Urbana, Bloomington and Pekin Railroad, and to consolidate the two roads under the name of the "Indianapolis Bloomington and Western Railroad Company." The new organization has filed articles of association in all the counties through which the roads run, the persons selected as the first board of directors being John W. Kirk, Josiah C. Reiff, Thomas Ritch and William W. Heaton, of this city, William J. Elger, of Brooklyn, Augustus Jillson, of Poughkeepsie, Levi H. Alden and John B. Pudney, of Passaic, N. J., James Kirkbam, of Springfield, Mass., Solomon Mead and Francis Shepard, of Greenwich, Conn., John C. Short, of Danville, Ill., and Richard P. Morgan, Jr., of Bloomington, Ill.

☞ Judge Bingham, of the Court of Common Pleas, Columbus, Ohio, at the suit of Hill & McKeekny, of Chicago, contractors of the Columbus and Gallipolis Railroad, has ordered the road to be sold for the benefit of creditors. Hill & McKeekny are holders of $276,000 worth of first mortgage bonds. There is also a large floating debt. J. D. Barnett has been appointed Commissioner to sell the property after its appraisal. A date for the sale will be announced.

☞ The earnings of the Great Western Railway of Canada for the month of May, 1878, were $305,800, the expenses $254,900, and the net earnings $50,900; for the month of May, 1877, the earnings were $317,400, the expenses $254,100, and the net earnings $63,300—showing a decrease in earnings of $11,800, an increase in expenses of $800, and a decrease in net earnings of $12,400.

☞ At the annual meeting of the Portsmouth, Gt. Falls and Conway Railroad Company, held at Portsmouth, N. H., on the 9th inst., the annual report was accepted, and the following gentlemen elected directors for the ensuing year: Alfred P. Rockwell of Boston, Willard P. Phillips of Salem George E. B. Jackson of Portland, John Cumnock of Great Falls, Samuel C. Lawrence of Medford.

☞ The connection between the Sutro Tunnel and the 1,650 foot level of the Savage Mine was made at 11 p. m. on the 8th inst. A product of millions of dollars in bullion from low grade ores alone, which have hitherto been valueless on account of the expense of mining, may now be secured.

☞ The sale of the New Jersey West Line Railroad, which was to have taken place at Newark on the 29th of June, has been postponed by the Chancellor to the 27th of July.

☞ The United States Patent Office at Washington will pay $600 for the best design for the improvement of that building, handed in before the 20th of July.

☞ W. S. Thorn has been elected President and G. W. Griffiths Treasurer of the Second Avenue Railroad Company.

Machine Made Files and Rasps.

From the "Nicholson File Company," of Providence, R. I., we have received a copy of Mr. W. T. Nicholson's treatise upon files and rasps, and the modern application of machinery in the manufacture of those tools. The book has evidently been prepared with great care, and covers the whole ground from the quality of the material best suited for files on through the various conditions of manufacture and service. Every variety of file or rasp known to the mechanic or artisan is fully described and illustrated.

The peculiar value of the process of cutting files known as the "increment cut," invented by Mr. Nicholson, is clearly set forth and is both interesting and instructive to one not conversant with file manufacture. The book itself is a model of elegant typographical skill aside from its value as a reference book.

☞ The exports of treasure from San Francisco for the past six months amounted to $23,530,000; exports of merchandise for the same time, $11,650,000. The aggregate amount of bullion yielded by the Consolidated Virginia and California mines is over $100,000,000. A body of ore over 800 feet long has been exposed in New Bonanza mine. It averages $110 per ton.

☞ The bonds of the New Jersey Railroad and Transportation Company falling due August 1, 1878, will be paid at maturity on presentation at the Pennsylvania Railroad Company's New York office, or at any time before maturity with rebate of interest.

☞ The Massachusetts Board of Railroad Commissioners, as now constituted, is as follows: Charles Francis Adams, Jr., Albert D. Briggs, and Edward W. Kinsley—the latter appointed in place of Francis M. Johnson, who declined a re-appointment.

☞ The heat of the sun at Wigan, in England, lately caused the rails on the London and Northwestern Railway to twist into the form of the letter S. At one point the rails and sleepers were moved bodily more than two feet by the expansion of the metal.

☞ The Oak Street Railway of Columbus, Ohio, and the Dayton View Street Railway have been consolidated under the title of Oak Street Railway Co.

☞ The Pittsburgh, Newcastle and Lake Erie Railroad (narrow gauge) has received its first lot of steel rails which will soon be laid between Allegheny and Harmony, Butler County, Pa.

☞ Work is progressing rapidly on the extension of the Utica and Black River Railroad from Morristown to Ogdensburg. At last accounts but four miles of track remained to be laid.

☞ The Kentucky Central Railroad Company has declared a dividend of one per cent on $4,500,000 common stock, and three per cent on $500,000 preferred stock, both payable June 28, 1878.

☞ A two-span iron bridge is to be erected across Buffalo Creek at Freeport, Armstrong county, Penn.

☞ David D. Colton, of San Francisco, has been elected President of the Occidental and Oriental Steamship Company.

The imports of foreign dry goods at New York monthly, for the last three fiscal years ending with June, have been as follows:

	1875-'6.	1876-'7.	1877-'8.
July	$6,991,740	$5,092,486	$6,814,774
August.....	14,091,640	9,532,287	10,485,245
September ..	8,264,468	6,478,999	6,680,595
October	5,795,141	5,327,377	4,352,390
November ..	5,330,236	5 871,188	4,597,182
December...	3,341 244	4.174,429	3,967,622
January	8,000,537	7,822,864	7,012,106
February ...	13,228,859	11,756,301	11 438,421
March.....	9,508,934	7,881,329	7,075,648
April	6,115,507	5 226,910	5,205,458
May	3,561,175	3,833,491	3,320,953
June	3,829,485	4,338,075	3,776,637
Total...$88,058,966		$77,330,636	$74,717,031

The comparative value of each class of dry goods imported at New York for the fiscal years ending with June, were:

	1876 '7.	1877-'8.
Manufactures of wool ...$19,741,637		$19,015,920
" cotton ..	15,734,287	15,491,799
" silk.....	28,288,065	20,680,803
" flax	11,778,178	12,217,489
Miscellaneous dry goods.	6,888,469	7,311,520
Total imports.. .... .$77,330,636		$74,717,031

The imports of foreign dry goods at New York for each year since 1850, have been as follows:

1850-1	$64,613,747
1851-2	57,221,062
1852-3	79,192,518
1853-4	92 389,627
1854-5	62,918,443
1855-6	85,898,690
1856-7	92,669,088
1857-8	67,317,786
1858-9	93,549,083
1859-60	107,843,205
1860-1	83,310,345
1861-2	38,155,720
1862-3	61,968,087
1863-4	83,234,966
1864-5	49,858,939
1865-6	137,056,834
1866-7	103,407,278
1867-8	77 254,182
1868-9	92,499,846
1869-70	96,414,276
1870-1	126,128,210
1871-2	189,908,902
1872-3	125,086 691
1873-4	106,706,644
1874-5	106,501,249
1875-6	88,058,966
1876-7	77,330,636
1877-8	74,717,031

These figures represent only the foreign cost of the goods in gold, freight and duty not being included.

An English View of the American Iron Trade.

(From the London Colliery Guardian, June 21.)

The fact is not without importance that in the production of pig iron the United States now rank second among the iron making nations of the world. Thus the quantity of pig iron made in Great Britain in 1876, was 6,555,997 tons, while the production in the United States in the same year was 2,093,236 tons; in Germany, 1,862,000 tons; in France, 1,449,536 tons; in Austria, 480,000 tons; in Belgium, 440,958 tons; in Russia, 397,500 tons; and in Sweden, 339,486 tons. These may be said to be the ironmaking countries of the world, since the combined production of all other nations did not exceed 228,000 tons.

Even the bad times which have prevailed during the last three or four years in the American iron trade have not altered the fact that the Americans now rank second in regard to the production of pig. At the same time, this production has slipped back a good deal since 1872, when the American railroad interest was distinguished by a great activity. In 1860, the quantity of pig iron made in the United States was 987,559 tons. In 1870, the total had risen to 1,850,000 tons. In 1872, there was a rapid bound upward to 2,834,558 tons. In 1874, however, this total had receded to 2,689,413 tons. In 1875, it further slipped back to 2,266,581 tons; and in 1876, as we have already seen, it stood at 2,093,286 tons. Nevertheless the fact remains that the Americans now rank second among the industrial countries of the world in regard to the production of pig iron.

In steel, too, the Americans have made great progress. Thus, in 1876, they made 525,990 tons of Bessemer steel, 21,490 tons of Siemens steel, and 140,900 tons of other steel, or altogether 688,386 tons. The corresponding production of Great Britain in the same year was 700,000 tons of Bessemer steel, 130 150 tons of Siemens steel, and 140,000 tons of other steel, or altogether 975,150 tons. Thus, the Americans rank immediately after the English as makers of steel. The Germans and the French also produce a certain quantity of steel, but Germany only made 370,710 tons and France 291,750 tons in 1876.

When we consider that the times have been sadly out of joint in the United States during the last three or four years, the results we have indicated afford striking proof of the energy and determination of the American character, and of the work which it is capable of achieving. It is true that the United States Congress has endeavored to foster the growth of American metallurgical industry by every means in its power, and especially by the imposition of virtually prohibitive import duties. Still, if it were not for the indefatigable industry of the Americans, and the zeal and ardor with which they apply themselves to the pursuit of the almighty dollar, we fancy that any legislative scheme which might be matured by the collective wisdom of Congress would not amount to very much.

One reason why Great Britain ranks first as the chief iron-making country of the world, is that her people have more patient industry and more enduring perseverance than is probably exhibited by the inhabitants of any other country; and the Americans, being an offshoot of the Anglo Saxon race, and having, moreover, the precious advantage of great natural resources, have soon contrived to work themselves into the second place as producers of iron.

The Americans have made a show of late of displacing metallurgic British products upon the chief markets of the world and especially upon

the markets of the West Indies, South America and the English colonies in Australasia; but we do not think that American efforts in these directions have amounted to very much hitherto. It is never wise to underrate a competitor; still the fact remains that we have been sending large quantities of our railway iron this year to South America and the Antipodes, and perhaps even larger quantities than before.

After all, we fancy that the great market for North American iron will be found to be North America itself; and it is no very great hardship for American ironmasters that this should be the case, since North America is almost a world in itself. If the reckless demagogues who are dignified with the name of politicians, are not suffered to bring about internal disturbances, and if the Americans resolutely and heartily pull together, there would appear to be better times in store for the Great Republic—better times which will ensure increased prosperity to the American iron trade.

United States Treasury.

The following is a comparison of the condition of the Treasury July 1, 1877, and July 1, 1878:

Balances.	1877.	1878.
Currency	$7,980,274 11	$2,658,479 09
Special fund for the redemption of fractional currency	7,963,213 00	10,000,000 00
Special deposit of legal tenders for redemption of certificates of deposit.....	54,960,000 00	46,755,000 00
Coin	115,122,473 62	197,415,132 99
Coin and silver certificates...	41,572,600 00	45,829,600 00
Coin, less coin & silver certificates.....	73,549,873 62	151,585,532 99
Outstanding called bonds	15,865,250 00	4,845,550 00
Other outstanding coin liabilities	7,557,005 07	4,799,699 98
Outstanding legal tenders..	359,764,332 00	346,681,016 00
Outstand'g fractional currency.....	20,403,137 34	16,547,768 77
Outstanding silver coin....	33,088,813 48	39,057,083 27
Total debt, less cash in Treasury	2,060,158,223 26	2,035,786,831 82
Reduction of debt for June	3,219,119 11	.....
Increase of debt for June.....	.....	†2,149,381 18
Reduction of debt since July 1.....	*39,281,121 73	24,371,391 44
Market value of gold.....	105 25	100 62
Imports (twelve months ending May 31).	478,110,475 00	478,922,106 00
Exports (twelve months ending May 31).	661,108,444 00	728,122,144 00

*This reduction includes $9,553,800 Geneva award bonds.

†The increase of the public debt for June, 1878, is caused by the payment of $3 859,920 85 on account of deficiency appropriations.

☞ Colonel C. W. Fisher, Superintendent of the Colorado Central Railroad, is also to be the Superintendent of the Mountain Division of the Union Pacific Railroad, in addition to his present duties, with headquarters at Cheyenne.

The Coal Trade.

For the week ending June 29, the total anthracite production, as reported by the several carrying companies, amounted to 389,461 tons, against 474,073 tons in corresponding week last year, a decrease of 84,612 tons. The total amount of anthracite mined for the coal year is 6,837,205 tons, against 9,262,886 tons for same period last year, a decrease of 2,425,681 tons. The quantity of bituminous coal sent to market for the week amounted to 70,310 tons, against 68,907 tons in corresponding week last year, an increase of 1303 tons. The total amount of bituminous mined for the year is 1,418,424 tons, against 1,519,711 tons for corresponding period last year, a decrease of 101,287 tons. The total tonnage of all kinds of coal for the week is 459,771 tons, against 542,980 tons in corresponding week last year, a decrease of 83,209 tons. The total tonnage of all kinds of coal for the coal year is 8,255,629 tons, against 10,782,597 to same date last year, a decrease of 2,526,968 tons. The receipts at Perth Amboy for the week ending on Saturday, June 29, were 7,200 tons, the shipments 15,000 tons, leaving a stock on hand of 30,000 tons, against 128,000 tons at same date last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of June was 96,401 tons, of which 74,109 tons were coal, and 22,292 tons coke. The total carried for the year is 2,188,021 tons, of which 1,705,664 tons were coal and 482,357 tons coke. These figures embrace all the coal carried over the road, east and west. The Reading Railroad carried 1,250 tons of coal last week to Port Richmond, whilst 35,500 tons were shipped thence, leaving the stock on hand at Port Richmond last Saturday about 107,000 tons.—*Phila. Ledger, July 8.*

Actual Condition of the Treasury of the United States.

At the request of the Secretary of the Treasury the following statement has been prepared showing the actual condition of the Treasury of the United States on the 30th of June, 1878:

TREASURY OF THE UNITED STATES,
WASHINGTON, D. C., July 6, 1878.

SIR: In accordance with your verbal request, I have the honor to advise you that on June 30th, 1878, there were in the treasury as follows: Gold coin, $161 343,914; standard dollars, $6 887,948; gold bullion, $6 099,439; silver bullion $5,891,201—total, $180,222,502. Fund for the redemption of United States notes, (say 85 per cent of $346,618,016, outstanding in legal tenders,) $121,000,000. Coin in excess of redemption fund, $59,222,502—of which there will be required for the following payments; unmatured calls of 5-20 bonds, $28,850,000; coin certificates outstanding on that date, ($44,867,000, less $19,469,320 redeemed and in the treasury,) $24,897,680; principal of debt estimated to be due and unpaid on that date, $4,000,000; coin interest estimated to be due and unpaid on that date $4,000,000—total, $56,747,680; excess, $2,474,822.

The gold coin on hand stated above at $161,343,914, does not include redeemed gold certificates or any other coin item, but is actual gold coin.

There was also in the Treasury at that date, $7,136,529 in fractional silver coin.

Very respectfully,
JAMES GILFILLAN,
Treasury U. S.

Hon. JOHN SHERMAN, Secretary.

☞ The floating and bonded debt of the city of New Orleans together amount to $19,892,284. Deducting the water works stock held by the city, and exchangeable for bonded and floating indebtedness, reduces the total to $19,220,684. The items of floating debt, which consists of unpaid ordinances of 1873, 1874, 1875, 1876, 1877, amounting to about $885,000, will not be added to the interest bearing debt, being payable out of the revenues of those years respectively in which the ordinances were passed.

The Sutro Tunnel.

From the Virginia, Nevada, Chronicle we have the following brief review of the history of the Sutro Tunnel, which is now fast approaching completion:

Ground was broken for the Sutro Tunnel on the 19th of October, 1869. The work has, therefore, required eight years, eight months and ten days to complete. The progress was very slow at first, all drilling having been by hand; but in the Spring of 1874, experiments with a Burleigh drill having demonstrated the advantages to be derived from the use of that machine, a carriage capable of supporting six of those drills while at work was made, and on the 22d of June, 1874, four were started. The progress was now much more rapid than ever before in the history of tunneling in the world, and on Aug. 7, in the same year, two more drills were put to work. This made six altogether. From that date the average progress was over 300 feet per month up to April, 1877, when, the header having entered the broad Comstock mineral belt, the heat became so intense that two drills had to be taken off the carriage. From that day the average monthly progress did not exceed 250 feet. Work has been continued uninterruptedly from the time that ground was broken until to day, but at times only two men were at work in the tunnel. The greatest progress was in December, 1875, when the heading was advanced 417 feet, and the least in October, 1870, when it was only advanced 19 feet. The total length of the tunnel, as stated in the official chart published last September, is 20,170 feet. The tunnel being connected with the Comstock workings, the next move of Mr. Sutro will doubtless be to start north and south drifts to connect with all the mines on the lode. The work has cost nearly $4,000,000.

☞ At the recent meeting of the Master Mechanics' Association held at Niagara Falls, Mr. D. A. Hopkins, of 113 Liberty Street, this city, exhibited a self fitting journal-bearing made with an auxiliary bearing or a thin lining of lead, secured to the hard metal bearing and constituting a yielding mould into which the journal quickly imbeds and fits itself by pressure.

☞ The Rome (Georgia) Railroad Company has declared a dividend of 2½ per cent. This is the second dividend declared this year. The capital of the company is $250,000, which covers cost of road and equipment.

☞ The Minneapolis Eastern Railroad Company has been organized to build a railroad from Minneapolis to St. Paul, Minnesota, a distance of ten miles. The capital stock of the company is $1,000,000.

☞ Twelve miles of the Lake Huron and Southwestern (Michigan) Railroad have been graded from Tawas city southwest, and the rails laid four miles. This road is narrow gauge, and is intended chiefly for the carriage of lumber.

☞ The officers of the Camden, Gloucester and Mount Ephraim (N. J.) Railroad Company are: President, James P. Michellon; Secretary and Treasurer, F. P. Pfeiffer.

☞ The earnings of the Burlington, Cedar Rapids and Northern Railroad for the month of June, 1878, were $101,014, against $69,357 for the month of June, 1877—an increase of $32,326.

☞ The Sturgeon Bay ship canal was opened on the 4th inst.

☞ At the annual meeting of the Manchester and Lawrence Railroad Company held on the 31st of May, the following board of directors was elected: Ezekiel A. Straw, Nathaniel Parker, Edward A. Abbott, Benjamin F. Martin, George R Fowler, Joseph W. Smith and William A. Tower. At a subsequent meeting of the Directors, E. A. Straw was elected President; S. N. Bell, Clerk; Geo. B. Chandler, Treasurer.

☞ A Quebec dispatch of July 7th says that an immense fire is raging back of Three Rivers in a swamp. It has already destroyed a large portion of the branch of the North Shore Railroad, many miles long, only lately constructed, and not yet handed over to the Government by the contractors.

☞ The earnings of the Central Pacific Railroad for the month of June, 1878, were $1,460,000, against $1,484,232 for the month of June, 1877. For the first six months of 1878 the earnings were $7,883,368, against $7,838,705 for the first six months of 1877.

☞ The earnings of the Atchison, Topeka and Santa Fe Railroad, (telegraphed) for June, 1878, were $251,000, against $188.731 (actual) for June, 1877, an increase of $65,269. The land sales for June, 1878, were $96,526; for June, 1877, $31,187—increase, $65,896.

☞ The Acton (N. H.) Railroad is to be sold at auction to satisfy an execution in favor of John C. Moulton for $33,565 19.

☞ The Portsmouth and Dover (N. H) Railroad Co. has during the past week been paying a semi-annual dividend of 3 per cent.

☞ The branch of the Central Railroad of New Jersey has been completed to Monmouth Park.

☞ It is estimated that the Delaware Wheat crop will amount to at least one million bushels.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE GRAND CENTRAL DEPOT
NEW YORK, June 28, 1878.

THE DIRECTORS OF THIS COMPANY have this day declared a dividend of ONE Per Cent. upon the capital stock, payable on the first day of August next at the office of the company in Grand Central Depot.

THE TRANSFER BOOKS will be closed at 3 o'clock P. M. on Friday, the fifth day of July next, and will be re-opened on the morning of Monday, the fifth day of August next.

E. D. WORCESTER, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.
FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.
WHEELS and AXLES MATCHED COMPLETE.

PATENT
MINERAL WOOL.
ABSOLUTELY FIRE-PROOF,
UNDECAYING
AND THE BEST
Non-Conductor of Heat, Cold and Sound.
USED EXTENSIVELY FOR
DEADENING WALLS AND ROOFS OF
Dwellings and Ice-Houses,
LINING BOILERS, FURNACES, STEAM AND COLD WATER PIPES, ETC.
Alexander D. Elbers,
P. O. Box, 4461. 26½ BROADWAY, N. Y.

Safety Railroad Switches
WITH
MAIN TRACK UNBROKEN.
RAILROAD CROSSINGS, FROGS,
and other
ROADWAY SUPPLIES.
MANUFACTURED BY
THE WHARTON RAILROAD SWITCH CO.,
Office, 28 South 3d Street.
Works, 23d and Washington Ave.
PHILADELPHIA.

Hopkins' Patent Lead-Lined
JOURNAL BEARINGS.
USED ON NEARLY ALL THE
Leading Railroads of the United States and Canadas.
NON-HEATING,
PERFECTLY SELF-FITTING,
CHEAPER AND BETTER THAN ANY OTHERS.
D. A. HOPKINS,
Patentee and Manufacturer,
113 Liberty Street, New York.

Can I Obtain a Patent?
This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.
ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.
Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,
HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either
COAL OR WOOD BURNING;
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.
J. S. ROGERS, *Pres't.*
R. S. HUGHES, *Sec'y.* } Paterson, N. J.
WM. S. HUDSON, *Sup't.*
R. S. HUGHES, Treasurer,
44 Exchange Place, New York.

THE
PHŒNIX IRON CO.,
410 Walnut St., Philadelphia,
MANUFACTURERS OF
CURVED, STRAIGHT AND HIPPED
Wrought Iron Roof Trusses
BEAMS, GIRDERS and JOISTS,
and all kinds of Iron Framing used in the construction of iron roof buildings.
DECK BEAMS, CHANNEL, ANGLE AND T BARS
curved to template, largely used in the construction of Iron Vessels.
Patent Wrought Iron Columns,
Weldless Eye Bars,
for top and bottom chords of bridges.
Railroad Iron, Street Rails, Rail Joints and Wrought Iron Chairs.
Refined Bar, Shoeing, and every variety of Shipping Iron Made to Order.
Plans and Specifications furnished. Address
SAMUEL J. REEVES, President.

FULLER, LORD & CO.,
Machine-Forged Nuts,
BOLTS & NUTS,
WROUGHT WASHERS,
BOONTON CUT NAILS,
139 Greenwich Street,
NEW-YORK.

Jersey City Steel Works.
JAS. R. THOMPSON & CO.,
MANUFACTURERS OF
HAMMERED AND ROLLED
CAST STEEL,
OF ALL DESCRIPTIONS,
Warren Street, Jersey City, N. J.
Tool, Drill, Frog Plates and Points, Cutlery, Rake, Axe, Hoe, Machinery, Spring Wagon-Axle, Tyre, Sword, Bayonet, Rifle, and Pistol, *made to Order.*

RAILROAD IRON.

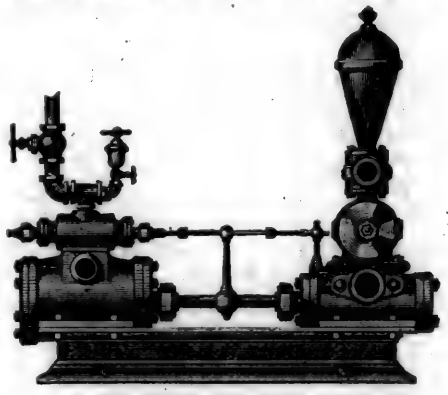
THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address



G. F. THOMAS, 549 & 551 Broadway, New York.

LENG & OGDEN,

New York, Saturday, July 20, 1878.

Summer Freights.

A convention of gentlemen understood to belong to the railroads controlled by Mr. Vanderbilt assembled at Saratoga the other day. It was claimed by the daily press that this meeting was to perfect certain pooling arrangements, and, finally, to secure more remunerative rates on eastward bound freights. This convention was still in session when we went to press last week and the result of its entire action could not then be given. The adjournment of that convention since has not revealed any action of importance, and we are as much in the dark concerning the real purpose of the gathering as before.

Summer rates are ruinously low, and there ought to be some remedy for the evil, we are told. Pools, combinations, etc., are suggested as the most feasible means of securing profits in place of losses. Let us see to what extent the railroads may safely estimate their power to advance or maintain fixed rates on summer freight, if acting in concert. It has been stated recently by a well known railroad manager that the present carrying capacity of the trunk lines is four fold greater than the freight production of the country. This statement may have been made for effect as showing the present extraordinary facilities possessed by the railroads for doing the transportation of our rapidly increasing cereal and other productions. In point of plain fact the statement is not true. If the water routes were closed today and the present volume of eastward bound freight was thrown upon the railroads, they would find themselves worked to their utmost capacity. The real competition is not between rival railroads. If this was true, as many have concluded, then a combination of interests would be a complete remedy. But the real competition is between water and land carriage.

In the contest between water and land transportation a combination of interests by either side would be effective if both stood upon the same footing. But they do not. The water carrier has present advantages which the land carrier cannot successfully compete with. A lake propeller carrying 30,000 to 60,000 bushels of grain can be sent from Chicago to Buffalo at a scarcely greater cost than a freight train of 35 cars carrying barely 12,000 bushels. Every grain shipper as well as freight agent knows this to be true; and when no special reason for fast time urges the shipper to pay higher rates by rail, the water carrier is master of the situation.

This, then, is the condition of the competition between water and land routes. The water carrier is master of the field and the railroads have no show to obtain paying rates except by agreement, not with themselves, but with the water carriers. No such combination is probable if possible.

It may be desirable for Mr. Vanderbilt to pool the earnings of railroads now under his control but lately competing with him. Any such agreement may have a material effect upon the stocks of the roads parties to the pool. That concerns Wall street chiefly. But it is beyond the power of the railroads to offer their stockholders much hope of dividends from summer freights. The close of navigation gives the trunk line manager his opportunity—let him improve it. The hope of profit from summer freights was long ago abandoned by the railroad manager. It is reserved for the bulls of Wall street to discover a mountain of wealth now and then, and the profit and its contingent dividend from summer freights is such a discovery. Interesting but without money value.

Providence, Brookfield and Tunnel R. R.

The Providence, Brookfield and Tunnel Railroad Company, with a proposed location from Southbridge, Mass., on the line of the New York and New England Railroad, through Sturbridge and Brookfield to Hardwick, on the proposed line of the Massachusetts Central Railroad, organized provisionally on the 15th inst. with Hon. George W. Johnson, of Brockfield, as President; Hon. A. J. Bartholomew, of Southbridge, as Clerk, and the following Directors: William S. Slater and James H. Howe of Webster; A. J. Bartholomew, of Southbridge; Noah D. Ladd and Emery L. Bates, of Sturbridge; Charles U. Pronty, of Spencer; George W. Johnson, Charles O. Brewster, and John E. Pronty, of Brookfield; Charles B. Pratt, George R. Spurr, and John Gilman, of Worcester.

Kings County Elevated Railway.

Articles of association for the company which is to build the rapid transit railroads in the city of Brooklyn have been adopted by the Rapid Transit Commissioners, and books for subscription to the capital stock have been opened in the Mechanics' Bank in that city. The capital stock is placed at $1,000,000, divided into 10,000 shares of $100 each. The articles provide that the name of the corporation, which is formed under an act of the Legislature passed June 18, 1875, shall be the "Kings County Elevated Railway Company," and that it shall continue for 99 years from August 1, 1878. The company have authority to increase the capital stock from time to time if necessary. The affairs of the company are to be managed by a board of nine directors. Every one subscribing for stock is obliged to pay 5 per cent of the amount of his subscription to the Treasurer of the Rapid Transit Commissioners. The latter reserve the right to select those sub-

scribers that they may consider the most responsible. No subscription shall be rejected, however, if the total amount of shares subscribed for is less than 10,000. The remaining 95 per cent of the par value of the shares is to be paid in instalments whenever the Board of Directors may make an assessment. The franchises for building railroads over all the routes laid out by the Commissioners are given to this company; but in case the railway or railways which the company undertake to construct shall not be completed within the time specified by law, or in accordance with the legal conditions, the rights and franchises acquired by said corporation shall be released and forfeited to the Supervisors of the County of Kings.

Erie Railway.

The gross earnings of the Erie Railway for the month of April, 1878, were $1,127,078 80, the expenses $891,755 09, and the net earnings $235,323 71; for the month of April, 1877, the gross earnings were $1,280,880 51, the expenses $879,016 07, and the net earnings $401,864 44—showing a decrease in gross earnings of $153,801 71, with an increase in expenses of $12,739 02, making a decrease in the net earnings of $166,540 73. The net earnings for the first seven months of the present financial year exceed those for the same period last year by $579,664 08.

Idaho Territory, 51 miles:
  Utah and Northern (3 ft.)..... 51

Adding the above together the result shows the length of additional rail laid between the 1st of January and 30th of June, 1878, to have been 870⅓ miles. This is about 200 miles more than the length of new rail in the first half of 1877. The outlook for the remainder of the year is not promising for great results—no extensive works being in hand; but the short lines in progress are numerous and the final result of the year may probably show a maximum of 2,250 miles. The narrow-gauge is leading the van in construction.

Rumford Falls and Buckfield Railroad.

The Rumford Falls and Buckfield Railroad was formally opened on the 13th inst. The train, which was in charge of Oxen Spaulding, consisted of two passenger cars, one mail, baggage and express car, and one saloon car, all made by the Patten Company of Bath, Me. The cars, which left Portland at 9 a. m., having on board a large number of prominent persons, including the officers of the road and their friends, were run to Auburn and Lewiston, then back to Mechanics Falls Junction, where the engine of the Rumford Falls and Buckfield Railroad received and took them to Buckfield and Canton. A bountiful repast was provided on board the train by the management. The stations and rolling stock of the road are all new. Regular trains commenced running on the 15th inst., and the managers propose to run two trains daily after a short time.

Pittsburgh, Cincinnati and St. Louis Railway.

The following is an approximate statement of results in the operations of the Pittsburgh, Cincinnati and St. Louis Railway Company for the six months ending June 30, 1878:

Gross earnings (including interest received on equipment hired), January 1 to July 1, 1878.....		$1,511,438
Expenses (including interest on car trust cars and rent of Monongahela extension) for same period.....		991,857
Net earnings.....		$519,580
The interest on the bonds for these six months is:		
$3 000,000 Steubenville and Indiana Railroad 6 per cent...	$90,000	
$775,000 Steubenville and Indiana Railroad 7 per cent...	27,125	
$6,222,000 Pittsburgh, Cincinnati and St. Louis Railway 7 per cent.....	217,770	
		334,895
Surplus.....		$184,685

St. Louis, Iron Mountain and Southern Railway.

This great corporation operates 676 miles of road, the main trunk line extending from St. Louis to Texarkana, a branch from Cairo to Poplar Bluff, where it intersects the main line, and another branch from Belmont, opposite Columbus, Kentucky, which forms a junction at Bismarck, 75 miles from St. Louis. The Cairo branch, as it is known, connects with the Illinois Central at Cairo, thus forming the most direct through line from Chicago to Arkansas, Texas and the southwest, and is shorter and quicker than any other route from that city. It also connects with the Cairo and Vincennes Railroad through which it takes the various lines centering at Cincinnati. The Columbus branch makes connection with the Mobile and Ohio Railway, that city being its northern terminus. At Little Rock with the Memphis and Little Rock and the Little Rock and Fort Smith Railroads, and at Malvern with the Hot Springs Railroad. By observing the map it will be found that this great artery, at its northern terminus at St. Louis, forms close connections with all of the fifteen roads centering at that point from the east, north and west, and at Texarkana with the whole system of railways extending through Texas and the southwest. It is properly named the "Texas Short Line" because it is 85 miles shorter to any point in southern and western Texas than any other line. It is also the popular and favorite route for emigration to the southwest, and while it commands an enormous through traffic, both in freight and passengers, it presents ample facilities for local transportation. The road is in splendid condition and kept so under a general management.

The equipments are all in first class order and supplied with the latest improvements to secure the safety and comfort of passengers. As this road traverses the southeast portion of Missouri and Arkansas from northeast to southwest it has practically opened up for settlement the vast and magnificent sections of country we have described. These lands are upon each side of the road and accessible. Several narrow gauge and tap line roads are proposed and in process of construction from points on the main line to more

distant counties in Arkansas, and in a few years only, that splendid domain will enjoy a system for transportation of products to market only equaled by the older eastern States.—*Texas Iron Age.*

Commercial Importance of Brazil.

A correspondent, writing from Para, under date June 18th, of the commercial importance of the Brazilian Empire, which is just now attracting so much attention in this country, says:

It may be safely asserted that to the Empire of Brazil more eyes are turned at present in the United States with a hope of profitable business than to any other point of the globe. Few Americans at this juncture care for the geographical outlines of the great Empire. Those whose business necessitates knowledge of the country of course are more or less familiar with its topography, but its splendid provinces are little known, and Amazonas, Minas-Geraes, Goyaz and Matto Grosso are only names. On the coast of Brazil alone there are forty-two seaports, the most important of which, being the largest and most sheltered, is, of course, Rio de Janeiro. Then from north to south come those of Para, Maranhao, Parahyba, Pernambuco, Maceio, Aracaju, Bahia (pronounced "By-he ya"), Ilheos, Santa Cruz, Porto Sequio, Victoria, Santos, Paranegua, Santa Catherina, Rio Grande do Sol and others. With a view to promoting the prosperity of Brazil by offering greater facilities for international relations for the encouragement of commerce and navigation on the Amazon and its affluents, as well as on the Tocantins and San Francisco, the following rivers a few years since were opened to merchant vessels of all nations: the Amazon, as far as the Brazilian frontier; the Tocantins up to Cameta; the Tapajos up to Santarem; the Madeira up to Borba; the Negro up to Manaos, and the San Francisco up to Penedo. It will be seen, then, which, indeed, is generally known in America, that every facility for business is held out by the wise liberality of Dom Pedro II. to strangers of all nations to establish commercial relations.

Atchison, Topeka and Santa Fe Railroad.

Contracts have been let for the grading of a portion of the western extension of the Atchison, Topeka and Santa Fe Railroad, extending from Canon City to South Arkansas, a distance of 57 miles. The first eight miles west of Canon City, embracing Grand Canon, was let to John Scott, of St. Louis, and the remaining 49 miles to McCarthy & Homan, of Little Rock. The work is to be completed by January 1, 1879. The contract for the grading of 113 miles of the southern extension from Willow Springs will be let on the 15th of August. The company hope to have trains running to Los Vegas by April 1, 1879.

Baltimore and Cumberland Valley Railroad.

President Hood, of the Western Maryland Railroad Company, who had been in the Cumberland Valley for some days in connection with the proposed extension of the road, returned Thursday evening. He states that they are about to contract with the Messrs. Dacy Bros., of Boston, for the construction of the first nine miles of the extended line, which is to be known as the Baltimore and Cumberland Valley railroad. This portion of the line is to run from a connection on the Western Maryand railroad to a point on the Little Antietam creek, between the line of Washington and Quincy townships, Pennsylvania, and about two miles north of Waynesboro'. The line of the proposed extension is nine miles long, over three miles being in Maryland and over five and a half miles in Pennsylvania. The necessary subscription will be completed in a day or two, and the work of constructing the road is required to begin within thirty days, and to be completed in six months.

A charter has been taken out under the laws of Pennsylvania, which requires a subscription of $2,000 a mile, ten per cent to be paid in. No more money is required to be raised than the subscription alluded to, the contractors agreeing to take first mortgage bonds for the remainder of their claim. Mr. Hood left again last night for the Cumberland Valley to perfect arrangements for the construction of the line. He believes the most feasible and certain plan is to build the proposed extension to Shippensburg in pieces. When completed to the township line, beyond Waynesboro', another section, it is stated, will be undertaken immediately.—*Balt. Sun, July 18.*

Philadelphia and Atlantic City Railway.

William Massey, of Philadelphia, through his counsel, ex-Chancellor Williamson, presented a petition to Chancellor Runyon, at Newark, N. J., on the 18th inst., praying for an injunction against the President, officers, and agents of the Philadelphia and Atlantic City Railway Company—the narrow-gauge route—restraining them from exercising their powers, and asking for the appointment of a Receiver. In his affidavit he sets forth that he owns $221,000 of bonds and that the interest due July 1 has not been paid; that he is an indorser on the extension notes of the company, amounting to $260,000; that they owe him $6,700 for hire of cars and $7,500 for money lent; that the company is indebted to other parties in the sum of $75,000, and that the corporation is wholly without means to meet its liabilities and is badly insolvent. On the 15th inst. Chancellor Runyon granted the injunction and appointed Charles R. Colwell, of Weymouth, Atlantic County, N. J., as Receiver.

Low Prices of Iron.

From the annual statistics of the iron trade and production of iron and steel some remarkable facts are apparent. The price of metals has never before been so low in this country. The decline of value since January, 1873, has been 50 per cent on the price of pig iron, 53 per cent as to refined bars, 60 per cent as to Bessemer steel rails, and 56 per cent on best iron rails. The consumption of these metals by the industries of the country has not however, declined in any similar proportion. The lowest point of depression in the business of building railroads was reached in the latter half of 1875. All the steel rails used in this country are made here, and all the iron rails except an inconsiderable fraction—less than one in three thousand. It is needless to say that times are hard in the iron business, but cheap coal and cheap iron have saved from ruin at least a hundred different industries since 1873.—*Pittsburg Commercial Gazette.*

A Spark Consumer.

The Detroit Free Press says that a citizen of that place has recently patented a machine for arresting and extinguishing sparks and cinders arising from locomotive smoke stacks, &c., and depositing them where they cease to be an annoyance. It thus describes it:

This apparatus is placed immediately in the rear of the smoke-stack and attached to it, and consists in the main of a revolving drum or wheel of about 2 feet in diameter and 30-inch face. The surface of this wheel is kept constantly wet by means of a spray pipe running horizontally along the whole width of its face and is placed directly in the line of the outflowing sparks and cinders, which, coming in contact with the wet surface, are arrested, extinguished, and carried around by the wheel, from which they are removed by a scraper, and conveyed by a pipe to the road bed, or to the furnace if desired. The amount of water used is so small that no additional reservoir need be provided. The spray pipe is supplied with water direct from the boiler, the pressure therefrom being ample, and can be regulated at will as to quantity, hot water and steam combined being the most effectual extinguishers. The entire apparatus is neat, compact, and easily attached to any locomotive at a trifling expense.

Redemption and Resumption.

We are liable to get confused in financial discussion from the similarity of sound in the words redemption and resumption. Congressmen, editors, and others who ought to know better often fail to observe the difference—an essential one.

We are led to notice this matter because at this moment our national policy is rapidly approaching a culminating point. The entire nation is directly interested in the change soon to ensue; and, as that change involves both redemption and resumption of coin in lieu of paper currency, it is natural that everything pertaining to this financial change should be discussed and well understood by all.

The Treasury must by law redeem all outstanding greenbacks upon presentation on and after Jan. 1, 1879. That is redemption.

The Secretary of the Treasury may, if he pleases, begin from and after this date to pay coin instead of paper for all government indebtedness. This is resumption.

The first is fixed by law and cannot take place legally until the date prescribed for it. The last may take place at any moment, since it is only dependent upon the will of the Secretary of the Treasury. The payment and issue of subsidiary silver coin by the Treasury is resumption. Not full and complete but partial resumption, while redemption, of course, brings complete resumption.

With this simple explanation no one need to blunder or to confuse the terms redemption and resumption.

New York and Boston Railroad.

A conveyance dated April 12, 1878, was filed in the Register's office, this city, on the 12th of July, by which the Farmers' Loan and Trust Company is released for the sum of $1 to Herman R. Baltzer and William G. Tanks, who were appointed receivers of the New York and Boston Railroad Company by the United States Courts for the Southern District of New York in June, 1875, of all their interest in the railroad. The Farmers, Loan and Trust Company as plaintiffs bought in the property of the railroad company at a foreclosure sale in 1876, and the receivers who were appointed in the action in which the "Banque France Egyptenne" was plaintiff, obtained an order from the Kings County Supreme Court on the 5th of last March directing the Farmers' Loan and Trust Company to make a conveyance to them, which was recorded as above stated.

☞ Articles of incorporation of the Wabash, Chester and Western Railroad Company—capital $250,000—were filed with the Secretary of State of Illinois on the 19th ult., by Charles B. Certein and others. The object is to build or purchase a line of railroad from Tamarora, in Perry Co., to Chester, and thence to the Iron Mountain in Missouri, and also to build a branch line from Chester to the grounds of the Southern Penitentiary. This is said to be really a reorganization of the old Iron Mountain, Chester and Eastern Railroad Co.

A Japanese Loan.

Hon. John A. Bingham, United States Minister to Japan, under date of June 5, 1878, communicates to the Department of State at Washington the regulations of the Japanese Government in relation to the new domestic loan. The bonds will be, as a general rule, issued to the bearer, and may freely pass from hand to hand by sale, except to foreigners. The bonds may also freely be deposited as a security for loans, except with foreigners, and change owners through inheritance. The amount of the loan is 12,500,000 yens. Bonds are of denominations of 500, 100, and 50 yens, with coupons; interest payable half-yearly in June and December, at the rate of 6 per cent per annum. The bonds are redeemable before A. D. 1902. A yen is equal to $1. The First National and Mitsui Banks are charged with the payment of the interest, except to foreigners.

Statement of the Public Debt of the United States, July 1, 1878.

Central Branch Union Pacific bonds, 1862-64	1,600,000 00	48,000 00
Western Pacific bonds, 1862-4	1,970,000 00	59,116 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	48,849 60
Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $37,896,234 50; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $28,014,890 25.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Erie Railway.

In the report for the month of April of Hugh J. Jewett, Receiver of the Erie Railway Company, the receipts for the month are given at $1,947,869 41, of which $204,856 89 was borrowed money, leaving the real receipts $1,701,112 52. The expenditures were $2,094,905 05, of which $375,681 20 was in payment of receiver's certificates, leaving the expenditures on account of the road $1,719,223 85, of which $15,153 42 were paid on account of coal lands, and $168,905 on account of coupon interest. There was a reduction in receiver's certificates of $129,824 81, and the balance on hand was reduced from $225,598 76 to $78,063 12.

☞ An attachment has been made of all the right, title and interest of the Eastern Railroad in the capital stock of the Portsmouth, Great Falls and Conway Railroad, at the suit of the National Bank of Commerce to recover $100,000 in damages. The suit is founded on a note of the Eastern Railroad, made November, 1878, payable in three months.

☞ The franchises of the Portsmouth, Gt. Falls and Conway Railroad, so far as they relate to taking tolls, have been attached for $20,000 in favor of the Bank of Commerce in Boston.

American Railroad Journal.

Saturday, July 20, 1878.

Financial and Commercial Affairs.

Extreme dullness has been the single prominent feature of the market since our last report. The continued and oppressive heat with the absence of many operators and the general disinclination of those remaining to deal freely has created this stagnation. The flurry which followed immediately after the 1st July has wholly subsided. And we may now look for a period of light speculative dealings and general quiet; disturbed, doubtless, now and then by a brief movement of bull or bear interests. The 1st of July, with its payments and settlements, its dividends paid or passed, having gone this reaction is natural. Any disturbance in values now for a time may be safely scrutinized and suspected of being artificial.

The Secretary of the Treasury during his recent visit to this city made public as much of his future policy of redemption as will serve to map out the probabilities and results naturally incident to that policy. It is now definitely understood that no redemption of federal paper currency can be legally attempted until the time fixed by law for it—Jan. 1, 1879. But the Secretary, having the discretion to pay any and all government indebtedness in coin whenever he thinks the interest of the government will be promoted thereby, proposed to pay out small coin, gold and silver, immediately to such extent as may be expedient. This course will undoubtedly pave and prepare the way for legal redemption of greenbacks at the date fixed by law.

There is an amount of timidity characterizing

all of the Secretary's acts which, while not affecting his honesty of purpose, do not tend to establish confidence in his ability as a financier. He certainly lacks a clear comprehensive grasp of the situation, he fails to see at once what he may do and what he may not do; in short, he is not by instinct, training and experience a financier. He may be a pretty safe man as the treasurer of the nation, but he cannot be a bold or skillful officer lacking, as he does, the essentials of courage and skill.

With gold at less than 1 per cent premium, and no demand beyond a limited one for customs; with a great and increasing balance of trade in our favor; with our bonds now held principally by our own citizens; with the certainty that all of our present stock of coin would remain at home and be swelled from abroad; still the Secretary of the Treasury did not dare to attempt resumption. Only after he was assured that there was no danger in such a course, certified to by Wall street, did he announce his purpose of resumption prior to redemption.

Payments of small gold and silver are now to be made at the Sub Treasuries and we have reached the end of suspension. Resumption has been too long delayed.

Our bonds which were returned to us by reason of our legislative tinkering in the silver question are now in better demand abroad. The peaceable settlement of the impending difficulties between England and Russia has caused a more confident market, although quotations are but slightly higher. Foreign funds have really declined since the signing of the treaty of peace, which to the uninitiated may seem strange, but the peace was discounted before it came; hence a decline instead of an advance in prices.

The Money market is still excessively dull. Call loans are made at 1@2 per cent, but the complaint is of too much money with very slight demand for it. Commercial paper is readily passed at 3@4 per cent.

Government securities are firm and in active demand. At the close on Wednesday the current quotations were as follows:

United States 6s, 1881, registered, 107⅜@107½; do. coupon, 107⅜@107½; 5-20s, 1865, new, registered, 102⅛@102¾; do. coupon, 102⅛@102⅝; do. 1867, registered, 106⅛@106¼; do. coupon, 106@106⅛; do. 1868, registered, 107¾@108; do. coupon, 108@108½; ten-forties, registered, 109¼@109⅜; do. coupon, 109⅛@109¼; five per cents, 1881, registered, 106@106¼; do. coupon, 107¼@107⅜; 4½ per cents, 1891, registered, 104½@104¾; do. coupon, 104½@104⅝; 4 per cents, 1907, reg., 100⅛@100⅜; do. coupon, 100½@100⅝; sixes, currency, 120¼@120½.

Gold has remained at 100½ nearly the whole week. Washington advices that the Secretary of the Treasury and Attorney General agreed that redemption of greenbacks prior to Jan. 1, 1879, would be illegal sent gold up ⅛ on Tuesday. At the close on Wednesday it was dull, closing at 100⅝. Silver in London is quoted unchanged at 52⅜d. per ounce. The bullion value of the silver dollar remains unchanged at $0 88.94. The exports of silver from London to the East, for the first half of this year amounted to £4,354,000, against £8,145,000 for the first half of last year. This falling off, with the steady production at the American and other mines, is a reason for the decline in price.

In Boston an easy Money market still prevails. The supply is in excess of the demand, but there is not that superabundance of money which marked the reports prior to the present week. The Stock market was strong and active with generally higher prices. Rates of discount for prime commercial paper are quoted at 3@3½ per cent.

The excessive heat at St. Louis, causing as many as forty deaths from sunstroke in a single day, demoralized business completely. An equal degree of heat has been recorded before in that city, but never before attended with any similar fatal consequences.

From Philadelphia a dull Money market is reported, and no change in quotations from our last. In the Stock market lively transactions in Philadelphia and Reading took place owing to an advance in Europe. The shares of the Pennsylvania Railroad were also in active demand caused by the understanding that the Vanderbilt conference at Saratoga had arranged a more satisfactory tariff.

From Baltimore we have a dull Money market reported. Only a moderate enquiry prevailed for stocks and bonds. The demand is chiefly for investment and for such prices are firm. Full sales are reported of Governments. Railroad stocks were slightly higher. Baltimore and Ohio common sold at 90, and that price was bid for more, and closed at 93⅛ bid and 95 asked. The scrip sold at 93 and 94. Northern Central was also quoted higher, closing at 15 bid and 20 asked against recent sales at 14½. A reference to the tabulated reports on the previous page, and the statements which follow this article, will give those interested nearly complete quotations for all stocks and bonds dealt in at the New York, Philadelphia, Boston and Baltimore Exchanges. And those stocks and bonds are not in general quoted outside of the local markets.

Cincinnati crop reports to the *Commercial* of that city cover the States of Ohio, Indiana and Kentucky. The wheat crop now being harvested shows a larger increase in acreage over any previous year. Quantity and quality are above the average. Corn, which was backward from cold weather, is now very promising from warm weather and showers.

Domestic Produce ruled lower after the close last week. The trade is now moderate in grain and flour, but prices are firmer. Cotton is quiet and without decided change. Spot cotton is slightly higher and futures are firm. Sales of spot cotton are restricted chiefly to spinners' demands. We now quote futures August delivery at 11.47@11.51; September, 11.26@11.28; October, 11.15@11.18; November, 11.01@11.04; December, 11@11.01. Total receipts of Cotton since September 1, 4,213,848 bales.

Foreign Exchange has ruled dull and prices are slightly lower. Sales at 4.83@4.86 for 60day and sight bankers' bills are quoted. Domestic Exchange rules dull.

Metals have been in very moderate demand. Sales are mostly at retail and prices favor buyers. We quote: Coltness, No. 1, $23 75@$24 50; Glengarnock, No. 1, $23 50@$23 75; Eglinton, No. 1, $22 50; American Pig, No. 1, $17@$18 50; New Iron Rails at $33@$37; Old Rails at $18; Steel Rails at $44@$45; Lead remains firm at our last quotations for domestic. Petroleum quiet, for cargo lots 10⅞c. asked.

Ocean freights are but little changed since our last. Engagements have been, to Liverpool by steam for grain, 6¾d. per 60lbs. To Glasgow by steam for grain, 7¼d. 60lbs. To other European ports rates are unchanged.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Nashville, Chattanooga and St. Louis 1st mort., 100; South Pacific 1st mort., 84; Boston, Hartford and Erie 1st mort., 29; Milwaukee and St. Paul 2d mort., 100; Central of New Jersey 1st consol., ass., 75; do. conv., 75; Lehigh and Wilkesbarre consol. ass., 52½; Missouri, Kansas and Texas R. ☞ Riehl Bros. Phila. Scale and Testing Machine Woks continue busy. They have just erected a 30ton Self-Adjusting Railroad Track Scale for the Baltimore Central R. R. at Colora Station. Among their orders for testing machines is one of 40,000lbs. capacity with 3 strains for the New Jersey Steel and Iron Co. The large Chain-Tester recenly built for the Empire Chain Works is now in opration giving great satisfaction. It is the larges in use for this purpose in the country ; capacity 300,000lbs.

☞ Trais are now running on the Fort Garland Branch of the Denver and Rio Grande Railroad to Alamosa, Col., a distance of 30 miles beyond Ft. Galand, and 222 miles from Denver. It is understod that the Ft. Garland Branch will not be extended any further at present, the company giving its attention to the line from El Moro to Santa Fe

☞ A bill has been filed in the U. S. Circuit Court by the Harlan & Hollingsworth Co., of Wilmington Del., for the foreclosure of the first mortgage on the Eastern Shore Railroad, and asking for the ppointment of a receiver. The complainants own $103,000, out of $187,250 of the bonds. The case was set down for September 4th at Baltimore.

Central Branch Union Pacific Railroad.

J. H. Beson, the well known contractor, who did about half the work on the extension of the Central Branch Railroad from Greenleaf to Concordia, and has the contract for the Beloit extension, informs us that all the grading on the Beloit extension will be finished within six days. About four miles of the track west of Concordia is laid. Mr. Beson also informs us that he has taken the contract for the grading on the Central Branch extension from Concordia to Scandia, up the Republican Valley, and will commence the work on Monday next. He states that this line has been already located. We also learn that a contract for the grading of the Central Branch line from Beloit to Cawker City, will be let in a few days.—*Atchison Champion.*

☞ At a meeting in Cincinnati on the 10th inst. of the stockholders of the Common Carrier Company, the corporation organized to operate the Cincinnati Southern Railway, it was voted unanimously to authorize an increase of their capital stock to $2,500,000, for the purpose of bidding for the contract to complete and operate the unfinished portion of the line from Somerset, Kentucky, to Chattanooga, Tennessee.

☞ In the suit of Stevenson, Smith and others, against the Texas and Pacific Railway Company, Judge Duval, acting as U. S. Circuit Judge of the Western district of Texas, has rendered a final decree, dismissing the complainants' bill, and holding that the pretended bonds of the Southern Pacific Railroad company, of which the complainants claimed to be holders, had their origin in fraud. The amount claimed was about $500,000.

☞ On petition of the stockholders and officers, Judge Harlan has rendered a decision ordering the re-sale of the Chicago and Iowa Railroad which was sold a few months since on foreclosure of mortgage, and purchased for the bondholders for $900,000.

☞ The bondholders' Trustee has given notice of an appeal from the decree of foreclosure as granted by the Circuit Court, which, it is said, will postpone the sale of the Detroit and Milwaukee Railroad until the appeal can be heard at the October term of the Michigan Supreme Court.

☞ Surveys are being made for an extension of the Minneapolis and St. Louis Railroad from Albert Lea, Minn., to Fort Dodge, Iowa, about 80 miles. If sufficient local aid is offered the construction of the road will be proceeded with at once.

☞ The Drifton Branch of the Lehigh and Susquehanna Railroad has been completed and opened for business from Drifton Junction, Luzerne county, Penn., westward through Buck Mountain, Eckley and Jeddo to Drifton, a distance of 11 miles.

☞ The track on the extension of the Hastings and Dacota Division of the Chicago, Milwaukee and St. Paul Railway is now laid to Lake Addie, Minn., 11 miles west of Glencoe, and 85 miles from Hastings.

☞ The sale of the Omaha and Northwestern Railroad by W. B. Smith, Master in Chancery, under the decree of the U. S. Court, will take place at Omaha on the 3d of September

The Sutro Tunnel.

The announcement was made last week of the opening of the connection between the Sutro Tunnel and the 1,050 foot level of the Savage Mine. The object of this remarkable engineering work is to facilitate mining operations on the Comstock lode, when the miners have reached a depth of from one thousand to two thousand three hundred feet. The expense of pumping up the water from such a depth is enormous—from $2,000,000 to $3,000,000 a year is the estimate; besides, work is difficult in an atmosphere of from 95 to 120 degrees, when the water is often at a temperature of 160 degrees. In some places miners can only handle the pick for five minutes at a time, having then to retreat to the "cooling-places" into which compressed air is introduced, so that it often takes three or four men to keep one pick going. A recent item set down the daily consumption of ice per man in some parts of these mines at ninety-six pounds. The aim of the Sutro Tunnel was to create, as it were, a new surface and a new point of departure, nearly eighteen hundred feet below the ground. To this depth the natural flow of the water will drain the mine. It is in contemplation to make the motive force of the water falling from above pump up that gathered below, the whole being discharged at the tunnel level. Further, the tunnel will ventilate the mines up through the shafts, thus enabling the men to do more work at less expense. Again, a wire rope transportation with double track will convey the ore, &c., to the surface with infinitely greater ease and less cost than it could be hoisted to the top of the shaft. Lastly, the Carson River flows near the mouth of the tunnel, and, having a considerable fall, its power will be used to compress air to be sent into all the mines to cool the atmosphere and propel machinery.

The cost of hoisting and transporting to the mills at Virginia City of the 1,500 tons of ore daily produced by the Comstock lode is placed at $4,500; the tunnel company claims that it can deliver the same ore at the mouth of the tunnel, the town of Sutro, Lyon County, Nev., at an expense of $150, thus making the new town a rival, or rather the successor, to Virginia. With these advantages, it will be possible to take out low grade ore, that now it does not pay to extract, long after the bonanzas have been exhausted.

The Sutro Tunnel Company has, under act of Congress, a right to charge $2 a ton on all ore extracted from all the mines after its completion, which, with the other sources of revenue indicated above, should secure a handsome profit for its shareholders, who further own a 5,000 acre tract at the mouth of the tunnel, where a town is to be built and works will be erected. The same act of Congress also gives them all the mines not previously owned for a distance of 2,000 feet on each side of the tunnel for seven miles in length. A dozen or more quartz lodes, some showing assays of from $2 to $20 a ton, are cut by the tunnel, but will not be worked till its main object has been accomplished.

It is now about eight years since work was begun at the mouth of the tunnel in the valley of the Carson, which stream washes the eastern base of the Washoe range. It is double tracked, straight as an arrow in its course—indeed from its extremity the faint star of light at its entrance can be seen. The rise is just sufficient for drainage; three air shafts insure ventilation. To be precise, ground was broken October 19, 1869, with limited means—indeed it was some time ere machinery was introduced to do the boring. In 1869 there were constructed 460 feet; in 1870, 1,290; in 1871, 915; in 1872, 815; in 1873, 1,919; in 1874, machine drilling having been begun, 2,680; in 1875, 3,728; in 1876, 3,670; in 1877, up to August 1, 2,134 feet. The total length of the tunnel according to the chart is 20,170 feet, or 3¾ miles and 123 yards. The cost to August 1, 1877, including all auxiliaries, was $2,830,597 23 (probably $350,000 has since been expended on the work), and it will cost $500,000 to complete the track and means of transportation, so that altogether an outlay of from $3,750,000 to $4,000,000 will have been incurred when the work is finished.

To raise the money a deed of trust or mortgage was executed in 1873 by the Sutro Tunnel Company to Robert McCalmont, of No. 15 Philpot lane, London, England, merchant, and Isaac Seligman, of 3 Angel court, Throckmorton st., London, England, merchant, as trustees, to secure the payment of principal and interest on the bonds to be issued to the amount of $8,000,000 gold or £1,600,000 sterling. The deed or mortgage conveys to McCalmont and Seligman, in trust, as joint tenants, and not as tenants in common, all the right, title and interest of the Sutro Tunnel Company in and to the tunnel, land, and other property of the company, and all rights, privileges, and franchises thereunto appertaining, until the principal and interest on the bonds are paid. The company is allowed twenty-five years, or until October 1, 1902, in which to redeem the last of the bonds, and an extension on those first falling due was recently granted to January 1, 1891.

There is a good prospect of an abundant return

for the enormous outlay. The immense deposits of silver ore in what is known as the Comstock lode, under Virginia City, Nevada, are 2,000 feet below the surface of the hills under which they lie. At rough estimate 3,000 tons of waste rock are lifted 2,000 feet daily, and the water has to be pumped into a system of cisterns 200 feet apart, at enormous labor and expense. When the Sutro tunnel is in operation the water from the mines can be run off through it, and companies who are pumping water 2,000 feet can discharge it at an elevation of 100 or 200 feet. The tunnel intersects the lode at a depth of about 1,640 feet; it will reduce the immense cost of drainage to a minimum, perfect the ventilation and stimulate the production of the mine.

From its main line branches will run out to tap all the mines, and all the companies, it is thought, will avail themselves of its aid. The flooding of mines with water, and the expense incurred and time lost in removing it, have often proved formidable, and sometimes insurmountable obstacles. The tunnel will, to a great extent, remove these or render them trifling, and for every dollar the companies pay to the tunnel they will put two into their own pockets. The ore and waste rock will be easily run out on the horizontal railroad which goes through the tunnel. It is double tracked, as straight as an arrow in its course, with a rise just sufficient for drainage.

At the mouth of the tunnel the Sutro Company have laid out a town, have secured magnificent water powers, and expect to realize largely on that part of their investment by the removal of the mining and milling operations on the vein from Virginia City to this new town of Carson. Some years ago several of the principal mining companies working the Comstock lode entered into a combination to resist the payment of royalty to the tunnel company, but about a month ago the directors of nearly all these hostile companies passed resolutions withdrawing from the combination, leaving each company free to deal with the tunnel company as it sees fit. All the mining companies, it is expected, will eventually ratify contracts with the tunnel company.

The Coal Trade.

For the week ending July 6, the total anthracite production, as reported by the several carrying companies, amounted to 150,078 tons, against 333,890 tons in corresponding week last year, a decrease of 183,812 tons. The total amount of anthracite mined for the coal year is 6,953,741 tons, against 9 570,217 tons for same period last year, a decrease of 2,616,476 tons. The quantity of bituminous coal sent to market for the week amounted to 61,549 tons, against 48,414 tons in corresponding week last year, an increase of 13,-135 tons. The total amount of bituminous mined for the year is 1,522,250 tons, against 1,424 671 tons for corresponding period last year, an increase of 97,579 tons. The total tonnage of all kinds of coal for the week is 211,627 tons, against 382,304 tons in corresponding week last year, a decrease of 170,677 tons. The total tonnage of all kinds of coal for the coal year is 8,475,991 tons, against 10,994,888 to same date last year, a decrease of 2,518,897 tons. The receipts at Perth Amboy for the week ending on Saturday, July 6th, were 13,-304 tons, the shipments 12,617 tons, leaving a stock on hand of 29,454 tons, against 131,349 tons at same date last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of July was 79,623 tons, of which 61,572 tons were coal, and 18,051 tons coke. The total carried for the year is 2,888,084 tons, of which 1,862,546 tons were coal and 525,538 tons coke.—*Phila. Ledger, July* 15.

☞ Most of the towns along the line of the Massachusetts Central Railroad have voted to place the stock held by them in the hands of a trustee, with authority to transfer three-fourths of the same to the company, provided the road is finished and in running order within two years—the idea being that as the stock is of little value now it is better to part with a portion of it in order to enhance the value of the remainder.

An Improved Car Window.

Mr. B. L. Wood of Taunton, Mass., has invented a car window which will add very much to the comfort of traveling, improving the ventilation of the cars, and giving better opportunity for viewing the country through which the traveler may be passing. It is so simple that its construction and operation can be understood at a glance, and one of the best features presented is the ease with which under any circumstances the window can be opened or closed. It consists of an iron frame that may be fastened with screws upon the ordinary window casing of any car now in use. The opening in this frame is divided perpendicularly by a light bar, against which on each side turn the edges of frames holding each a pane of glass 12 by 28 inches in size. These are hinged on iron rods, and on the side opposite the hinge are connected with a double acting ratchet lever, by which they can be locked or kept open at distances varying from a quarter of an inch to seven inches. They are easily opened or closed, and are not, like the ordinary windows, liable to be made tight or loose by the changes of the weather. It will be necessary to open but one-half of the window at a time, and an opening being made toward the rear of the train, the dust and cinders are thereby prevented from entering. A larger amount of shelf-room is afforded on the window sill, especially if a pattern which projects angularly from the side of the car be used. In its design the window is quite handsome. The joints are all so perfect that open or shut the window does not rattle, while when the window is closed it is an impossibility for any dust to enter. The Old Colony Railroad Co. will use the new windows on a large and elegant car now in process of construction. Mr. Wood's invention is covered by a patent issued March 26, 1878.

☞ The work of extending the Alabama Central Railroad from York, Alabama, to Lauderdale, Mississippi, about 15 miles, is now being prosecuted. A contract has been concluded by which the company secures for a term of years the right to use 18 miles of track of the Mobile and Ohio Railroad between Lauderdale and Meridian. The track of the Alabama and Chattanooga Railroad between York and Meridian is now used by the trains of the former company.

☞ The United States Supreme Court has just rendered an important decision in regard to the taxation of railroads. In the case of the Indianapolis and St. Louis Railroad Company vs. James L. Vance, Collector, it was decided that the assessment and intended levy were in accordance with the State law, which is the essential question in the case, and on this ground the decree was affirmed.

☞ At a meeting of the Board of Directors of the Metropolitan Elevated Railroad Company, held on the 5th inst., it was resolved to issue first mortgage bonds to the amount of $600,000 or £120,000 per mile for every mile of road belonging to the company; and on the 10th inst. an instrument mortgaging the road to the Central Trust Company to secure the payment of the bonds was recorded in the Registers' office. The bonds are of $1,000 each, in American gold coin, or £120 sterling British money payable in 1908 and interest at the rate of six per cent per annum.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 11th inst., the sixty-first call for the redemption of 5 20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 11th day of October next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 62,001 to 65,000, both inclusive; $100, Nos. 106,001 to 110,000, both inclusive; $500, Nos. 74,001 to 76 200, both inclusive; $1,000, Nos. 135,001 to 140,000, both inclusive. Total coupons, $2,500,000.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,201 to 2,250, both inclusive; $100, Nos. 17,601 to 17,850, both inclusive: $500, Nos. 10,201 to 10,450, both inclusive; $1,000, Nos. 33,701 to 34,400, both inclusive; $5,000, Nos. 9,101 to 9,250 both inclusive; $10,000, Nos. 17,101 to 17,730, both inclusive. Total registered, $2,500,000. Aggregate, $5,000,000.

☞ The extension of the Utica and Black River Railroad from Morristown to Ogdensburg having been completed, the company now have 181 miles of road, viz: from Utica to Ogdensburg, 135 miles; from Carthage to Sackett's Harbor, 30 miles; and from Clayton to Theresa, 16 miles. The new road is 10.6 miles in length, running parallel to the St. Lawrence river. At Ogdensburg, its present terminus, the river is aways open, while at Morristown it is frequently blocked by ice.

☞ The board of supervisors of Clarke county, Va., has decided to accept the proposition tendered by the representatives of the Shenandoah Valley Railroad Company, to deliver up to the county the bonds heretofore issued in aid of said railroad, and receive therefor new bonds issued by the county, which bonds shall set forth on their face the conditions upon which the subscription was originally made, to wit, the completion of the road in two years.

☞ The directors of the Springville and Sardinia Railroad Company have resolved to solicit proposals for building the road. As located, the line extends from Springville, Erie Co., N. Y., to a connection with the Buffalo, New York and Philadelphia Railroad in the town of Sardinia, and is about 13 miles in length.

☞ At meeting of the stockholders of the Saginaw Valley and St. Louis Railroad, held at East Saginaw, Mich., on the 10th inst., it was voted to extend the line to Grand Rapids, and run a branch from St. Louis to Mount Pleasant, about 91 miles in all. The capital stock was increased from $300,000 to $1,000,000.

☞ The contract for the extension west of the Pembina Branch of the Dakota Southern Railroad, about 37 miles, has been been let to Thomas M. Nelson, of Fruitport, Mich.

☞ A project is said to be under consideration by the people of Lock Haven, Penn., and its vicinity for extending the Catawissa and Williamsport branch of the Philadelphia and Reading Railroad into the bituminous coal fields of Centre and Clearfield counties. Under the pledge of certain aid to be given the project it is understood that the Philadelphia and Reading Railroad Company is willing to undertake the extension of their line as proposed.

☞ The Columbus and Gallipolis Railroad, the sale of which has been ordered at the suit of Hill & McKechnie of Chicago, is about 95 miles in length. Work was commenced in 1872, suspended in 1873, and again resumed in 1877. None of it is in a finished condition, though considerable work has been done on it.

☞ An order has been obtained from the U. S. Circuit Court for the district of South Carolina by attorneys for bondholders, returnable in September next, requiring the South Carolina Railroad Company and the Greenville and Columbia Railroad Company to show cause why they should not be placed in the hands of a receiver.

☞ The Portland and Ogdensburg Railroad Company having obtained authority from the New Hampshire Legislature to change the location of their road, will build from Fabyan to Dalton on what is known as the northern route. The distance is about 17 miles.

☞ The Government of Canada will receive proposals up to the 1st of December next, for constructing and working a line of railway, commencing near Lake Nipissing, between Ottawa river and Lake Huron, and extending about 2,000 miles to the Pacific Ocean.

☞ The capital stock of the Marietta and Shawnee Railway Company has been increased from $450,000 to $750,000.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE GRAND CENTRAL DEPOT
NEW YORK, June 28, 1878.

THE DIRECTORS OF THIS COMPANY have this day declared a dividend of ONE Per Cent. upon the capital stock, payable on the first day of August next at the office of the company in Grand Central Depot.

THE TRANSFER BOOKS will be closed at 3 o'clock P. M. on Friday, the fifth day of July next, and will be re-opened on the morning of Monday, the fifth day of August next.

E. D. WORCESTER, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stock and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable and if so, give you the necessary instructions for futher precedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaing patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERBER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reportsent 1y23*

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POTT & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

American Railroad Journal.

New York, Saturday, July 27, 1878.

National Economy.

We have some serious leaks in our national system of housekeeping which ought to be stopped. In some cases the leakage goes on because no one feels it to be his immediate duty to step forward and right the wrong; in others certain private interests would have to yield up their gains in part or entirely for the greater gain of the nation. Selfishness has always more students and followers than political economy and patriotism.

Our national debt is to-day in a more satisfactory condition than at any prior period since 1865, when the end of our war brought us to face a new enemy—debt. Very much has been done to extinguish the principal and to lessen the interest on the remainder. But there is still a leak of many millions in the interest account which can easily be stopped. Let the Treasury supply the whole paper currency for the nation instead of half and there is a direct saving of eighteen to twenty millions in interest. That is leak number one.

This is not an attack upon the National banks; on the contrary, banks are as necessary to a commercial community as warehouses and ships are. Banks of deposit and discount serve a purpose in facilitating and assisting commerce which is so well known and recognized as not to require discussion here. But banks of issue do not so serve the general good when the system is like our present one a complicated and costly one. If it is wise and proper that the Government should supply half the paper and all the coin for circulation, which represents so many millions of non-interest bearing federal debt, why not supply all the paper necessary and thereby save the interest on the present bank circulation?

Leak number two is our persistence in paying other nations for carrying our surplus to foreign markets. We have so small a fleet of American ships that for fifteen years we have paid our neighbors an average profit of twenty millions per annum for the use of their vessels. If we were too poor to own or build ships this heavy tax might be submitted to with more patience. But the opposite is true. To what better use could a portion of the idle funds in our bank vaults be put than the construction of that much needed mercantile marine? We have now ample railroad facilities. No immediate call will be made for money to construct or equip new railroad lines for inland traffic. If our neighbors can earn so many millions in our carrying trade what is there to prevent us from doing a large part of it ourselves and thereby save the money paid to them?

Another needed economy is in the care of savings belonging to the masses. For six years past the constant shrinkage in values has been most disastrous to all mercantile interests directly. Indirectly all have suffered; but the most lamentable distress of all, caused by the failure of savings banks, might have been avoided wholly or in great part. No wiser financial scheme for the good of the poor man has been devised lately than Post Office Savings Banks. The Government as a matter of political economy should prefer to pay out interest to our own citizens rather than to foreign capitalists as at present. The money remains then at home whilst the people and the government are more closely bound together. When the taxpayer is also the owner of the bond for the payment of the interest on which the tax is levied, there is no fear of repudiation or national discredit. Let the Post Office Savings bonds represent at once the national debt and the savings of the masses and national strength and the observance of law and good order are assured.

A vast sum has been lost to those who could ill afford to lose it by the mismanagement of savings banks. Other financial disturbances will bring on similar failures. The faith of the nation is a different thing from the faith of a few individuals, who too often have little or nothing at stake but their reputations. Again, if this system of governmental protection to savings has been of so great value in the national economy of a monarchy, as in Great Britain, how much more desirable would it be in a republic where the people are the government.

These are some of the larger leaks in our present management. To correct any one would be a great saving; to stop them all would reduce the interest on the national debt one-half. We have been forced to adopt private economy; why then waste in public affairs that which we have saved in private?

Freight and Passenger Engine Bells and Whistles.

A number of locomotive bells of various shapes and composition have recently been cast at the Altoona shops of the Pennsylvania Railroad Company, from which a selection will soon be made for the purpose of finally establishing a marked distinction between the sounds produced respectively by the bells of freight and passenger engines. A corresponding distinction will also probably be made in the sounds produced by locomotive whistles. The success of this undertaking will manifestly render good service by enabling railway employes and the general public to distinguish the character of an approaching train while it is still at a considerable distance, and valuable inferences may often be drawn from this information. The period is probably near at

hand when a bell of long, clear and pleasing reverberation, or other marked characteristics, will apprise all whom it may concern that a passenger train is approaching or passing, while a heavier, duller and more business-like sound will give notice of the movement of a freight train. In the bells already cast marked variations of sound have been produced by slight changes in the composition, shape or distribution of metal. One bell, containing five parts of copper to one of tin, is in the key of A, and another bell of the same composition, but with slight variations in the shape or distribution of metal, is in the key of B flat. Various other compositions and modifications have been tried, which have produced such good results that between the sounds of several of the classes there is a contrast that any ear of average power could readily distinguish.

Safety Car Runner.

A party of gentlemen, upon invitation of the American Railway Car Runner Company, recently witnessed a practical and highly satisfactory test of their "Safety Car Runner," on the Minneapolis and St. Louis Railroad, a short distance beyond the St. Paul and Pacific Junction. The runner consists of a bar of iron 4¼ inches thick, suspended from the truck outside of and underneath the oil boxes, and secured across the ends of the truck by the brake-beams. It is braced between the wheels, and so constructed as to completely encircle and bind the truck. The runner hangs about four inches out from the wheels, on either side, and about one-half inch above the trend of the wheel. It is claimed for this runner that it will hold the car to the track under any and all circumstances, and the trial certainly sustained the claim. The scene of the trial was in a sharp curve (six degrees.) An outside rail, thirty feet in length, was removed, and the car, an empty flat, was sent over the gap at the rate of fifteen miles an hour. The "Runner" did its work beautifully; the truck dropped on to the ties, but was held close to the rail, and the car stopped in a distance of thirty feet. On the second trial the car was sent over the gap at the rate of twenty-five miles an hour, and ran about one hundred and fifty feet, the "Runner" holding it close to the rail, as before, and in each instance the car was replaced upon the track, uninjured, in less than thirty seconds! Railroad men who witnessed the trial pronounce the "Safety Runner" a grand thing.—*St. Paul Pioneer.*

Narrow Gauge Railway Convention.

The Narrow Gauge Railway Convention met, according to announcement, in the Lookout Opera House, Cincinnati, on the 17th inst. About 200 persons were present at the opening, representing the narrow gauge railways in all parts of the United States, inventors of railway appliances and car builders.

The Convention was called to order at 11 A. M. by Colonel E. Hulbert, of Bedford, Ind, who stated the objects of the Convention in a brief address. Colonel N. S. Yeomen, of Washington Court House, Ohio, was made chairman, and Major John Bryne, of Cincinnati, was chosen secretary. A brief address of welcome to the delegates was made by Hon. S. F. Covington, President of the Board of Trade, after which the Convention took a recess.

The afternoon session was consumed in the formation of committees on rolling stock and machinery, on operating expenses, on construction and on resolutions. The Convention then adjourned until morning.

At the second day's session the attendance was undiminished. A large number of communications were received from delegates expected to be present but were deterred by the great heat, asking that the sessions be postponed till autumn.

A resolution was adopted calling for a National Executive committee of thirteen for the purpose of collecting and disseminating information concerning narrow gauge roads, and with power to call a subsequent convention if deemed necessary.

Several delegates then gave their experience in constructing and maintaining narrow gauge lines, the object being mutual instruction by an interchange of views.

At the afternoon session, a series of resolutions were discussed and adopted, setting forth that the practical working of narrow gauge roads during the past six years is an established fact of the feasibility of a three foot gauge, as well as safety and economy of the system; that its real advantages could not be demonstrated until they were able to reach general distributing depots, and that they should not be viewed as merely auxiliary roads.

An Executive committee of thirteen was appointed to arrange subjects for discussion at another Convention, to be held in Cincinnati during the coming autumn, which Convention will continue and perfect the work begun at this time.

After the usual vote of thanks, the Convention adjourned.

Baltimore and Delta Narrow Gauge R. R.

At a meeting of the stockholders of the Baltimore, Hampden and Towsontown Railroad Company, held in Baltimore on the 18th inst., the action of the board of directors at a meeting held one month previous authorizing the consolidation of the road with the Baltimore, Towsontown, Dulaney's Valley and Delta Narrow Gauge Railroad, was ratified.

And at a meeting of the stockholders of the latter corporation, held at Belair, in Howard Co., Md., on the 20th inst., similar favorable action was taken.

According to the contract the stockholders of the first named corporation are to receive paid-up certificates of stock in the consolidated road to the amount they have actually expended in grading their road between Towsontown and Baltimore, namely, $50,000. They surrender to the new organization their rights of way through the most valuable portion of Baltimore county, from Towsontown to within a few hundred yards of North Boundary avenue; their road-bed, masonwork, etc. Their rights and franchises, it is said, could not now be obtained for less than $100,000.

Mr. Watters President of the Baltimore, Towsontown, Dulaney's Valley and Delta Railroad, stated that the amount subscribed on the books of that company is $172,000.

The new company is to be known as "The Baltimore and Delta Narrow Gauge Railroad Company."

The following gentlemen were elected directors of the consolidated company: for York county, Foulk Jones; Harford county, Wm. H. Watters, E. S. Rogers, Stevenson Archer, Eli Tucker, James P. Streett, C. J. Moore; Baltimore county, A. W. Bradford, James L. Sutton, Phillip T. George, Wm. Gilmor; Baltimore city, Charles W. Hatter, Thomas Armstrong.

The board at once organized, and W. H. Watters, of Harford county, was elected president.

The consolidation is made pursuant to act of the last Maryland Legislature, chapter 195, approved April 1, which also authorizes the construction of a single or double track railway from Baltimore city to a point on the Pennsylvania line near Delta, and fixes the capital stock of the company at $700,000, in shares of $50 each.

The Kansas Pacific Land Grant.

Secretary Schurz rendered a decision on the 23d inst. in the pre-emption case of Nelson Dudymott which is of importance to the public and the railroads interested. The case is a plain one upon its face, and the lax construction and execution of the law bestowing land grants in general is the only apparent reason for the present decision.

The facts of the case appear to be these: By an act of Congress dating July 1, 1862, alternate sections of land on each side of the Kansas Pacific—formerly Leavenworth, Pawnee and Western—Railroad were granted for aid in the construction of the road; the conditions being that all lands not sold at the end of three years after the completion of the road should be subject to pre-emption by actual settlers at $1 25 per acre. The proceeds of such sales to be paid over to the railroad. The Railroad Company accepted the grant under those conditions. This is the more evident from the published statement of the road's land commissioner to this effect under date of May 12, 1873. He says—"The road was accepted by the government as complete about six months ago. In three years from that time the unsold lands will be subject, we suppose, to the pre emption laws, but we hope and expect to have all our lands sold before that time arrives."

The real date of completion and acceptance by the government was Oct. 19, 1872.

After the expiration of the three years allowed to the railroad in the grant for the sale of its lands, a portion appearing to be still unsold Mr. Nelson Dudymott desired to pre-empt it according to law. His application was refused by the Salina Land Office officials upon the ground that by law they were required to pay all moneys received for lands sold into the Treasury. In order to convey those moneys to the railroad a special act of Congress would be necessary.

From this decision Mr. Dudymott appealed, claiming that by the conditions of the grant all lands not sold within the limit named, three years, reverted to the government again for sale and pre-emption. Secretary Schurz has now reversed the decision of the Land Office officials, confirming the right of lawful pre-emptors to purchase at $1 25 per acre any lands granted to the Kansas Pacific Railroad Company which were unsold at the end of three years from the completion of the road.

This decision will cause the immediate pre-emption of a considerable body of land at $1 25 per acre for which the railroad has asked a much higher price. In this way the road will suffer some loss; but the Secretary's decision is in strict accordance with the terms of the grant, and consequently is just to all concerned.

☞ The Madoc (Canada) Review says that E. O. Bickford, of Toronto, Thomas Kelso, Alexander Sutherland and Alexander Brown, of Belleville, have purchased the entire interest of Mr. Pardee in the Belleville and North Hastings Rail-

way, and that it is the intention of these gentlemen to at once pay off all indebtedness and proceed with the work of completing the road.

Sale of Public Lands.

The following is a comparative statement of the number of acres of public lands disposed of in Dakota, Kansas, Minnesota and Nebraska in the fiscal years ending June 30, 1877 and 1878:

	1877.	1878.
Dakota	218,378.20	1,461,801.73
Kansas	710,700.60	2,067,179.28
Minnesota	279,847.02	1,041,203.12
Nebraska	257,407.01	620,675.99
Total	1,466,332.83	5,190,860.12

This shows an increase in 1878 in Dakota of 1,243,423.53 acres; in Kansas, 1,356,478.68 acres; in Minnesota, 761,356.10 acres; and in Nebraska 363,268.98 acres—a total increase of 3,724,527.29.

Lands are disposed of by cash purchase, by homestead settlement, for timber culture, and by warrant and scrip location—four different methods; and the records of each are preserved separately in archives of the General Land Office at Washington. For Dakota the figures are:

	1877.	1878.
Cash	20,336.62	74,940.93
Homestead	123,869.82	804,298.66
Timber culture	68,188.92	570,124.34
Warrant and scrip	5,983.04	12,346.80
Totals, as above	218,378.20	1,461,801.73

—showing an increase, as stated above, in one fiscal year, of 1,243,423.53 acres.

The above States have been selected principally because the proportion of farm and timber land is much greater than in other of the Western States. Nebraska, having 49,000,000 acres, can show only about 600,000 acres of forest land. Places that were recently covered with dense forests are now almost naked, because of the disastrous fires. This leaves the land open to settlement. Missouri, with 22,000,000 acres, has fully 9,000,000 acres of timber land. Not more than 6 per cent of the area of Kansas is in forest land, and this is mainly in the eastern part of the State and along the banks of the rivers. Efforts are being made in Kansas and Nebraska to restore the growth of trees, and in some cases good success has attended the movement. Arkansas is highly gifted in the way of forests. She has 20,000,000 acres of timber of her 33,500,000 acres, while only a tenth of Colorado is forest land.

☞ The earnings of the Hanover Junction, Hanover and Gettysburg Railroad for the year ending March 31, 1878, were $97,733 19, the expenses $43,873 34, and the net earnings $53,859 85; to which add balance in the treasury at the commencement of the year ($15,458 51)—making $69,318 27; of this $46,493 56 were expended for various purposes not connected with the working of the road—leaving a balance of $22,824 71. No dividend was declared, although earned, because it was deemed to be to the best interests of the company to devote the money to the building of the Baltimore and Hanover Railroad.

☞ The Supreme Court of Missouri has decided that the bonds of Greene county, in that State, issued and sold as a subscription to the stock of the Hannibal and St. Joseph Railroad Company to aid in the construction of the Kansas City and Memphis Railroad, are invalid. The court decides that the issue was not simply irregular but utterly unauthorized, and that the total subscription is void.

The Saratoga Agreement.

The competing interests of the Canada Southern and Great Western Railroads having been referred by Mr. Vanderbilt of the former road and Mr. Broughton of the latter to Colonel Scott of the Pennsylvania Railroad as referee, the following decision has been made public:

On through passenger business going east and west between Buffalo, Suspension Bridge and Detroit, the Great Western shall have 60 per cent and the Canada Southern 40 per cent of the amount earned. Through freight shall be divided in the proportion of 55 per cent to the Great Western and 45 per cent to the Canada Southern. This includes both freight and passengers received from the New York Central and Erie roads, as well as eastward bound traffic over either of the Canada roads.

The Canada Southern owns a line in Michigan connecting at Toledo, O., with the Toledo and Wabash for the St. Louis and Southwestern trade. By Col. Scott's decision the business over this latter road is not to be divided, but the Canada Southern shall be entitled to all the traffic it can secure from this source.

Under special pooling arrangements now existing Mr. Fink, general agent of the trunk lines, is to make a division of the earnings.

It is said that Mr. Vanderbilt professes to feel dissatisfied with the decision given above. Both parties however agreed to abide by the referee's decision for a term of six months; after which date either party may dissolve the compact by giving the other three months' notice. This makes the agreement binding for nine months.

Pennsylvania Railroad.

The following statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburgh and Erie, for June, 1878, as compared with the same month in 1877, shows

A decrease in gross earnings of	$65,976
A decrease in expenses of	136,961
An increase in net earnings of	$70,985

The six months of 1878, as compared with same period in 1877, show

An increase in gross earnings of	$115,541
A decrease in expenses of	500,987
An increase in net earnings of	$616,478

All lines west of Pittsburg and Erie for the six months of 1878 show a deficiency in meeting all liabilities, of $603,897, being a gain over the same period in 1877 of $110,928.

☞ The gross receipts of the Grand Trunk Railway of Canada for the month of May, 1878, were £141,923, the working expenses £105,146, and the net profit £36,777. For the month of May, 1877, the receipts were £153,308, the expenses £109,216, and the net profit £44,092. For the five months ending May 31, 1878, the gross receipts were £750,263, the working expenses £582,797, and the net profit £167,466. For the five months ending May 31, 1877, the earnings were £736,074, the expenses £581,783, and the net profit £154,291—showing an increase in earnings of £14,189, in expenses of £1,014, and in net profits of £13,175. The working expenses for 1878 include extra charges for renewals of road and engines of £14,877.

Iron Ocean Steamers.

The American Iron Merchant Marine will soon begin to make a respectable fleet. The vessel launched at Chester on Wednesday was the sixty-fourth iron steamship built by John Roach & Sons within the last eight years. A goodly number of vessels have been built at other yards on the Delaware during the same period, and all this in the face of that very epigrammatic but false declaration made frequently on the floor of Congress and elsewhere, that "we cannot build iron ocean steamers for ourselves because of the tariff laws, and the Government will not let us buy foreign built ships because of the navigation laws." The shipyards on the Delaware go on demonstrating we can build all that are wanted, and, therefore, have no need to go abroad to buy them.—*Phila. Ledger.*

Pittsburgh, New Castle and Lake Erie R. R.

Track laying on 30 miles of the Pittsburgh, New Castle and Lake Erie Narrow Gauge Railroad between Pittsburgh and Beaver was to have been commenced on the 22d inst. The cost of building this branch of the road will be about $8,500 per mile. It will probably be completed in 60 days. The contractor thinks that the 12 miles beyond, into Lawrence county, to Wurtemburg, will be completed about November 1st. The cost of this latter piece will be about $5,000 per mile. The whole cost of the road, it is stated, will not exceed $15,000 per mile, included rolling stock and other equipments.

☞ At the regular monthly meeting of the Board of Control of Coal Producers, held in Philadelphia on the 23d inst., quotas for the month of August were assigned as follows: Philadelphia and Reading Railroad, 572,500 tons; Lehigh Valley Railroad, 395,000 tons; Central Railroad of New Jersey, 258,000 tons; Delaware, Lackawanna and Western Railroad, 255,000 tons; Pennsylvania Railroad, 152,500 tons; Pennsylvania Coal Company, 117,300 tons; Delaware and Hudson Canal, 249,700—a total of 2,000,000 tons, against 1,500,000 tons for month of July.

☞ Work has been commenced on the Sorel branch of the Southeastern Railway from Sutton Junction, Quebec, to Sorel. This road is 95 miles in length, with 57 finished, 23 graded and ready for laying of rails, leaving 15 to construct. When finished the road will form a junction with the Southeastern at Sutton flats, where the company's repair shops are to be located. The road will be open for travel during next winter.

☞ The Springfield, Jackson and Pomeroy Narrow Gauge Railroad was completed on the 18th inst. The ceremony of driving the last spike was per formed by the Vice-President, H. L. Chapman, at Dill's Crossing, four miles from Bainbridge.

☞ Two surveyors are now in the field each engaged in running two lines for the proposed Springfield, St. Paris and Stillwater (Ohio) Railroad.

☞ Simeon B. Chittenden has been elected President, Samuel Hemmingway Vice President, and Wilbur F. Day Treasurer and Transfer Agent of the Shore Line Railroad Co.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

A figure (0) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

New Fangled Sleeping Cars.

The Detroit and Milwaukee Railroad gave their new reclining chair system a first class exhibition yesterday by an excursion. The invited guests comprised a number of prominent citizens and railroad officials. The new reclining chair was inspected very closely, and every one declared the chairs to be the acme of traveling comfort. They are jointed at apparently every inch of their length and width, and can be set to any shape or angle, and with adjustable head and foot rest, make a couch and resting place of the most luxurious character. They are even preferable to the bunks of sleeping cars in hot weather, as there is no necessity for curtains, and the most perfect ventilation is maintained at night. There are also three staterooms in each car for those who desire complete privacy. The rates of travel in these cars are: For whole stateroom, $2; for chair in state room, $1; for chair in middle compartment, under 60 miles, 25 cents; over 60 miles, 50 cents.—*Detroit News.*

Statement of the Public Debt of the United States, July 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Increase of debt during the past month	$2,149,381 18	
Decrease of debt since June 30, 1877	24,371,891 44	

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$776,553 60
Kansas Pacific bonds, 1862-64	6,303,000 00	189,090 00
Union Pacific bonds, 1862-64	27,236,512 00	817,095 36
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	48,000 00
Western Pacific bonds, 1862-4	1,970,560 00	59,116 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	48,849 60
Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $37,396,334 50; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $28,014,890 25.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

A Novel Postal or Letter Balance.

Col. Franklin Fairbanks has received letters patent for "Improvement in Weighing Scales," issued May 21, 1878.

The improvement applies to the graduated beam portion of the scale, which in a simple and effective manner combines the graduations of both the English and the metric system—or ounce and gram rates. As an act of Congress allows 15 grams, a little more than half an ounce, to constitute a letter rate, the value and convenience of this scale is very great

The beam is graduated in ounces on one edge and in grams on the other, and by a simple revolution either the avoirdupois and metric system can be used.

The venerable Thaddeus Fairbanks, the original inventor of Fairbank's scales, has also just received a patent for a valuable improvement in Platform scales.

☞ It is expected that the Spencer Branch Railroad, from the depot of the Boston and Albany Railroad in Spencer to the Central Village, a distance of two miles and one-eighth, will be completed by September.

☞ The Southern Minnesota Railroad was completed and opened for business on the 1st of July to Fairmount, Minn., a distance of 18 miles from Winnebago, its former terminus.

American Railroad Journal.

Saturday, July 27, 1876.

Financial and Commercial Affairs.

A dull market for Money has been in part relieved by unusual activity in Stocks. One pretext or another has served to keep the stock market in an irregular feverish condition during the week. An easy money market has assisted to promote and continue this condition. Very much of the activity in stocks is purely speculative; but this is true rather of the miscellaneous list. In government securities there have been large transactions for investment.

On Tuesday the Secretary of the Treasury made another call for $5,000,000 of the 6 per cents of 1865, to be paid off at par and interest in coin on October 23; the call being divided equally between registered and coupon bonds. The subscriptions for that day (28d) amounted to $1,077,700 for the new 4 per cents—a large purchase—and this investment is considered better than to wait for something to offer in the future bearing a higher rate of interest. This makes the sixty-third call in regular succession, and leaves outstanding $67,000,000 of the 5 20s of 1865, new issue. The bonds called and outstanding amount to $40,000,000, and are payable in amounts of $5,000,000 each, on 30th July, 6th and 22d August, 5th and 20th September, and 11th, 17th and 28d October. The dates of call are 30th April, 6th and 22d May, 5th and 20th June, and 11th, 17th and 28d July.

The Bank of England has been accustomed to fix a minimum rate of discount, which rate was published to the world and to an extent governed discounts by banks and bankers. In theory this

seems like sound finance, but in practice the bank has often been the loser by the publication of its minimum rate. Now at this time, and at other times when a depression in trade caused money to flow into the bank vaults and remain there, the street rate of discount would be far below the bank's rate. At such times the bank was compelled to see its best customers go elsewhere for accommodation, because its policy stood in the way. To remedy this the Governor and Directors of the Bank of England propose not to be limited absolutely by their published minimum rate as heretofore. In other words, the bank will hereafter do as others do, suit the rate to the customer.

Whilst Eastern banks complain of idle funds the half-yearly statement from the Pittsburg and Allegheny banks shows a singular contrast in some respects. Since December 28, 1877, the total resources of twenty-seven banks have decreased about two million dollars, divided or distributed in this way: In loans and discounts the decrease is about $1,500,000; in legal tenders some $300,000, and in hands of reserve agents $200,000. The deposits have fallen off $1,800,000, which must be charged in part to liquidation of accounts and losses. In the face of this the banks have increased their circulation $71,000. The undivided profits show a shrinkage in six months of $264 500. This exhibit, however, should not be considered derogatory to the banks if they have wiped off bad debts and "put their houses in order."

Call loans may be quoted unchanged at 1@2 per cent; 1⅛ per cent being the rate paid on Government bonds, and 2 per cent for carrying railroad stocks.

Gold which rallied ⅛ before the close last week fell back to ⅛ per cent premium and has remained almost unchanged through the week. In London Silver is quoted a trifle lower, but a dull and irregular market causes us to quote at 52⅝d. per ounce, as at the close last week.

Foreign Exchange rules still in favor of buyers. Sales were made of £60,000 hardly prime at 84 84½. Having sent home a good quantity of our bonds, the continued exports will presently bring us considerable shipments of coin. The drawers of sterling bills admit that the outlook is not promising for them.

The Stock market continues irregular. The favorite stocks dealt in of the railroad and miscellaneous list have been the grain-carrying roads in the Northwest, Lake Shore and Michigan Southern, Erie, and Western Union Telegraph. Disastrous rains in Wisconsin and Minnesota afforded the bears an opportunity to attack the stocks known as "grangers" and a lively contest was maintained over the probabilities of those railroads earning dividends. The actual damage to the crops was found to have been overestimated, while both bears and bulls seemed to have forgotten that whatever damage might occur would be in quality rather than in quantity—a matter of small account to the railroads however serious it might be to the farmer.

Government bonds were active and in good demand during the week. Prices were well sustained, and the market on Wednesday closed strong at the following quotations:

United States 6s, 1881, registered, 107⅜@107⅝; do. coupon, 107⅜@107⅝; 5-20s, 1865, new, registered, 102½@102⅝; do. coupon, 102½@102⅝; do. 1867, registered, 105⅝@105⅞; do. coupon, 105⅝@105⅞; do. 1868, registered, 107⅛@108; do. coupon, 108@108½; ten-forties, registered, 109@109⅛; do. coupon, 109@109⅛; five per cents, 1881, registered, 106⅜@106½; do. coupon, 107⅛@107⅜; 4½ per cents, 1891, registered, 104⅝@104¾; do. coupon, 104⅝@104¾; 4 per cents, 1907, reg., 100¼@100⅜; do. coupon, 100½@100⅝; sixes, currency, 120⅜@120¾.

The exports from New York for the week, exclusive of specie, have been $7,018,127, an increase of $1,605,035 over the previous week.

The latest cable advices from London report at the close on Wednesday a considerable hardening in the money market. The rate of discount is now 3 per cent in the open market, against 3½ per cent at the Bank of England. The Bank lost £10,000 gold on Wednesday "on balance," making a total loss of £190,000 in the week.

From Boston the Money market is still reported very quiet. A somewhat better demand for money prevails and rates of discount are named at 3½@4½ per cent with occasional higher and lower rates according to the quality of the paper offered. An active Stock market has absorbed a fair amount of money, but not enough, it is reported, to influence the market.

Philadelphia reports name money as plentiful on call at 3@4 per cent for the average of collaterals offered by stock brokers. A considerable business was done in shares of the Pennsylvania Railroad at prices scarcely different from quotations at the close last week. A rumored sale of 5000 shares for account of a New York house was current on the street. Philadelphia and Reading was dealt in at prices ranging from 19¼@19¾, closing at 19½.

From Baltimore little change is reported in Money. At the Stock Board business was moderately active in Government securities. Almost nothing was done in State or City bonds and prices are unchanged. In railroad stocks Baltimore and Ohio was sold in small lots at 90, but 93@95 was generally asked. Northern Central bonds of 1885 were quoted at 107 bid and 109 asked and no sales.

Domestic Produce is firm, and while business is rather slow the trade is rather more confident. Wheat and flour were quoted firm, and reported damage to crops in the Northwest has served to strengthen prices generally. Cotton has been very slow but closed steady for spot and lower for futures. We now quote futures August delivery at 11.70@11.73; September, 11.82@11.35; October, 11.18@11.21; November, 11.04@11.05; December, 11.04.

In estimating the amount of the growing cott n crop, the *Financial Chronicle* names 750,000 bales as the probable amount in excess of last year's crop. This appears to be an extraordinary increase not warranted by the facts or the nature of production. Last year's crop was a large one both in acreage and in yield of lint. The same acreage will not probably produce any great excess over last year, where then is the increase to come from? From an increase of acreage—new lands. To produce 750,000 bales additional would require more than 1,000,000 acres of new land in cultivation, since upland will not average a bale to the acre. Bottom lands yield more than a bale to the acre, but how much additional bottom land heavily timbered as it is by nature can be put under cultivation in a single year? Very little. It is early yet to figure so definitely. In 1865, and again in 1866 the caterpillar did immense damage after the 1st of August.

Metals have not changed materially since our last. Sales continue small. We quote: Coltness, No. 1, $24; Glengarnock, No. 1, $23 50@$23 75; Eglinton, No. 1, $22 75@$23; American Pig, No. 1, $16 50@$18; New Iron Rails at $32@$36; Old Rails at $17@$18; Steel Rails at $44@$45.

Ocean freights have been unsettled and somewhat irregular. Engagements to Liverpool for for grain by sail were made at 5d. per 56 lbs.; by steam, grain at 6d. Cotton at ¼d. To Glasgow steam for grain 7d. per 60lbs.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 23d inst. the sixty-third call for the redemption of 5-20 bonds of 1865—consols of 1855. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 23d of October next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds dated July 1, 1865, namely: $50, Nos. 68,001 to 69,000, both inclusive; $100, Nos. 114,001 to 117,000, both inclusive; $500, Nos. 79,501 to 82,000, both inclusive; $1,000, Nos. 145,001 to 151,000 both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870; $50, Nos. 2,301 to 2,350, both inclusive; $100, Nos. 18,251 to 18,350, both inclusive; $500, Nos. 10,551 to 10,600, both inclusive; $1,000, Nos. 85,201 to 85,450, both inclusive; $5,000, Nos. 9,651 to 9,900, both inclusive; $10,000, Nos. 18,464 to 19,056, both inclusive.

☞ At a meeting of the stockholders of the Northern and Southern West Virginia Railway Company, held in this city on the 17th inst., the following board of directors was elected: John W. Strong, Detroit, Mich.; Oliver E. Wood, Willard Parker, Jr., New York; Gideon D. Camden, Clarksburg, West Va.; Ben. W. Byrnes, Charleston, West Va.; Wm. Montross, Abram M. Gentry, James B. Weir, W. B. Hotchkiss, New York.

☞ Efforts are now being made to secure the right of way for the Charlottsville, Virginia, and Rapidan railroad, and a contract has been made with Smith & Co., of Philadelphia, to build the road for $500,000 in the bonds of the road. It is also proposed to build two blast furnaces at Charlottesville, for the utilization of the ores on the line of the proposed road.

☞ The Salem Republican says that the Chicago and Atlantic Narrow Gauge Railway is now in a fair way to be completed the entire distance of the proposed line, that it has consolidated with the Pittsburg, New Castle and Lake Erie Railroad, and has put this line under one management from Chicago to Pittsburg and the oil region.

☞ J. H. Olhausen, Superintendent of the Mahanoy and Shamokin division of the Philadelphia and Reading Railroad, has been appointed superintendent of the Schuylkill Valley, Mt. Carbon and Pottsville, Mahanoy and Broad Mountain, and Mine Hill division of the same road. Headquarters, Mahanoy Plaine.

☞ The contract for building the abutments of the Dartmouth street bridge over the Boston and Providence and Boston and Albany Railroads has been awarded to George H. Cavanaugh for $84,400, and the iron work is to be furnished by the Keystone Bridge Company of Philadelphia for $22,227.

☞ Nine miles of the Mystic Valley Railroad have been graded, and sleepers have been contracted for. Gravel trains are expected to run in a few weeks, after which grading will be pushed more rapidly. Work is now progressing in Wilmington, Woburn and Winchester.

☞ Articles of incorporation have been filed with the Secretary of State of Kansas of the Kansas City, Eureka and Santa Fe Railroad. The capital stock is placed at $3,500,000. The places of business are Kansas City and Burlington.

☞ The London Daily News has reason to believe that two parties of railway experts, under the direction of the government, will examine the Tigris and Euphrates valleys for the best railway route to the Persian gulf.

☞ The Sacramento Record-Union says it is expected that the grade of the Yamhill narrow gauge will be finished to Dallas by the 10th of August, and that the track will be laid by the 15th of September.

☞ Verulam, Canada, has voted a bonus of $20,000 towards the Whitby and Bobcaygeon Extension Railway.

☞ The Janney Safety Platform and Coupling is being adopted on all the passenger cars of the Pennsylvania Railroad Co.

The American Iron Trade for 1877.

The report of the American Iron and Steel Association for the year 1877 has just been issued by the Secretary, Mr. Jas. M. Swank, from his office in Philadelphia. The report states "that the year 1877 witnessed an increased demand for some of our iron and steel products, as compared with 1876, neutralized, however, so far as the producers were concerned, by a very marked decrease in prices—a result which not only prevented an increase in the wages paid to labor, but in some instances compelled still further reductions. Prices were too low to be profitable. Nor did low prices form the only unfavorable feature of the iron trade of 1877. More than one-half of the furnaces and rolling mills were idle the whole year.

According to the figures given, the price of pig iron fell from $20 75 in January to $18 in August, when the decline was arrested for the year, to be continued, however, in 1878. In bar iron the prices fell from $48 72 for best refined in January to $44 80 for the same quality in December. Steel rails fell from $49 at the works in January to $40 50 in December. Iron rails of standard quality fell from $38 in January to $32 50 in October. All these are the lowest prices ever quoted in this country, if we except the price of pig iron in colonial days and during the first half of 1878.

PIG IRON.

The production of pig iron in the United States in 1877 was 2,314,585 tons of two thousand pounds, against 2,093,236 tons in 1876, a gain of 221,349 tons, or about 10½ per cent. Twenty two States made pig iron in 1877. As compared with other years immediately before and since the panic the production of 1877 shows a decided reaction from extreme depression, but still falls far short of the country's best achievements. The figures are as follows: 1872, 2,854,558 net tons; 1873, 2,868,278 tons; 1874, 2,689,413 tons; 1875, 2,286,581 tons; 1876, 2,093,236 tons; 1877, 2,314,585 tons. The production in 1877 was about 50,000 tons greater than in 1875. The year 1876—the Centennial year—was the year of least production since 1872, and 1873 was the year of greatest production in the history of American pig iron.

Of the total production of pig iron in 1877, 1,061,945 net tons were made with bituminous coal and coke, 934,797 tons with anthracite, and 317,843 tons with charcoal. In 1873, the year of greatest production, the proportions were as follows: Anthracite, 1,312 754 net tons; bituminous coal and coke, 977,904 tons; charcoal, 577,620 tons. It will be seen that, while the production of anthracite and charcoal pig iron has largely fallen off, that of bituminous coal and coke pig iron has very materially increased.

The increased production in 1877 over 1876 was mainly of anthracite pig iron. New York, New Jersey, Pennsylvania and Maryland all showing an increase. Comparative figures of the production of anthracite pig iron are as follows: 1876, 794,578 net tons; 1877, 934,797 tons; increase in 1877, 140,219 tons. There was also an increase in the production of bituminous coal and coke pig iron in 1877, as follows: 1876, 990,009 net tons; 1877, 1,061 945 tons; increase, 71,936 tons. The production of charcoal pig iron in 1877 was but little in advance of the production in 1876. The figures are as follows: 1876, 308,649 net tons, 1877, 317,843 tons; increase, 9194 tons. The total increase in 1877, as already stated, was 221,349 tons.

The whole number of furnaces in the United States which were completed and either in blast or ready to be put in blast at the close of 1877 was 716, against 712 at the close of 1876. Of the furnaces completed at the close of 1876, 236, or less than one-third were then in blast, and 476 were out of blast. At the close of 1877 there were 270 in blast and 446 out of blast, showing an increase in that year as compared with 1876 of 34 active furnaces. The number of furnaces erected during 1877 was 17, and the number permanently abandoned was 13; net increase, 4."

In reference to the consumption of pig iron in 1877, the report states, "that the consumption was apparently greatly in excess of the consumption of 1876. The production was greater and stocks in the hands of makers were reduced. At the close of 1876 makers' stocks amounted to 686,798 net tons, and at the close of 1877 this quantity had been reduced to 642,351 tons, a difference of 44,447 tons. The imports of pig iron in 1877 amounted to 66,871 net tons, and our exports to 7687 tons, showing a difference in favor of importation of 59,184 tons. If we add the production of 2,314,585 net tons in 1877 to the reduction of 44,447 tons in stock and the net transportation of 59,184 tons, we have an approximate consumption last year of 2,418,216 tons, against 2,172,503 tons in 1876.

The total production of all kinds of rolled iron in the United States in 1877 was 1 476,759 net tons, against 1,509,269 tons in 1876, 1,599,516 tons in 1875, 1,694,616 tons in 1874, and 1,837,430 tons in 1873.

Sixty-five rolling mills in twelve States made cut nails and spikes in 1877. The number of machines contained in all the rolling mills in the country is nearly 4000. The total production of cut nails and spikes in 1877 was 4,828,918 kegs of 100 pounds each, against 4,157,814 in 1876, 4,726,881 in 1875, 4,912,180 in 1874, and 4,024,704 in 1873. The tonnage of rolled iron converted into cut nails and spikes in 1877 and previous years was as follows: 1877, 241,446 net tons; 1876, 207,890 tons; 1875, 236,343 tons; 1874, 245,609 tons, 1873, 201,225 tons.

The production of bar, angle, bolt, rod, skelp and hoop iron in 1877 was 720 531 net tons, against 668,956 tons in 1876, 668,755 tons in 1875, 687,650 tons in 1874, and 705,964 tons in 1873.

The production of plate and sheet iron in 1877 was 182,242 net tons, against 165,255 tons in 1876, 192,769 tons in 1875, 176,888 tons in 1874, and 169,169 tons in 1873. Nail plate not included.

BESSEMER STEEL.

The following table shows in detail the production of iron and steel rails in this country since the beginning of the manufacture of Bessemer steel rails:

Years.	Iron Rails all kinds. Net tons.	Bessemer Steel Rails. Net tons.	Total Net tons.
1867	459,558	2,550	462,108
1868	499,489	7,225	506,714
1869	583,936	9,650	593,586
1870	586,000	34,000	620,000
1871	737,483	38 250	775 733
1872	905,930	94,070	1,000,000
1873	761,062	129.015	890,077
1874	584,469	144 944	729,413
1875	501,649	290,863	792,512
1876	467,168	412,461	879,629
1877	332,540	432,169	764,709

The quantity of pig iron and spiegeleisen converted by the Bessemer process in the United States in 1877 was 562,227 net tons, against 539,474 tons in 1876, 895,956 tons in 1875, and 204,352 tons in 1874. Of spiegeleisen alone there were used 48 229 net tons in 1877, against 45,930 tons in 1876, and 33,245 tons in 1875. The number of net tons of Bessemer steel ingots produced in 1877 was 560,587, against 525 996 tons in 1876, 875,517 tons in 1875, and 191,933 tons in 1874. The number of net tons of Bessemer steel rails produced in 1877 was 432,169, against 412,461 tons in 1876, 290,863 tons in 1875, and 144,944 tons in 1874. In the eleven years during which the Bessemer steel industry of this country has had an active existence there has been produced a total of 1,595,197 net tons of steel rails. The number of Bessemer converters in use during the whole or a part of the year 1877 was 22, representing all the Bessemer steel establishments of the country.

The number of net tons of spiegeleisen produced in this country in 1877 was 8845, against 6616 in 1876, and 7832 in 1875. Forty-one establishments made crucible, open hearth, blister and puddled steel in 1877, located in New Hampshire, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Ohio, Kentucky and Tennessee. There are also steel works in Rhode Island, Georgia and Illinois, but they were not in operation in 1877.

The total production in 1877 of all the kinds of steel named above was 77,385 net tons, against 71,178 tons in 1876, 61,058 tons in 1875, and 49,681 tons in 1874. Of the product of 1877, 40,430 tons were crucible steel, 25,031 tons were open-hearth steel, and 11,924 tons were puddled and blister steel.

The production of open-hearth or Siemens-Martin steel, in this country amounted to 3000 net tons in 1872; 3500 tons in 1873; 7000 tons in 1874; 9050 tons in 1875; 21,490 tons in 1876; and to 25,031 tons in 1877—the product of nine establishments.

ROLLING MILLS.

At the close of 1877 there were in twenty five States and the Territory of Wyoming 338 rolling mills, containing 4531 single puddling furnaces, each double furnace being counted as two single furnaces. There were also 51 single puddling furnaces connected with steel works and forges, the total number of puddling furnaces in the United States in 1877 being 4582. Of the whole number of mills, 253 were in operation during the whole or a part of the year. Of the whole number, including those connected with Bessemer steel establishments, 99 were built to make rails—60 heavy and 39 light rails; and of these 38 heavy and 17 light rail mills—55 in all—made rails in 1877. The rolling mill capacity of the country, like its blast furnace capacity, is double the production of 1877.

IMPORTS AND EXPORTS OF IRON.

During the year ended December 31, 1877, we imported iron and steel products aggregating $9,195,368 in value, against $10,584,126 in 1876; $15,264,131 in 1875; $24,578,688 in 1874; $46,764,670 in 1873; $61,724,227 in 1872; and $47,919,926 in 1871. The imports in 1877 were $1,388,758 less in value than in 1876. Tin plate is not included in these figures. In 1876 we imported 287 net tons of iron rails and no steel rails; in 1877 we imported 35 net tons of steel rails and no iron rails. We imported more bar iron in 1877 than in 1876, and less pig iron. Our imports of hardware and cutlery were greater in 1877 than in 1876, and our imports of steel were less.

In the year ended December 31, 1877, we exported iron and steel products of domestic manufacture aggregating $16,659,675, against $11,794,748 in 1876; $16,092,906 in 1875; $15,389,807 in 1874; $12,129,939 in 1873; $10,030,125 in 1872; and $11,836,137 in 1871. The increase of about $5,000,000 of exports in 1877 as compared with 1876, must not be too strongly regarded as significant of a permanent improvement in our domestic export trade in iron and steel products, as an examination of the table will show that over $2,500,000 of this increase was in the sales abroad of fire arms alone, a result of the Turco Russian war.

☞ At a meeting of the stockholders of the Columbus and Bellefontaine Railroad Company held at Marysville, Ohio, on the 15th inst., the following directors were elected: C. P. L. Butler and John Dunn, Franklin county; W. W. Woods and Philip Snider, Union; W. V. Marquis and J. W. Haines, Logan, and for director at large, J. H. Rebb, of East Liberty. It was voted, however, to instruct the directors not to begin the construction of the road until a sufficient amount of stock has been subscribed to insure its completion.

☞ The Ashtabula, Youngstown and Pittsburg railroad is advertised to be sold at Youngstown, Ohio, Saturday, August 24. The road is appraised at $900,000.

Debt of Pittsburgh.

The movement now on foot for refunding the city debt of Pittsburg has caused general inquiry as to its amount and its present shape. The indebtedness is presented below in tabular form by the Pittsburg Gazette:

Water Extension, registered, due 1898.	600,300
Water Extension, registered, due 1898.	2,243,000
Fire Department loan, due 1893	200,000
Temporary loan, due 1877	46,500
City Building, due 1880.	170,000
Total	$5,345,000

RECAPITULATION.

At four per cent	$352,485
At five per cent	1,826,844
At six per cent	997,000
At seven per cent	5 345,000
Total	$8,521,329

In addition to the above the city has issued to Commissioners for the Improvement of Street bonds at 7 per cent, due in 1883-4-5-6, to the amount of $5,121,300. This gives a grand total of liability as follows:

Bonded debt outside of street improvement	$8,521,329
Street improvement bonds	5,121,300
Total indebtedness	$13,642,629

☞ Articles of incorporation have been filed in the office of the Secretary of State of California of the Texas Pacific Business and Development Bureau—to buy and sell mines and mining property for itself and on commission capital, $10,000,000, in shares of $100 each. Directors—J. E. Skidmore, M. G. Kennedy, H. S. Searle, U. Boynton, M. Thornburgh, Samuel P. Warren, C. S. Drew, James B. Maholm and H. C. Partridge. The principal place of business will be in San Francisco.

The Coal Trade.

For the week ending July 13, the total anthracite production, as reported by the several carrying companies, amounted to 273,000 tons, against 449,764 tons in corresponding week last year, a decrease of 176,764 tons. The total amount of anthracite mined for the coal year is 7,226,741 tons, against 10,019,980 tons for same period last year, a decrease of 2,793,239 tons. The quantity of bituminous coal sent to market for the week amounted to 72,749 tons, against 52,981 tons in corresponding week last year, an increase of 19,768 tons. The total amount of bituminous mined for the year is 1,600,225 tons, against 1,678,017 tons for corresponding period last year, a decrease of 78,792 tons. The total tonnage of all kinds of coal for the week is 345,749 tons, against 502,745 tons in corresponding week last year, a decrease of 156,996 tons. The total tonnage of all kinds of coal for the coal year is 8,226,966 tons, against 11,697,997 to same date last year, a decrease of 2,871,031 tons. The receipts at Perth Amboy for the week ending on Saturday, July 20th, were 21,054 tons, the shipments 14,799 tons, leaving a stock on hand of 35,709 tons, against 131,349 tons at same date last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of July was 88,604 tons, of which 66,855 tons were coal, and 21,749 tons coke. The total carried for the year is 2,476,688 tons, of which 1,929,401 tons were coal and 547,287 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, July* 22.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 17th inst., the sixty-second call for the redemption of 5 20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 17th day of October next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 65,001 to 68,000, both inclusive; $100, Nos. 110,001 to 114,000, both inclusive; $500, Nos. 76,201 to 79 500, both inclusive; $1,000, Nos. 140,001 to 145,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,251 to 2,300, both inclusive; $100, Nos. 17,851 to 18,250, both inclusive: $500, Nos. 10,451 to 10,550, both inclusive; $1,000, Nos. 84,401 to 85,200, both inclusive; $5,000, Nos. 9,251 to 9,651 both inclusive; $10,000, Nos. 17,731 to 18,468, both inclusive.

New Narrow-Gauge Railroad.

The Staunton (Va.) News says that a company has been formed to construct a narrow gauge railroad direct from Quantico, on the Potomac, where the wharves have been secured, to Kanawha C. H., West Virginia, there to connect with the three foot gauge road being completed to Portsmouth, Ohio, and then adds:

The railroad company has entered into a contract with a large construction company, composed of practical contractors, and men of means and ability, to construct this road ready for equipment, from Charleston to the State line, between Virginia and West Virginia, in Pendleton county, with T. K. McCann, of Steubenville, as superintendent of construction. A corps of engineers will be at work on the 21st of July, under R. W. Peterkin, of Pennsylvania, a graduate of West Point, and eminent in his profession of Civil Engineer. Mr. McCann will at once take position at Charleston, to take charge of the company's interest in the construction of the road, which, it is understood, will commence within thirty days after the subscriptions of Kanawha and Clay have been secured.

Brighter Prospects for the Iron Trade.

One of the most active causes of the financial explosion in 1873 was the extent to which the business of building railroads in this country had been overdone. Since that time the railroads have been managed with a yearly increasing economy. But in the iron trade the department of railroad supply is the first to indicate a condition of healthy activity. The worn out rails have to be replaced. In commenting on this subject the New York Daily Bulletin gives some interesting facts from a paper recently read by Mr. Charles Wood at a meeting of the British Iron and Steel Association, which points to a similar state of affairs in Europe. Mr. Wood calculates that an iron rail lasts ten years, and that 30,204,000 tons of rails are now laid down over the world. The quantity annually required would be:

	Tons
For repairs	3,020,400
For 16,000 miles of new lines	1,080,000
For private lines, mines, etc.	10,000
Total demand	4.110,400

The current annual production of rails Mr. Wood estimates as follows:

In the United States		879,000
In Belgium		300,000
In Great Britain	Export	586,000
	Repairs	450,000
	New lines	30,000
In other countries		500,000
Total annual product		2,745,000

According to these calculations there would be an annual deficiency of 1,865,000 tons. That there are not orders, under such conditions, crowding in on the workshops, is attributed to the economy which has been forced on railway companies and to the subsequent postponement of repairs as long as possible. Allowing these calculations to be optimist, making due allowance for the substitution of steel rails, and giving a longer life for iron rails than Mr. Wood estimates, we yet find that the demand would be about equal to the supply. Moreover, in these estimates no allowance is made for the new demand coming from the construction of tramways, which are very rapidly being adopted in Great Britain and on the Continent. A dispassionate survey of these facts appears to justify the conclusion that, however largely railroad building may have been overdone in this country, yet in other parts of the world these facilities have been very imperfectly supplied, and that the necessities of commercial competition will compel an extent of construction that will impart an important stimulus to the iron trade of all countries. The extent to which American manufacturers will be able to benefit by this demand must depend, first, upon the degree to which they are able to avail themselves of the latest economies in manufacturing processes, and, next, upon the prices at which the coal trade, combined for the purpose of enhancing high prices, will permit them to have fuel.—*Philadelphia Record.*

☞ The new company who are working the copper mines in Cheshire, Conn., intend to expend $75,000 in getting the mines in working condition. Thomas O. Shaw of Providence, a practical miner, is the Superintendent. Specimens of the ore assay $137 copper, $34 80 silver, and $18 12 gold per ton.

☞ The Bellaire and Southwestern (Ohio) Narrow gauge railroad is making good progress. Another locomotive, several freight cars, and rails

enough to lay twenty-five miles of track have been purchased.

The Mississippi Jetties.

In a letter to Congressman Crittenden, of Missouri, written on the 8th inst., Captain Eads says:

The jetty channel is now almost as good as the entrance to New York harbor. Larger ships and steamers visit the port of New Orleans than ever before. Ocean freights have been so greatly lowered in consequence that the saving on cotton alone from the port of New Orleans the past season was over $1,600,000. Every intelligent man in Missouri knows that a revolution has been wrought in the grain trade as a result of this deep water. As the channel deepens and commerce adjusts itself to these new conditions the benefits to the producers in Missouri will be still more extensively enjoyed. The permanent improvement of the mouth of the Mississippi operates as a regulator of transportation charges, and thus adds to the value of every bushel of grain grown for export to Europe or for consumption in the Atlantic States; and it also cheapens to the farmer all of his merchandise and other supplies brought from the East.

☞ The contract for building the Toledo, Frankfort and Delphos Narrow-Gauge railroad, from Warren to Bluffton, has been awarded to James Crosby & Co., of Bluffton, Ind. and Geo. Keegan, of Columbus, O. Most of the work has been sublet, and grading is now in progress. It is expected that cars will be running by the 1st of January.

☞ The North Pennsylvania Railroad Company have declared a dividend of two per cent payable in scrip bearing no interest, and convertible into capital stock of the company when presented in sums of fifty dollars. The scrip so issued will be deliverable on the 26th of August and convertible any time thereafter.

☞ The sales of land by the Iowa Railroad Land Company for June were 5,075.74 acres to 76 purchasers for $41,036 34. The cash collections for the month amounted to $54,005 61.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE GRAND CENTRAL DEPOT, NEW YORK, June 28, 1878.

THE DIRECTORS OF THIS COMPANY have this day declared a dividend of ONE Per Cent. upon the capital stock, payable on the first day of August next at the office of the company in Grand Central Depot.

THE TRANSFER BOOKS will be closed at 3 o'clock P. M. on Friday, the fifth day of July next, and will be re-opened on the morning of Monday, the fifth day of August next.

E. D. WORCESTER, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.

FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.

WHEELS and AXLES MOUNTED COMPLETE.

PATENT
MINERAL WOOL.
ABSOLUTELY FIRE-PROOF,
UNDECAYING
AND THE BEST
Non-Conductor of Heat, Cold and Sound.
USED EXTENSIVELY FOR
DEADENING WALLS AND ROOFS OF
Dwellings and Ice-Houses,
LINING BOILERS, FURNACES, STEAM AND COLD WATER PIPES, ETC.

P. O. Box, 4461. 26½ Broadway, N. Y.

Safety Railroad Switches
WITH
MAIN TRACK UNBROKEN.
RAILROAD CROSSINGS, FROGS,
and other
ROADWAY SUPPLIES.
MANUFACTURED BY
THE WHARTON RAILROAD SWITCH CO.,
Office, 28 South 3d Street.
Works, 23d and Washington Ave.
PHILADELPHIA.

Hopkins' Patent Lead-Lined
JOURNAL BEARINGS.
USED ON NEARLY ALL THE
Leading Railroads of the United States and Canadas.
NON-HEATING,
PERFECTLY SELF-FITTING,
CHEAPER AND BETTER THAN ANY OTHERS.
D. A. HOPKINS,
Patentee and Manufacturer,
113 Liberty Street, New York.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further precedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,

HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either

COAL OR WOOD BURNING;
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.

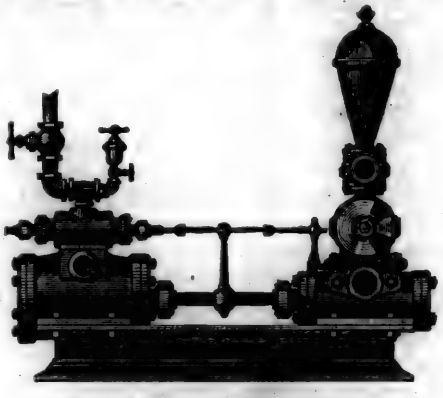
GENERAL AGENTS FOR

Lansdell & Leng's Lever and Cam Valves, for water, steam, gas, etc.
The Steam Water Station Company's Lansdell's Patent Steam Syphon Pumps.
Credenda Steel Gun Barrels, Moulds, etc.
Patent Weldless Cold Drawn Steel Tube Company.
Marsh Brothers & Co.'s Cast Steel, German Steel, Machinery Steel, Files, etc.



THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

G. F. THOMAS, 549 & 551 Broadway, New York.

STEAM PUMPS.

IMPROVED NIAGARA STEAM PUMP.

Marine Steam Engines. Stationary Steam Engines Marine and Stationary Boilers. Hydraulic Elevators for Buildings. Pulleys, Shafting and Hangers a specialty.

The Law of Strikes.

There is a growing antagonism between labor and capital. Strikes are one of the common results from this antagonism; and, whether successful or not all strikes are attended with loss to the community, a common loss; hence all strikes are to be deprecated and avoided if possible in the general interests of the community.

In a community where the law gives peculiar privileges and rights to one class above another, it is natural that the weaker class should endeavor by combination and agreement to strive to defend itself against the stronger class secure in its assumptions by the law. This condition of society in monarchical Europe gave rise at an early day to all sorts of guilds and societies in trade and mechanical art and industry. The law still maintaining social differences as in early days, the laboring classes have found it necessary or advantageous to keep up organizations, trades unions, etc., as was the case in a much ruder state of society. This under monarchical rule.

But here under democratic laws where no one class has any legal or social superiority there is no sound reason for antagonism between the employer and the employed. Our fathers recognized the fact that social equality by law was a boon of inestimable value to the poor man; hence they made him politically the equal of the rich man. This endeavor to preserve complete equality was sufficient for the purpose until recent times. Within a few years past we have received an enormous accession to our population by immigration from monarchical Europe. This influx represents few of the privileged classes. At least nine tenths of the immigrants are laboring men who are seeking to better their position both politically and socially. And where possessed of ordinary intelligence and industry the result has been as satisfactory as could be desired.

But these men reared under the old monarchical law, fail to perceive and appreciate the full value of the democratic equality given them here. The old inherited jealousy of wealth clings to them even after they may have acquired a competency themselves. As capitalists they become jealous of others richer than themselves; as employers they are liable to become domineering and arbitrary.

On the other hand, the laboring man who does not rise above his former level is envious of his more successful fellow workman who has risen to be his employer perhaps. Feeling the satisfaction from political equality, the laboring man is eager in some way to create and maintain social equality. He desires to make his employer in some way as dependent upon his labor as he is upon the employer's work and its pay. To effect this mutual dependence, to maintain absolute equality between labor and capital is the ruling thought of the working man. To this end trades unions and societies are organized and fostered, and every known pretext is seized upon to magnify the sufferings of labor and the oppression of capital.

We have here followed the causes to the effects in order to show simply and plainly the origin and basis for the antagonism between labor and capital and the strikes resultant therefrom.

Now let us consider the legal aspect of the strike. The laborer has an unquestioned right to demand any price he pleases for his labor. His labor is his merchandise, and in principle differs nothing from the corn of the farmer or the calicoes of the merchant. If the buyer, the employer, thinks the price a proper one he accepts it, he buys the labor as he would buy the corn or the calico. The price must be governed by the condition of the market. The supply and the demand must of necessity fix the price. The failure to understand this simple problem in political economy has cost the laboring men of the United States millions in money, and an amount of suffering by their wives and children that is past all estimate or calculation.

When the working man says to his employer, as in the case of a strike, My labor is worth so much per diem and you shall not employ another man at less price, he violates the law and common justice as well. With equal propriety the farmer might say to the working man, Here is my wheat which you need for food. My price is so much per bushel and I will compel you to pay it, because I will not allow you to buy of another man. This principle if carried out would destroy us socially and politically. The right to strike, to refuse the price offered for his labor, belongs to the working man as unquestionably as his right to vote or to exercise any rights of a free citizen. But when he goes beyond that he enters upon debatable ground at once.

Viewed from an economic standpoint a strike affects the body politic as a war does. The enforced idleness of a large number in a community is a loss that needs to be carefully estimated to be understood. It is a loss of material wealth which is not made good again by increased wages when a strike is successful. The days and weeks of idleness are so much positive loss, something not to be regained.

If the laboring man was a thinker as well as a worker he would not strike. Our common schools and seminaries are making the sons of foreign-born parents better fitted to fill the position of American citizens than their fathers were. When all our citizens shall have learned to see and appreciate their relations to each other and to the

law governing all, strikes will be as rare and unheard of as they were in the days of our fathers. But until that time shall come ignorant or designing men will make trouble.

Atchison, Topeka and Santa Fe Railroad.

The extensions of the Atchison, Topeka and Santa Fe Railroad, at present being made, are destined to open up a large section of country, rich in mineral and agricultural resources. The Pueblo and Arkansas Valley extension, Southern Division, starts from La Junta, on the Arkansas river, about twenty miles west of Fort Lyon, and runs southwesterly via Trinidad and the Raton pass to the south line of Colorado. This extension is 95⅛ miles in length.

The New Mexico and Southern Pacific Railroad commences at the north line of New Mexico, at the termini of the Pueblo and Arkansas Valley Railroad, Southern Division, and runs on the east side of the great Rocky Mountain range in a southwesterly direction to Los Vegas, 118⅛ miles, and thence to the Rio Grande river at or near Albuquerque, about 129⅛ miles. The whole extension in this direction is about 343⅛ miles.

This line is expected to make a connection with the Southern Pacific line at no very distant day. The distance over this route from Atchison to Albuquerque is 898⅛ miles, and from Kansas City is 914⅛ miles. The estimated cost of this extension is $3,633,000, and the whole amount has been subscribed by responsible parties under Circulars Nos. 41 and 42 of the Atchison, Topeka and Santa Fe Railroad Company. The Pueblo and Arkansas Valley Railroad will also be extended from Pueblo west via the Grand Canon of the Arkansas river to the San Juan country, with a branch from the South Arkansas to Leadville. Fifty-two miles of this extension, commencing at Canon City, at the entrance to the Grand Canon, will be built this year, the estimated cost of which is $770,000, which amount has also been subscribed under the Circular of the Company No. 42. The managers are confident that these extensions will earn the interest on the capital invested the first year and that developments which will result from the introduction of a railroad into New Mexico will soon make the property a profitable investment.

The character of the country through which the road passes is high upland, generally covered with grass and broken by mesas, with some scrubby cedar and pinon, except in the valley of the Purgatoire, 12 miles, where there is an average width of about one mile of arable land. The remainder is only suitable for grazing purposes. There is a reasonable supply of water. The road will pass through Trinidad, a trading town of considerable importance and from which a large business may be expected. In addition to this and what is of perhaps greater advantage to the road is the large supplies of excellent coal to be found at this place, and which can be mined and delivered on the cars of the company at about $1 per ton. As will be seen this will enable the company to furnish the settlers along its line with coal at a low price; an advantage which has long been needed and which will be much appreciated, and also of great pecuniary value.

The resources of this part of the country are very great, and consist in part of coal, timber (from the Raton Mountains), live stock, wool, hides, ore and bullion, and as a further business for the road there is a large amount of general merchandise, grain, machinery, etc., going West. As an example one commission house at El Moro estimates that they received from the East in 1877, 7,800,000 pounds of merchandise, grain, etc., and sent East 4,600,000 pounds of wool, hides, ore, etc. This is the business of only one house at one place. After crossing the State line, the point at which the New Mexico and Southern Pacific Railroad Company starts, and which is near the summit of the pass in the Raton Mountains, the railroad encounters its first piece of engineering difficulty, which is a tunnel through sandstone of about a half mile in length, and which is now being rapidly pushed to completion. The distance from the State line to Albuquerque, as shown by the preliminary surveys, is about 248 miles.

The character of the country from Trinidad to Albuquerque is mountainous and rocky except in the valleys of the rivers and creeks, where there is good arable land at present under cultivation. The uplands are excellent for grazing, and are now extensively used for that purpose. This whole country is excellent for cattle raising, and with the facilities which the road will give for transportation there is no reason why it should not be more generally developed for that purpose. The valleys of the rivers and creeks are at present quite extensively settled by a mixed population of Americans and Mexicans, the latter of whom live in the most primitive way, seemingly not having made any advance in civilization in the last century.

The principal resources of this Territory will be from the stock transportation and from its mines, of which there are many. At the present time a large portion of the stock is driven up from the Territory to the present line of railroad. This extension would of course take that business at its nearest points to the ranches, and by that means get the benefit of a long haul.

The mining business at present of necessity is quite limited, owing to the fact that ores have in many cases to be hauled hundreds of miles by oxteams before reaching railroad facilities, thus making it impossible to use low grade ores. The advent of this road will decrease the distance to be hauled, and, of course, the cost of transportation, thus enabling these low grade ores to be used, and also offering inducements to parties to open new mines, which at present could not be worked at a profit. In southwestern New Mexico there are very extensive copper mines of unlimited extent, and with them the only question is one of transportation.

Boston and Lowell and Nashua and Lowell Railroads.

It is generally understood that the directors of the Boston and Lowell Railroad Company have made a definite proposition, subject to the ratification of the stockholders, of the terms on which they will take a lease of the Nashua and Lowell Railroad for a long term of years. The offer is 6½ per cent on the capital stock, free of taxes, the purchase of some of its outside property, assuring its leases, etc. This proposition has been rejected by a majority of the directors of the latter road, and preparations are soon to be made to run each road separately at the expiration of the present joint contract in October. It is said that some of the Nashua and Lowell directors are very anxious to try this experiment, while others are very doubtful of the results.

With roads so intimately connected together in business, and after the experiences of a joint operation for over twenty years, separate operation is considered by many a bold experiment at this time. It has not yet received the sanction of the stockholders of the Nashua and Lowell, and is said to be a step taken by the directors without their advice. The attitude of the Nashua and Lowell directors toward the Boston and Lowell seems to preclude further joint operation, and if a lease fails, separation is unavoidable.

The Nashua and Lowell has a lease of the Stony Brook, the Wilton and the Peterborough road, and the last report informs us that $20,000 has been loaned the "Manchester and Keene Railroad" "by the directors," and "the directors are also under a verbal engagement by a vote passed for that purpose to furnish the further sum of $40,000 by way of loan" on certain terms, to be secured by a mortgage and a right to operate that road.—*Lowell Courier.*

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of June:

	1878.	
Gross receipts:	Month.	Year to date.
Railroad traffic.....	$1,267,874 35	$6,231,569 25
Canal traffic.....	179,741 92	881,133 00
Steam colliers.....	42,328 49	318,008 97
Richmond coal barges	8,713 96	43,719 56
Total Railroad Co..	$1,498,658 72	$6,974,430 78
Reading Coal & Iron Company.....	920,506 36	3,882,198 77
Total of all.....	$2,419,165 08	$10,856,629 55
Tonnage and passengers:		
Tons of coal on railroad.	754,658 15	2,958,661 03
Tons of merchandise...	253,552 18	1 825,625 03
Passengers carried....	589,975	3,568,306
Coal transported by steam colliers.....	51,416 00	319,028 00
Tons of coal mined:		
By coal and Iron Co...	333,193 06	1,377,003 08
By tenants.....	117,506 07	546,038 19
Total mined from lands owned and controlled by Co. & from leasehold estates.....	480,699 13	1,923,042 07

	1877.	
Gross receipts:	Month.	Year to date.
Railroad traffic.....	$1,027,313 75	$6,379,869 90
Canal traffic.....	115,329 82	406,070 07

Tons of coal mined:		
By Coal and Iron Co..	375,710 10	1,764,128 11
By tenants.....	108,761 02	678,514 16
Total mined from lands owned and controlled by Co. and from leasehold estates.....	484,471 12	2,442,643 07

☞ The following gentlemen have been elected directors of the Freehold and Jamesburg Agricultural Railroad Company: George B. Roberts, Strickland Kneass, J. W. Du Barry, Richard S. Conover, ex-Gov. Joel Parker, Lewis Perrine, J. S. Buckalew, Benjamin Fish, and Charles R. Bennett.

Chesapeake and Ohio Railroad.

When it was discovered that the large amount of Chesapeake and Ohio Railroad bonds held by the Newark Savings Bank were of questionable value, a committee, consisting of Messrs. M. R. Dennis, A. B. Baldwin, and Daniel Dodd, was appointed by the managers to go to Virginia, inspect the road, and ascertain the probable value of the bonds. In their report, which has just been submitted, the committee say that they found the road in a very much better condition than they anticipated. It was expensive to construct, but it is well built and remarkably well equipped. The line for two-thirds of its route has been laid with steel rails. At Richmond the company own extensive warehouses for the reception of freight and coal. The passenger traffic of the road is much larger than the committee has supposed, and the resources for freight traffic are all that can be desired. Bituminous coal of an excellent quality abounds to an almost unlimited extent between the Sulphur Springs and Huntington, and is now being extensively mined. It is expected that the company will derive a large revenue from the Cannelton mines alone, the coal obtained there being the best known for making steam and gas. At Quinamount one of the most extensive iron furnaces in the country has been in full blast all through the last five years of depression. In the Kanawha region are extensive salt works, the products of which find a ready market. During the Summer the passenger traffic is large to the White Sulphur Springs and other mineral springs on the western division of the road. Three through passenger and freight trains are run daily each way, and the present management of the road was found to be excellent.

The Standard Silver Dollar.

We have been patiently waiting to hear the comments of the nation upon the new standard dollar when it shall begin to circulate freely. But the Treasury has not found it desirable to disburse that coin freely, so the criticism proper as well as a little good natured merriment over congressional financiering must be reserved until later.

Let no one suppose by inference that the JOURNAL is hostile or even luke warm towards silver as a circulating medium. Nothing would be more unjust; for we have said heretofore and now repeat, that until we are able to offer our stock of the precious metals to other nations as freely in commerce as we offer other commodities the true balance of profit must be against us. The reason is a simple one. Gold and silver being the only recognized commodities universally interchangeable, whenever we are deficient—short—in those metals we must naturally become the debtor nation for a part at least of our foreign purchases. Iron and steel will not pay for what we buy in China, but gold and silver will because they, the Chinese, can in turn buy whatever they may want from other neighbors paying in the commodities (coin) they have received from us.

From this then comes the natural inference—whenever we buy from our neighbors we must pay in coin or its equivalent. And the value of the coin or precious metals is not an arbitrary one to be fixed by ourselves alone; because if we put too high a price upon our commodity (coin), our neighbor will then refuse to sell his commodity except upon an equal and fair valuation.

Had our last Congress reasoned in this way, or perhaps had the constituents of many members allowed them to reason at all, the present standard silver dollar of 412½ grains would never have been coined or made a legal tender.

We are a nation greatly given to experiments. This experiment with silver coinage was too plain a blunder; and whenever the dollar shall begin to move freely in trade we predict that its late earnest advocates will see and admit that 89 cents worth of silver cannot be expected to buy a hundred cents worth of any other commodity.

Give us dollars in unlimited quantity, we say, only make our dollars of such weight and fineness that all the world will accept them as readily as our cotton, wheat, or corn. Then we stand upon an equal footing with the commercial world. A debased dollar is not better for the purposes of foreign trade than our greenback paper promise-to-pay. Each one is worth only what we can buy with it. With either one we are the debtor nation.

When Congress shall meet again it is believed that a sufficient experience with the standard dollar will suggest new legislation concerning its weight. One effect of the present law will be to retain all the silver at home and export gold to pay foreign balances whenever the trade shall be against us. While the balance of trade is in our favor neither metal will go abroad, but it will be possible to ship us foreign silver coin at a profit since its bullion value is greater than our own silver coin. A silver dollar should be worth 100 cents.

Schuylkill Navigation Co.

The managers of the Schuylkill Navigation Co. have declared a dividend of one dollar and forty cents per share on the Common Stock for the year ending July 1, 1879, payable, clear of taxes, to the Stockholders on and after Monday, August 5, 1878, in six per cent scrip of the Philadelphia and Reading Railroad Company, bearing interest semi-annually, January 1 and July 1, and the principal redeemable July 1, 1882. Said dividends will be paid at the office of the Philadelphia and Reading Railroad Company, and those under ten dollars will be commuted in cash at the rate of sixty per cent.

Massachusetts Central Railroad.

During the past two months, as has been stated in the JOURNAL from time to time, meetings have been held by the various towns along the line of the Massachusetts Central Railroad for the purpose of ascertaining if the citizens were willing to transfer three-fourths of the capital stock of the road now owned by the towns to the treasurer of the railroad, under a stipulation that the company shall build and place the road in good running order within two years from date of agreement. The decision was almost without exception unanimous in favor of donating the stock, and at each meeting an agent was chosen to whom the stock was temporarily transferred pending the choice of a trustee.

The meeting of the representatives or agents of the towns took place at the office of the company, No. 10 Pemberton square, Boston, on the 24th ult., for the purpose of choosing a person to act as the trustee, and in that capacity hold the stock until the fulfillment of the agreement between the railroad company and the towns, and in case of such fulfillment he is authorized to transfer the said stock to the treasurer of the corporation. He will also hold in trust under the same conditions a large amount of the stock of the road now owned by private individuals. The meeting was a very harmonious one and the result was the election of Hon. Thomas Talbot to the position of trustee. A meeting of the directors of the company was also held on the same day, but no business beyond that of a routine character was transacted.

Delaware and Chesapeake Railroad.

Messrs. Hart, Huntington, Bates and Hildreth, the Boston capitalists, who lately bought the Maryland and Delaware railroad, also Governor Groome, who made the sale under a foreclosure of mortgage, arrived at Easton, Md. on the 24th ult., and on the following day Governor Groome formally delivered the road to the purchasers, all the forms having been complied with. A new company has been formed, with William T. Hart, of Boston, as president, and the name of the road changed to that of the "Delaware and Chesapeake." Superintendent John L. Caldwell and Secretary and Treasurer John W. Scott are retained in their positions. The road is to be put in complete order, and the trains run regularly to Oxford.

The Pennsylvania Railroads.

The annual report of the Secretary of Internal Affairs of Pennsylvania contains the following information in regard to the railroads of that State for the year 1877: The comparative statements of 161 railroads show that only $257,577,857 capital stock was paid in in 1877, against $486,419,097 in 1876, and their funded and floating debts were reduced from $448,824,000 to $301,805,088. Thirty-two declared no dividends, while there were only sixteen which failed to do so in 1876. The number of passengers carried was 19,878,811, against 51,829,822 for the previous year. Their tonnage fell off from 79,882,012 to 46,592,083 tons, while their expenses were reduced from $75,723,845 to $33,958,155, and their receipts from $125,789,841 to $42,078,109.

☞ The Michigan Central and the Lake Shore and Michigan Southern Railroads, under the new administration, have made arrangements by which competition between them will be avoided for the larger part of their local traffic. Both roads are to discontinue all agencies, passenger and freight, in Boston and New England; the Merchants' Dispatch will represent all the different lines that run over the Boston and Albany—Blue Line, Red Line and Canada Southern—in Boston, but the Boston and Albany is to attend to the agency business proper; and the Fitchburg Railroad will be expected to attend to that which passes by the Hoosac Tunnel Line.

☞ The second attempt to sell the New Jersey West Line Railroad under foreclosure of the $3,000,000 mortgage held by United States Senator Randolph on the 27th ult. was a failure. The highest bid was only $30,000. The attempt will be renewed on the 3d of August at the Essex County Court House, Newark, N. J.

RAILROAD EARNINGS—MONTHLY.

Cincinnati Southern Railroad.

The Trustees of the Cincinnati Southern Railroad have awarded the contract for finishing the road, according to plan No. 2, from Somerset to Boyce's Station, to R. G. Huston & Co., for $1,671,998, this being the lowest and best bid. The contract provides for the erection of thirty-four iron bridges and trestles and twelve wooden bridges; the road to be built by August 20, 1879, or a forfeit incurred of $1,000 a day thereafter until the road is completed. Ninety per cent of the estimates are to be paid as the work proceeds, 10 per cent to be retained until the road shall be accepted. The contractors receive pay in bonds at par or cash, at the option of the trustees. This action of the trustees necessitates an election by the citizens of Cincinnati, to vote yea or nay upon a proposition to issue $2,000,000 more bonds to complete the road.

Statement of the Public Debt of the United States, July 1, 1878.

Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $37,896,334 50; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $28,014,890 25.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 30th ult., the sixty-fourth call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 30th day of October next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 69,001 to 69,500, both inclusive; $100, Nos. 117,001 to 120,000, both inclusive; $500, Nos. 82,001 to 84,000, both inclusive; $1,000, Nos. 151,001 to 157,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,351 to 2,400, both inclusive; $100, Nos. 18,351 to 18,450, both inclusive: $500, Nos. 10,601 to 10,700, both inclusive; $1,000, Nos. 85,451 to 85,850, both inclusive; $5,000, Nos. 9,901 to 10,250 both inclusive; $10,000, Nos. 19,051 to 19,800, both inclusive.

☞ The net earnings of the Burlington, Cedar Rapids and Northern Railway for the year ending June 30, 1878, were $360,311 06; earnings last year $196,420 62—increase $363,890 44.

American Railroad Journal.

Saturday, August 3, 1878.

Financial and Commercial Affairs.

The past week has shown an activity in the Stock market far in advance of any week within the limits of the summer term, which is ordinarily dull enough throughout its length. While many well-known operators have gone to the hills or the seaside resorts enough have remained to create at times a very lively market, as on Monday when the total sales of shares at the Board amounted to 243,000, with Tuesday's sales 282,200.

Since our last the Secretary of the Treasury has made another call for five millions of 5 20 bonds. The interest on these bonds will cease ninety days hence. This makes $45,000,000 of public debt on which the rate of interest has been reduced 2 per cent since May 1. On $20,000,000 of this the reduction has been effected during the month of July. This makes the sixty-fourth call in regular succession, and leaves outstanding $62,000,000 of the 5 20s of 1865, new issue. The bonds called and outstanding now amount to $40,000,000, and are payable in amounts of $5,000,000 each, on 6th and 22d August, 5th and 20th September, and 11th, 17th, 23d and 30th October. The dates of call are 6th and 22d May, 5th and 20th June, and 11th, 17th, 23d and 30th July.

Nothing shows more plainly the very easy condition of the money market than this rapid reduction of 6 per cent to 4 per cent government bonds. The market is glutted with idle money and investors find the lower rate better than the risks of second-class securities bearing higher rates of interest.

Call loans we quoted last week at 1½ per cent for Government collaterals and 2 per cent for railroad and miscellaneous stocks. While there are more lenders than borrowers, we quote the rates unchanged.

Gold has remained steady during the week. A single advance of ⅛ was obtained but lost again, closing as at our last quotations, ⅛ per cent premium. Silver is quoted in London at 52¾d. and nactive; which rate governs our market. Further advices from London to bankers here report small but frequent losses of bullion by the Bank of England, and the prospect of an advance in the Bank's rate of discount at an early day. The outside banker's rate is now 3⅜ per cent for prime three months bills. British Consols have suffered another decline showing that this decline is the result of a more active demand for money.

In New York prime mercantile paper is scarce and the offerings are readily taken at 3@3½ per cent. It is stated that the buyers of new 4 per cents are not the holders of the 6 per cents called in. If this proves true of the majority a large amount of money will still continue in the market seeking investment. At present the investments are very largely in favor of government securities. The stocks and bonds of the miscellaneous list are carefully scrutinized now and few investments are made in other than those which have never defaulted in their payments. All other sales, almost without exception, may be marked as purely speculative. We quote Government securities at the close on Wednesday as follows:

United States 6s, 1881, registered, 107½@107¾; do. coupon, 107⅜@107⅜; 5-20s, 1865, new, registered, 102⅜@102⅝; do. coupon, 102⅜@102⅝; do. 1867, registered, 105@105¼; do. coupon, 105@105¼; do. 1868, registered, 107⅛@108; do. coupon, 108@108⅛; ten-forties, registered, 109@109¼; do. coupon, 109⅛@109¼; 5 per cents, 1881, registered, 106⅜@106⅝; do. coupon, 107⅜@107¾; 4½ per cents, 1891, registered, 104¾@104⅞; do. coupon, 104¾@104⅞; 4 per cents, 1907, reg., 100⅛@100⅜; do. coupon, 100½@100⅝; sixes, currency, 120½@121.

The active speculation for the week at the Stock Board has been limited to a few Western railroads as heretofore. The Chicago, Milwaukee and St. Paul, Chicago and Northwestern, and Lake Shore have shown sales in excess of all other dealings. Fluctuations to the extent of 2@4 per cent each day have been the rule. Very large blocks of stock have repeatedly changed hands, but no failures have been announced. This entire traffic is purely speculative, and the fluctuations from day to day have slight foundation in fact beyond the rumors of the street.

From Boston Money is quoted firmer and in good supply and demand. Boston capitalists are largely interested in Kansas Pacific bonds, also those of the Denver roads. When Secretary Schurz's decision in the matter of the pre-emption of railroad lands was published it was sharply attacked by the Boston press. They urge that the grant by Congress was absolute, in which case the lands could not be forfeited, consequently the Secretary is in error and his decision must be reversed. We noticed the matter editorially in our last issue, but since so much prominence has been given to it we add briefly, that by the Secretary's decision there is no forfeiture of the grant. Nor is the railroad loser except in prospective profits. The money, $1 25 per acre, received from all sales is paid over to the roads, and this is the value of the lands when given by Congress to the roads. The right of pre-emption was held in abeyance from the date of the grant until three years after the completion of the road; after that time had elapsed all lands remaining unsold and not disposed of should be again subject to pre-emption. On the part of the Boston interests it is said the lands have been mortgaged and that is an estoppel against pre emption; the lands have been "disposed of." A mortgage is an incumbrance, a lien, but not a disposal or conveyance. The title remains, together with possession of the property, as at first. If the bondholders accepted the mortgage without examining the conditions of the grant they acted unwisely. No great loss can ensue since the money received whether by the railroad or Federal officials is paid over to the road.

Philadelphia reports place Money in large supply with slight demand. More activity was shown in Stocks and a slight advance marked, closing with more firmness. Considerable sales of Pennsylvania Railroad shares were made at 31¾@32⅝. At the close prices were 32⅝ bid and 32¾ asked. In Philadelphia and Reading sales were reported at 18¼@18⅜—a slight advance. Lehigh Valley was quoted at 40.

From Baltimore there is a steady market reported with moderate sales and closing dull. Baltimore and Ohio nominal. Rates named are 85@90; but a small lot was offered at 88 and no sale. Scrip was quoted at 89—a decline of 1 per cent. Northern Central 14¼@14½. B. and O. bonds firm; 1885s were 105 bid.

Sterling Exchange was dull and lower for time bills, but slightly higher for sight. We now quote 60 day bills at 4 81½@4 81¾; sight at 4 85½@4 86; cable transfers at 4 86¼@86½.

Exports of domestic produce, exclusive of specie, for the week have been $7,460,868.

Domestic Produce closed steady. With the exception of a Milwaukee "corner" in wheat there has been nothing worthy of extended notice. The damage to crops in the Northwest was magnified in Wall street and helped the designs of the bear interest for a time. Subsequent reports have corrected the first alarm. Cotton has been in better demand and larger sales to spinners were made than for some weeks prior to the last. The prices have advanced several points both for spots and futures. We now quote, futures for August, 11.85; for September 11.50; for October, 11 30; for November, 11.22 and for December, 11.19. The first bale of Georgia Cotton was sold to-day for 19 cents.

An advance of freights by the Union Pacific and Central Pacific railroads from $6 to $12 per 100 lbs. from New York to San Francisco caused sharp comments on the part of shippers. The road defended this action by saying that heretofore their freight had been small packages of light goods and valuable parcels, whilst other freights less valuable went via the Isthmus or by clipper. The carriage of small packages did not alone pay, hence the advance on first class rates.

Metals remain unchanged; and except in Lead, a sale of 50 tons domestic, sales have been in a retail way. Our quotations for American and Scotch pig iron are unchanged. New iron Rails $32@$36; Old Rails at $17@$18; Steel rails at $44@$45.

Ocean freights have been irregular with an advance in grain rates to Liverpool. Engagements have been made at 7⅛d. by steam. Cotton by sail to Liverpool 7 32d. To London by steam 7¼d. for grain, and flour 2s. 3d. Flour to Glasgow by steam 3s.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Pacific 1st mort., 84; Central of New Jersey consol., ass., 71; Syracuse, Binghamton and New York 1st mort., 103⅛; Winona and St. Peter 1st mort., 100⅛; do. 2d mort., 88⅛; Lehigh and Wilkesbarre consol. ass., 50; Cedar Falls and Minnesota 1st mort., 89; Rensselaer and Saratoga 1st mort., 116; Louisville and Nashville 2d mort., 87; Detroit, Monroe and Toledo 1st mort., 110½; Morris and Essex const. bonds, 86; New Jersey Southern R. The Proposed Freight Track in West Street.

The reasons given by the New York Central and Hudson River Railroad Company for not availing itself of the privilege recently accorded to it of running dummy engines through West street to the Battery on the track of the Belt Line, and of making branch tracks to the steamship piers, is that the necessary arrangements are not yet complete. The agreement with the Belt Line is not made, though it is under consideration. The piers are either not large enough or not strong enough for the company's purpose. The National line has declined to enter into the arrangement, because their pier is not large enough to accommodate the dummy engines without interference with the company's business. The Inman company's dock is being repaired. So far the White Star line is the only one that has availed itself of the opportunity to have a branch track laid to its pier. Most of the other piers will require strengthening before engines can be run on them.

☞ The officers of the Celina, Van Wert and State Line extension of the Columbus and Northwestern Railway Company, elected on the 15th inst., are: H. C. McGavern President, I. N. Alexander Secretary, and W. H. Pennell Treasurer. The office of the company is at Van Wert, Ohio.

☞ The Hinkley Locomotive Works, which have just started up, have orders for one locomotive a week for the next three months, and have just added a hundred hands to their working force.

☞ At the annual election of the Central Pacific Railroad Company in San Francisco on the 30th ult., the following gentlemen were chosen directors for the ensuing year: Leland Stanford, C. P. Huntington, E. W. Hopkins, T. H. Miller, Jr., Charles F. Crocker, David D. Colton, and Charles Crocker.

A Steam Plow.

The largest plow ever built has been constructed for the Chicago, Milwaukee and St. Paul Railway Company to use in ditching for railway construction in Iowa, to be drawn neither by horses, ox or mule, but by a locomotive. The dimensions of this steam-pulled ditcher are given as follows: the share weighs 382 pounds, the mold-board, 182 pounds, the beam 900 pounds, the coulter and clasp 180 pounds, the clevis 60 pounds, the standard 134 pounds. The beam is 16½ feet long, 10 inches wide and 17 inches thick; the mold-board 8 feet by 26 inches; share 5½ feet by 12 inches. It will cut a furrow 37 inches wide.

Safety Lamp for Railroad Cars.

A Connecticut inventor has devised a safety lamp for railroad cars. A kerosene lamp is placed outside the car at one end, throwing its light by a reflector into a tube a foot and a half in diameter, which runs alongside of the ventilating deck. At intervals the tube is "tapped" for light, a system of reflectors distributing the light through the interior of the car. An attachment is provided which extinguishes the light the instant the lamp is off its balance, so that in the event of an accident, it is claimed that no fear of fire need be apprehended. The tube conducts the light so admirably, it is said, that fine print can be read at a distance of forty feet from the lamp.

☞ Advices from Rio de Janeiro to July 6th say that several American gentlemen arrived at Rio by the City of Para, as representatives of a syndicate of Philadelphia manufacturers, and with the object of inducing purchasers to deal directly with these manufacturers and dispense with the intervention of the commission houses. The Anglo Brazilian Times pronounces this enterprise impracticable.

☞ The following is a statement of the east bound freight on the Central Pacific Railroad for June, 1878; from San Francisco, 8,482,307 lbs.; from Sacramento, 637,249 lbs.; from San Jose, 58,120 lbs.; from Marysville, 65,343 lbs.—total, 9,247,608 lbs.

☞ Chief Engineer Roberts, of the Northern Pacific Railroad, started a full party for a preliminary survey of the Cascade range from Tacoma on the 22d ult. They took the field at Orting, on the Puyallup, intending to make an exhaustive survey of the Cowlitz Pass.

☞ The Camden and Atlantic Railroad Company has made arrangements to have close connections made from New York to Atlantic City by the Pennsylvania Railroad Company, by which passengers leaving New York at 12.55 P. M. reach Atlantic City, via Camden Junction, at 5.45 P. M.

☞ Fred. Wolffe, Financial Manager of the Alabama and Great Southern Railroad, has settled to the full amount due by John Swann, purchaser of the Alabama and Chattanooga Railroad, in accordance with the decree of the Court.

☞ The Brooks Locomotive Works, Dunkirk, N. Y., have contracted to build six engines for the Springfield, Jackson and Pomeroy Narrow Gauge Railroad, three of which are passenger and three mogul engines.

Euphrates Valley Railway.

The London Morning Post thus speaks of the importance of developing the resources and utilizing the material wealth of Asiatic Turkey, by the construction of this long-projected railway. It says:

Turkey in Asia, embracing within itself the temperature of every clime, and enjoying a fertile soil, is capable of producing the products of every climate. As it is, cereals of every kind are found in abundance. Cotton, wherever cultivated, has proved very successful. Silk is furnished with facility in an extensive region starting from Diarbekir and going down to the Black Sea. Opium, rice, gall nuts, many varieties of dyeing woods, and many other products of agriculture, are cultivated in quantities which more than meet the demands of commerce as it exists, and yet not one quarter of the land capable of producing is under cultivation. Extensive forests of oak, pine, beech, ash, cedar, walnut, chestnut now grow but to rot away. The mineral wealth of the land is, so to speak, untouched, though known to be abundant. The only metal extracted from the earth is copper; yet lead, silver, iron, coal, and mercury are known to exist in abundance. It can be truly said of Asiatic Turkey that its impoverished population treads in its misery on gold. Efforts to develop the agriculture resources of Turkey by means of lines of railway have been attempted and have not proved very successful as yet as commercial enterprises, but the reasons are obvious—none of the lines hitherto constructed have pierced sufficiently far into the country to tap the sources of wealth. They require extensions and feeders; they must be not the mere outlets of limited districts, but arteries running through the entire country. A line which was to run across the whole extent of Asia Minor was projected by the late General Chesney and by Sir John M'Niel. The object of this line was to connect England with India by the shortest overland route, and this was its sole object. It was to be a railway for India and not for Turkey. When projected the necessity of developing the resources of Asiatic Turkey to meet political exigencies did not exist. The project was keenly discussed, closely examined, and abandoned. There appear to have been too many risks attached to the construction and maintenance of such a line to give it a chance of meeting with favor. Political events have since this line was projected so altered the condition of national interests, wars have so changed the geographical outlines of empires, that the line which 20 years ago appeared as an uncertain and problematical and remote necessity has become an urgent requirement.

Union Pacific Railroad.

The fourth annual drawing of numbers for the redemption of one per cent of all the outstanding sinking fund bonds of the Union Pacific Railroad, took place at the offices of the company in Boston on the 24th ult. The bonds having been above par within the past sixty days there was not much interest in the drawing, it being optional with the holders of the bonds drawn whether they present them for redemption or not. If the bonds should happen to fall below par, the holders of fortunate numbers will undoubtedly avail themselves of the opportunity to realize the difference between the market price and par, especially as the drawn bonds, if not presented for redemption, cease to be a good delivery in the New York Stock Exchange. As provided by the Sinking Fund, the drawing took place in the presence of E. B. Wesley, a member of the Union Trust Company of New York, which is the trustee of the bondholders; Elisha Atkins, Vice President of the Union Pacific Railroad Company, who drew the numbers; Henry McFarland, the Treasurer, and James G. Harris, a Notary Public, who turned the "wheel of fortune" in which the numbers were placed. The required number, 140, were drawn in exactly twenty minutes, as follows:

7,941	9,226	1,412	8,203
6,000	6,879	4,288	11,229
4 202	8,697	2,823	13,472

The Lodi Extension Railroad.

After a comparative slumber the old project of the extension of the Chicago and Northwestern Railway from Lodi to this city, has been revived. The length of the road will not exceed 75 miles, but we have considered it of very great importance, as it would make Milwaukee the terminus of the freight traffic of the Chicago and Northwestern Railway, and debouch into this city the vast business of its Minnesota and West Wisconsin lines, even at the present time covering 900 miles of railway, and when the Winona and St. Peter Railroad is extended through Dakota to Bismarck, it will add 1,200 miles to the present railroad system which now centers in our city. This additional mileage will of itself be an immense benefit, but the paramount advantage to Milwaukee lies in the fact that it will terminate in this city two great competing lines, so that the business of Milwaukee will not be dependent upon the management of one company. This will go further to make Milwaukee a metropolitan city than any other cause.

We have two great competing lines to Chicago, and everyone can perceive the advantage which has resulted to us thereby. We have two competing lines to the west; that will be secured by the completion of the Lodi extension. Whether the building of that road will be undertaken is yet in doubt. The Chicago and Northwestern Railway is inclined to do it, and can do it, as its finances are just now in excellent condition; but will the company start? that is the question.

The directors have sent a communication to the Milwaukee board of trade, and a committee, consisting of President Ray, O. J. Hale and Wm. P. McLaren, has been to Chicago to consult with President Keep. The directors feel that Milwaukee should offer some pecuniary aid; not to a large amount, but sufficient to show an interest in the undertaking. A subvention of $200,000 is spoken of. That is certainly not a great deal for so important an enterprise, and in view of the valuable results which would flow therefrom. But people think twice before they tax themselves now a days. If the proposal was to endorse bonds of the Chicago and Northwestern Railway to the amount of $200,000, we think it would readily carry, or even a proposition of $100,000 of direct aid. That would be evincing our good will and that is what the company want.

We hope that some arrangement will be perfected by which this road can be constructed at once. It would complete our railway system, and render our future growth such a positive certainty that it could not be diminished by the competition of other cities. Our citizens should understand that the line is rather an expensive one, for in some portions of Dodge county the grading is very heavy, and, even in these low priced days, we do not think the road from Lodi to Germantown where it joins the Fond du Lac Air Line could be completed with the steel bar rail, for less than $20,000 per mile; so it would cost the Chicago and Northwestern Railway $1,500,000, to lay down this line into Milwaukee, and the directors hope that one-eighth of that sum will be contributed by this city. An opportunity of this character should be well considered before it is allowed to pass.—*Milwaukee Wisconsin.*

Color Blindness and its Dangers.

The Royal Academy of Belgium, says Galignani's Messenger, has just published the report of a committee appointed to consider the subject of color blindness, in which safety of the traveling public is so largely interested. The first question it had to consider was whether Daltonism is inherent to the constitution of the person affected by it, or whether it can be contracted accidentally? To that inquiry the committee replies that the defective vision may arise from a serious illness, bruises or wounds on the head, the abuse of tobacco or the immoderate use of alcoholic drinks, and it therefore recommends the periodical examination of all persons who have to deal with colored signals. The second question was, can any practical and efficacious means be discovered to show that an agent is manaced with the loss of perception of color? To that the answer was that, as color-blindness is often only partial, accidental, or momentary, no such means exist.

But the committee proposes a method to prevent accidents occurring through the defect in question. It consists in adapting to every locomotive a rapidly analyzing apparatus which suppresses, even for those whose vision is defective to the highest degree, the possibility of confounding red or green with any other color. The apparatus consists of two glasses, one green and the other red. The moment the driver has the slightest doubt as to the color of a signal all he has to do is to look through those glasses. Seen through the red glass, the signal of that color will acquire more brilliancy, and will form a stronger contrast with all the rest of the visual field, because it hinders the passage of the other colored rays of light. On the other hand if a green signal is observed through a red glass the light is extinguished, apparently, as the blue and yellow rays which compose it cannot traverse the red of the glass. The same effect is produced in the opposite direction by the green glass, which prevents the passage of the red rays, and consequently a light of that color becomes almost, if not quite invisible. That means of determining signals, although infallible in daylight, is not so efficacious at night, but would nevertheless be a great protection to the traveling public.

☞ Wm. Gilmore of Baltimore has been chosen Vice President of the Baltimore and Delta Railway Company. Major Dandridge is reported to be pushing forward the location of the road, and expects to complete it by the middle of September, the engineer being now in Summerfield Valley, near Cromwell's bridge, working in the direction of Baltimore.

Crusade against Labor-Saving Machinery.

In some of the Western States recently there have been menacing demonstrations against labor-saving machinery, and even actual destruction of such property, by bands of laboring men. The hostility to labor-saving machinery is so old that it might have been thought it would have worn itself out by this time. But ignorance is ever fresh, and it takes up the most antiquated and exploded fallacies with complete confidence in their soundness. It should not be necessary at this day to contend seriously for the proposition that labor-saving machinery benefits the working classes, but when we find demagogues encouraging the belief that this, like other forms of invention, is somehow only a sinister device of "capital" to oppress the working classes, it becomes requisite to meet the heresy plainly, and to controvert it, if for the ten thousandth time.

Perhaps as good a way as any to show the unreasonableness of the resurrected clamor against machinery is to demonstrate what the world would be without it. We know what the condition of the workingmen was in Europe before machinery was brought into use. The cost of production was then so high as to limit its extent. Manufactures could only be carried on in a very small way, and consequently a comparatively small percentage of men could find employment at remunerative wages. In those times, moreover, whoever worked for wages was compelled to work very much harder than is necessary now. Every process almost had to be performed by manual labor. The lot of the working man was infinitely harder than at present, and because trade was poor and dull wages were low, and living full of toil and hardship. Since the introduction of machinery the condition of the working classes has been steadily improving. The impetus given to production by new processes has vastly enlarged the area of trade and manufacture, provided employment for millions who could not have earned their living at all under the old conditions, raised wages, and rendered the work far easier to all concerned.

If we desire, however, to know how a country flourishes without labor saving machinery, we have only to turn to China to satisfy ourselves. It is singular that those who are fondest of the saying "The Chinese must go" should have hit upon so thoroughly Chinese a theory about machinery; but so it is. In China both the people and the Government have set their faces steadily against the introduction of all kinds of machinery. They will have none of it. Every description of labor is performed manually. Even beasts of burden are regarded with disfavor, and men may be seen between the shafts, or acting as mules and pack-horses. So general and deep seated is the Chinese repugnance to whatever saves labor or cheapens production, that in many provinces they have suffered the canals to become choked up, and have even destroyed valuable irrigation works. They would not permit railroads to be built, and when a short line had, in the face of great difficulties, been completed at Woosung, the Mandarin governing the district was ordered to buy the railroad and then to have it destroyed. And now what are the effects upon the country of this long-continued and rigorous carrying out of the anti-machinery theory? Travelers tell us that the condition of the masses in China is deplorable. The struggle for existence there is more desperate than in any other portion of the globe. And when from any natural cause a failure of the crops occurs, the inevitable result is a devastating famine. Such a famine, appalling in its consequences, is ever now blasting whole provinces in China. It has been asserted upon good authority that within the past year not less than five millions of people have starved to death. That is to say, a number equal to one-eighth of the entire population of the United States have perished from hunger. This awful destruction of human life is mainly attributable to the policy which some of our workingmen are at present advocating here. The rooted hatred of the Chinese to all labor saving machinery resulted in leaving them without any adequate means of transportation. They had neither railroads nor canals, and when the famine came upon them there was no way of relieving the suffering people.

During the last famine in India the Government was enabled to save hundreds of thousands of lives by pouring supplies into the interior districts over the railroads. But for these means of rapid transportation the loss of life might have been as great as it has been in China. The Chinese have refused to have any machinery, and one result is that famine finds them defenseless. Nor are the Chinese working classes any better for the absence of machinery in other ways. Civilization has stagnated with them. Though they possess a really admirable educational system, and though there is probably far less dense ignorance among their masses than exists in many European countries, they find it impossible to do more than secure a bare living, and old age usually finds them destitute and dependent.

If machinery could be abolished in America tomorrow, if every power-loom and patent reaper and header and thrasher and lathe and engine and press could be destroyed, the effects would be simply fatal to the prosperity of the nation. Instead of there being more employment for labor there would be less. Capital would no longer be able to embark in extensive productive enterprises. Society would revert to primitive—that is, savage—conditions. Every man would have to depend for his living upon what he could produce himself. Accumulation would cease. The arts and luxuries which stimulate industry and enlarge the field of labor, would perish. Civilization would be arrested, as it has been in Asia, and the great republic would sink into impotence and insignificance.

It is time that such rudimental truths as that of the value and beneficence of labor saving machinery were generally comprehended. It is a direct impeachment of the intelligence of working men who belong to a country the prosperity and rapid progress of which have been caused by this agency, when they clamor for a return to the old barbarous methods of production and manufacture. If it had not been for machinery the United States would never have attracted the population or amassed the wealth it has done. Machinery has raised the working man higher than he has ever stood before in the world's history. Despite all the loose talk of the hour about the wrongs of labor, we do not hesitate to assert that the condition of labor is to-day more satisfactory in all respects than at any previous period. Temporary business stagnation, strikes and lock-outs do not refute this statement. They are ephemeral phenomena, and will disappear. But there is no danger that labor will be forced to part with any of the great advances it has secured during the last half century, and it is to be hoped that among its other advantages it will soon learn the folly and inconsistency of quarreling with its best friend, labor-saving machinery.—*Sacramento Record-Union.*

The Holly System of Heating.

Since the mill explosion the millers' attention has been drawn to some plan for heating the vast institutions located at the falls which would lessen the danger from fire. A plan has been proposed by Messrs. Bennett, Osborne & Co., of St. Paul, who are busily engaged in talking up a stock company for the erection of a steam boiler house on Spirit Island in the river, from which it is proposed to lay steam mains, and supply the mills with steam upon much the same principle as gas and water are supplied to cities. It is believed that all the manufactories can, by reason of their location, be supplied from this source, and steam power also be at the command of establishments located within a short distance. The feasibility of the system itself, it will be remembered, has been demonstrated at Lockport, N. Y., by Holly, the inventor of the Holly system of water works. The millers propose to own the works, which are to cost about $15,000. Messrs. Bennett, Osborne & Co., make a proposition by which they agree to superintend the work for 5 per cent of the cost, and are to operate the works six months free of charge. The project has just been put upon foot, but it is understood that Gov. Washburn has already signified his intention to take one-fourth of the stock.—*Minneapolis Tribune.*

The Coal Trade.

For the week ending July 20, the total anthracite production, as reported by the several carrying companies, amounted to 491,445 tons, against 461,262 tons in corresponding week last year, an increase of 30,183 tons. The total amount of anthracite mined for the coal year is 7,718,186 tons, against 10,481,242 tons for same period last year, a decrease of 2,763,053 tons. The quantity of bituminous coal sent to market for the week amounted to 72,925 tons, against 31,389 tons in corresponding week last year, an increase of 41,536 tons. The total amount of bituminous mined for the year is 1,673,148 tons, against 1,706,406 tons for corresponding period last year, a decrease of 33,258 tons. The total tonnage of all kinds of coal for the week is 564,370 tons, against 492,651 tons in corresponding week last year, a decrease of 71,719 tons. The total tonnage of all kinds of coal for the coal year is 9,391,334 tons, against 12,187,648 to same date last year, a decrease of 2,796,314 tons. The receipts at Perth Amboy for the week ending on Saturday, July 27th, were 12,875 tons, the shipments 13,998 tons, leaving a stock on hand of 89,000 tons, against 114,000 tons at same date last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of July was 91,712 tons, of which 73,058 tons were coal, and 18,654 tons coke. The total carried for the year is 2,568,400 tons, of which 2,002,459 tons were coal and 565,941 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, July* 29.

Wine Product of France.

According to Galignani's Messenger the following are authentic details of the production of Wine in France:

The culture of the vine extends over 2,600,000 hectares (2½ acres) of territory. The average yield of wine during the last ten years was 59,338,000 hectolitres (22 gallons), or 21½ hectolitres per hectare. The vintage in 1875 amounted to 83,362,000 hectolitres, which was the largest ever known. The average annual production of Bordeaux wine, that grown in the Department of the Gironde alone, is 2,400,000 hectolitres. Burgundy, represented by the Departments of the Cote d'Or, Rhone, Saone-et Loire, and Yonne, produces 3,874,000 hectolitres. The most renowned of the vintages are those of Chambertin, Clos-Vougeot, Romanee, Conti, Corton, Pomard, Meursault, Montrachet, Beaune, Nuits, &c. Champagne wines come from the Department of the Marne alone. The yearly production is 448,000 hectalitres. The number of bottles exported in the ten years, 1868 to 1877, was 147,000,000. Notwithstanding the large production in France, a considerable quantity of foreign wine is received from Spain, Italy, and Portugal in particular. Those imports amounted in 1877 to 676,401 hectolitres, but about 300,000 hectolitres were re-exported.

☞ A Narrow Gauge Railroad has been proposed in Gautemala, and agents are now in San Francisco for the purpose of interesting capitalists in the scheme. It is understood that a section of thirty miles, to penetrate the coffee region will be first built, and, if successful, the road will be extended to the capital of the State. Should the necessary capital be secured in San Francisco, it is claimed that the trade of Gautemala will be attracted to that city. If the necessary aid cannot be secured there, an appeal will be made to the capitalists of the East or of Europe

Trial of Steam Road Wagons.

A year or two ago the Wisconsin Legislature offered a prize of $10,000 for a perfect steam wagon for general agricultural and hauling purposes, to be able to stand such tests as a board of three commissioners should propose. Among other things, the contesting machines were to make a 200-mile trip along the country roads of the State, due north and south, haul a heavy wagon behind them, be able to plow, run threshing machines, and perform other feats such as the ingenuity or wisdom of the commissioners might suggest. The commission was duly appointed, and met at Green Bay, Wis., on the 15th ult. There were but two entries, the "Oshkosh," by Schomer & Farrand, of Oshkosh, and the "Green Bay," by Cowles Bros., of East Green Bay. The latter machine met with several accidents, which detained it on the road, but the former made the trial trip according to the conditions named, traversing the distance between Fort Howard and Madison, 201 miles, in 33 hours, 27 seconds, or six hours less than the time required by the specifications, which called for an average speed of five miles an hour. At various points along the line, however, it attained a much greater speed, in one instance making 21 miles in 2 hours 10 minutes, and on the Oshkosh race course doing a mile in 4.36. At Fort Atkinson it was attached to a gang of two plows, and turned over a goodly portion of a two-acre field. The machine weighs 4,800 pounds; with water and coal for eight miles, 6,600 pounds, and hauled throughout a wagon weighing 3,500 pounds.

☞ According to a cable dispatch from London, England, to the Toronto Globe, arrangements have been concluded between the Great Western and Canada Southern Railways for a division of the entire competitive traffic. An improvement in the rates and reduction of working expenses of the roads is anticipated.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE GRAND CENTRAL DEPOT, NEW YORK, June 28, 1878.

THE DIRECTORS OF THIS COMPANY have this day declared a dividend of ONE Per Cent. upon the capital stock, payable on the first day of August next at the office of the company in Grand Central Depot.

THE TRANSFER BOOKS will be closed at 3 o'clock P. M. on Friday, the fifth day of July next, and will be re-opened on the morning of Monday, the fifth day of August next.

E. D. WORCESTER, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.

FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.

WHEELS and AXLES FITTED COMPLETE.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

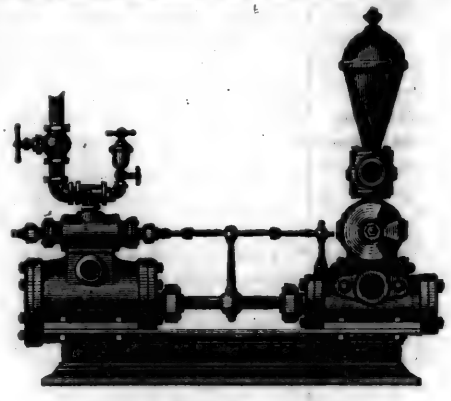
RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.
PERKINS, LIVINGSTON, POST & Co.,
93 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.



Railroad officers desiring further information will please address

New York, Saturday, August 10, 1878.

Federal Centralization.

It was a wise proceeding on the part of Congress to endeavor to reach the real views and desires of the leaders of the so-called Labor Party. The Committee appointed by the House of Representatives at its last session, of which Mr. Abram S. Hewitt is Chairman, is now occupied with hearing the complaints of workingmen in this city.

The entire programme of reforms desired by the gentlemen and ladies—for the female reformers are among the most energetic and outspoken who have appeared as witnesses before the Committee, and who will yet testify—when arranged in suitable form for consideration will be indeed a curiosity.

The wildest vagaries of the intelligent lunatic are scarcely more impracticable than some of the ideas here advanced by the not intelligent sane. From beginning to end the burden of complaint is a want of centralization in the Federal powers. These reformers invariably desire to make the national government own and manage all the present enterprises of private life. They desire to put the nation under such a government as to become in practice a commercial association, having all things, if not in common, in such condition that there shall be nearly or absolutely an equal distribution of wealth. In short, they propose to have no rich and no poor; and all this from the peculiar workings of a governmental scheme that never had and never will have any permanent existence outside of their own brains.

From manufacturing pianos to loaning each and every man $500, who lacks that desirable amount, were the propositions gravely made to the Committee as matters proper and desirable for the Federal government to undertake. If closely questioned these reformers would no doubt endeavor to fix some limit to governmental undertakings; although it is not probable that any two of them would agree upon the point just where to draw the line.

But the present movement has its value in showing to all sober sensible men the absurdities and impossibilities of the theories used by ignorant or designing men to disturb the quiet and harmony of our republican community and its institutions.

Centralization in the months of the reformers means dependence. The poor man, the workingman according to their theories, should look only to the government for employment and support. And who pray is to support the government? Why the wealthy classes. And in what way are the wealthy classes to be reimbursed for advances made or for extraordinary taxation? They will still have enough left them and should be satisfied with that.

This is the reasoning recently made in public by one of the advocates of Labor Reform. Scrutinize the whole ground carefully and see what the result must be. The conclusion is simple and inevitable. First pauperism; finally national disintegration and possible anarchy.

As a rule the men advocating these peculiar ideas are totally ignorant of the spirit of republican government. We have learned by experience that when the governing power has fixed the political equality of all men it is best to stop at that. Whenever the government goes farther and enters the field of private enterprise, to just that extent will the government cripple and hinder the prosperity of those who form an integral part of itself. It is "robbing Peter to pay Paul," while neither Peter nor Paul can gain from it.

Political equality with personal independence of thought and enterprise are the causes that have made us what we are as a nation. Dependence either personal or national is not in unison with American republicanism.

Social equality—and this is what these reformers are really striving for—is beyond the power of a republican government. Where manhood is lacking no legal enactment can create it. Brains and industry will inevitably win, and they ought to. Give all men an equal chance with their heads and hands, and having done that we are sufficiently governed. There will be rich men, so there must be paupers, because it is the result of natural laws which no human laws can alter. There was a deal of hard sense and truth in the reply of an English King to one of his humbler subjects whom he was about to reward. "What shall I do for you?" asked the King. "Make me a gentleman," was the reply. "I can make you a knight but only God Almighty can make you a gentleman."

And there lies the origin of this so called Labor Reform. Worthy honest men ask the law to make them that which can only come from a Higher Power.

☞ The Hartford Evening Post says it is now understood that Boston capitalists have made arrangements for furnishing the necessary funds, $2,500,000 for taking up the Hartford, Providence and Fishkill Railroad bonds the 1st of October. The security which will be given the Boston capitalists will, without doubt, be the new issue of $10,000,000 New York and New England bonds, on which the company asked the $6,000,000 loan from the State of Massachusetts last winter, but which was declined by the Legislature. The $10,000,000 issue, it is stated, will be ready for the market before long, most of them having been

signed. Doubtless they will be considered good security for the proposed Boston loan.

St. Louis, Alton and Terre Haute Railroad.

The following circular has been issued by the president of the St. Louis, Alton and Terre Haute Railroad to the holders of coupons due on August 1 on its second mortgage preferred bonds:

ST. LOUIS, ALTON AND TERRE HAUTE R. R. Co., No. 12 WALL ST. NEW YORK, Aug. 1, 1878.

This company regrets to inform the holders of coupons due August 1 on its second mortgage preferred bonds that, owing to the refusal of the Indianapolis and St. Louis Railroad Company (the lessee of its main line) to pay the rental due, it is unable to meet those coupons promptly. The rental due from the lessees up to this day amounts to over $150,000, and this company is now taking steps to enforce its rights against its lessees and their guarantors. These latter are well able to meet their obligations, and the company is advised that its rights as against them are well defined. It is believed the delay in the payment of the coupons referred to will not be of long duration. W. BAYARD CUTTING, President.

The $150,000 referred to above is made up of two notes of back rentals (for May and June) which have been protested, and two notes for the rental due June and July, which the Indianapolis and St. Louis Railroad (the lessee) refused to give. The guarantors are the Pittsburg, Fort Wayne and Chicago and the Cleveland, Columbus, Cincinnati and Indianapolis railroads.

Rutland Railroad.

At the annual meeting of the Rutland Railroad Company, held at Rutland, Vt., on the 30th ult., the President presented the statement of the Treasurer, as follows:

CREDIT.

Capital stock	$2,480,600 00
Preferred capital stock	4 000,000 00
Bonds, mortgage equipment	1,000,000 00
Bonds, 1st mortgage	1,500.000 00
Dividend, scrip outstanding	217,392 18
Coupons unpaid	8 257 00
Bills payable	363,228 07
	$9,564,477 25

DEBIT.

Construction account	$8,865,487 76
Real estate	115,925 87
Addison Railroad stock and securities	339,500 00
Mortgage bonds on hand	230,700 00
Rent due and unpaid	11,500 00
Cash	1,363 62
	$9,564,477 25

The rent of the Rutland and leased roads for the current year has been paid. The receipts for the year ending June 30, 1878, were as follows:

From cash on hand	$2,876 90
Rent of roads	306,000 00
Rent of real estate	554 75
Interest on receivables	13,293 45
	$322,725 10

The disbursements were as follows:

For coupons on equipment bonds	$75,000 00
Coupons on mortgage bonds	106,040 00
Interest account	37,975 94
Rent of leased roads	70,959 78
Salaries and miscellaneous expenses	16,166 52
Taxes for 1875-76-77	15,219 24
Cash	1,363 62
	$322,725 10

On motion of General Whitney it was voted that "it is expedient for this company, and the board of directors are by this vote authorized and empowered, to issue the bonds or notes of the company in sums of $100, $500 and $1000 each to an amount not exceeding $1,500,000 and bearing the date which said board of directors may determine by their vote, said bonds to be made payable in twenty years, and bearing interest at a rate not exceeding five per cent per annum, and payable in the city of Boston, and to secure the payment of such bonds and interest by a mortgage upon the railroad and personal property of the company, subject to the prior existing liens, until the same shall be retired or exchanged for the bonds issued under this vote; and the President and Treasurer are hereby authorized to sign and append the corporate seal of this company to such bonds and mortgages, and to issue such bonds when directed so to do by the board of directors."

The following gentlemen were then elected directors for the ensuing year: John B. Page, John Prout, James H. Williams, James W. Hickok, E. A. Birchard, Jacob Edwards, James S. Whitney, Edward S. Moseley, George W. Gill.

At a subsequent meeting of the directors John B. Page was re elected President and J. H. Williams Clerk of the board. The Treasurer and Clerk of the corporation hold over without an election.

New Routes to Brighton Beach.

Two changes have recently been made in the way to reach Brighton Beach.

The first and most important is the connection of the Long Island and Brooklyn, Flatbush and Coney Island Railroads. Trains will hereafter leave Hunter's Point and will be run on the Long Island City division of the Long Island Railroad as far as Berlin, where they will be transferred to the Flatbush avenue division. At Atlantic and Franklin avenues they will be run on the Brooklyn, Flatbush and Coney Island Railroad—or Brighton road, as it is familiarly called—and will proceed directly to the Beach. Pullman cars will be run on this road, and it is expected that next season the route will be shortened. The time from Hunter's Point is forty minutes and the price of an excursion ticket 50 cents.

The other change is the opening of the section of the Brighton road between the Willink Station and Franklin avenue. There are many cuts and tunnel on this section, and the cost of construction was $300,000. Trains are run from Flatbush and Atlantic avenues directly to the Beach. Cabs and coaches will connect the leading hotels and clubs with trains leaving Hunter's Point.

New Jersey Southern Railroad.

The line of the New Jersey Southern Railroad, between Pemberton Junction and Whiting, has passed into the hands of the Receiver, Colonel Isaac Buckalew, Superintendent of the Amboy division of the Pennsylvania Railroad. The road is 18¼ miles in length, and was built as a connection of the New Jersey Southern in 1870 by a company of whom Mr. John Stevens and Ashbel Green were the most prominent. To obtain funds to build the road bonds to the amount of $385,000 were issued, guaranteed by the Camden and Amboy Railroad, and were sold at par. After the line was completed it was leased to the New Jersey Southern Railroad, who agreed to pay the interest on the bonds. Since the lessors went into the bonds of a receiver, on January 1, 1874, they have refused to pay interest on these bonds, and the Pennsylvania Railroad Company were compelled to pay the interest under their guarantee.

Metropolitan Elevated Railroad.

On the 9th of July the Metropolitan Elevated Railroad effected a mortgage, dated July 10, 1878, to the Central Trust Company for $600,000, or $120,000 per mile of the double-track of said Metropolitan Railroad, as it should be completed. This instrument was recorded in the Register's Office and duly published. Since then the same company have effected a second mortgage—a mortgage of a much more important character than the first. It was issued July 11, 1878, to Henry M. Alexander and Charles G. Francklyn, Trustees of the New York Elevated Railroad, to secure an additional loan of $900,000 per mile on the road. The mortgage bears 7 per cent interest coupons payable April and October, free from Government tax. The entire road, together with the franchises, building materials, rolling stock, and rights of any nature or kind soever, are deeded to the Trustees to secure the bond, together with the one-half interest of the Metropolitan Road in the New York Elevated Road, already built and that is to be built from the Battery to King's Bridge. The instrument is signed by William R. Garrison, President, and John R. Body, Treasurer. The title of the bond is the "Second mortgage Income bonds of the Metropolitan Elevated Railroad"—loan authorized by the Board of Directors July 5, 1878. This mortgage is recorded in liber 1,409, page 1.

The Right to Tax Interest on Sterling Bonds of American Railroads.

An important decision has been given in the Supreme Court of the United States concerning the right of the government to tax the interest on railroad bonds owned abroad and payable there.

The Erie Railway Company issued, several years ago, bonds to the amount of £1,200,000, which were taken up in the London market. The bonds were issued in two lots, one under the United States Laws of 1864 and the other under the Laws of 1866. The United States Government claimed the right to tax the interest paid upon the securities, and the company resisted the claim. The dispute was taken before Judge Blatchford, in the United States District Court, who decided in favor of the company. The case was then taken to the United States Supreme Court on an appeal made by the Government, and on the 2d inst. Chief Justice Waite sent in the following decision affirming the decison of Judge Blatchford:

"I fully concur with the learned District Judge in the view he has taken of this case. The tax, for the recovery of which the suit was brought, was a tax upon the owner of the bond and not upon the defendant. It was not a tax in the nature of a tax *in rem* upon the bond itself, but upon the income of the owner of the bond, derived from that particular piece of property. The foreign owner of these bonds was not in any respect subject to the jurisdiction of the United States; neither was this portion of his income. His debtor was, and so was the money of his debtor, but the money of his debtor did not become part of his income until it was paid to him, and in this case the payment was outside of the United States in accordance with the obligations of the contract which he held. The power of the United States to tax is limited to persons, property, and business within their jurisdiction as much as that of a State is limited to the same subjects within its

jurisdiction. (State tax on foreign-held bonds, 15 Wall, 300.) The default of the defendant in making its returns was a continuing one. Only one penalty thereupon is recoverable. The judgment of the District Court is affirmed."

Narrow Gauge Railroad for Oregon.

The people of Oregon were disappointed when the last session of Congress adjourned without passing either of the railroad bills intended to give them direct communication with the East. But all through the State the citizens are evidencing great interest in the construction of narrow gauge local roads. One of these, the Yamhill and Dayton Railroad, is nearly completed, and the farmers expect to remove their crops by it this season. These narrow gauge local roads will be of immense benefit to Oregon. A large part of the farmer's profits has hitherto been engulfed by the cost of transportation to a place of shipment. The only method has been by hauling produce in wagons for long distances. With a series of narrow gauge railroads traversing the State, Oregon will be able to more than double her exportation of wheat. Outlying sections where at present wheat cannot be sent to market at a profit will come within a reasonable distance of transportation facilities. Two years hence when the narrow gauge railroads now in progress are in full running order, Oregon will probably be exporting 400,000 tons of wheat, instead of 200,000, the estimate for the present year.—*San Francisco Bulletin.*

New York and Brooklyn Bridge.

At a meeting of the Trustees of the New York and Brooklyn Bridge Co., held at their office in Brooklyn on the 5th inst., after reading the minutes of two previous meetings, which were approved, the Secretary's and Treasurer's reports were presented. The statement of the financial condition on the 31st day of July showed the total receipts to have been $9,720,737 49, and the expenditures $9,718,722 91. Cash on hand, $2,014 58. The total liabilities were shown to be $186,350 53.

The following resolution was unanimously adopted:

Resolved, That the Trustees of the New York and Brooklyn Bridge hereby call upon the Cities of New York and Brooklyn for the sum of $1,000,000 from the City of Brooklyn and $500,000 from the City of New York, for the purposes specified in section 3, chapter 300 of the Laws of 1875, such sums being, in the opinion of the Board, proper and necessary, and that request be made to the Mayors and Comptrollers of said cities accordingly.

For the month of July the receipts were reported to be $102,278 96, and the expenditures $130,336 95.

☞ The Lake Jessup, Osceola and Kissumee Railroad Company has been organized to build a railroad from Lake Jessup, Fla., the head of navigation on the St. John's River, to Orlando, 13 miles, the lines to be extended hereafter to Lake Tohopkeliga, the head of a branch of the Okeechobee. The road is to be a light road with the lightest possible equipment, and as near a surface line as possible. The headquarters of the company are at Orlando, Orange county, Florida.

☞ The gross earnings of the Denver and Rio Grande Railroad Company for July, 1878, were $121,500; in July, 1877, they were $74,276—increase, $47,224, being a gain of 63 per cent. The increased mileage operated was 12 per cent. Since the opening of the road to Alamosa, July 1, the total interest charges average $44,000 per month. The earnings for the last ten days were $41,300.

An Important Decision.

Elsewhere in our columns this week we give the brief text of Chief Justice Wait's decision in the matter of taxing the interest on sterling bonds issued and sold abroad, and with both principal and interest payable in London. The defendant in this case was the Erie Railway Company. The decision was upon an appeal from the United States District Court, the Chief Justice now confirming the decision of the lower court. As the decision interests not only railroads but all other corporations which may have borrowed or desire to borrow foreign capital, and as this decision is final we give it further notice and comment.

It is an old and long established principle in law that a debtor is not to be taxed upon his indebtedness. The creditor, on the other hand, deriving gain and profit from his money lent is the proper party upon whom the burden of taxation should rest. Where the creditor and the debtor are both citizens under a common government the law works easily. But when, as in this case, the creditor and debtor are not citizens under a common government it seems that equity would forbid the taxation by his own government of interest to be paid by the debtor. The government of the United States cannot with propriety tax the income, gains or profits of a creditor citizen of Great Britain; because not having either the right to do so or the power to collect such tax.

Again, the attempt to tax the foreign creditor through his debtor would be a hardship equivalent to a fine or penalty for borrowing from an alien; since he, the debtor, must comply with the letter of his bond paying his interest without defalcation or discount. The tax in addition would be a hardship, a plain injustice.

Arguing from these premises it is not easy to see what claim in equity there was for taxation in this case just decided. The English holder of sterling bonds issued by American railroads is taxed at home on his income from them. Even if he escaped taxation it is not the province of the debtor's government to inquire, since the interest of the debtor only can be properly considered in the matter of taxation.

The decision now rendered will end all doubt in the minds of foreign capitalists as to the precise rate of interest they will ordinarily receive from their American investments.

☞ Articles of agreement settling finally all pending controversies between the Baltimore and Ohio Railroad Company and the State of Maryland and the Chesapeake and Ohio Canal Company, authorized under the act of 1878, chapter 155, were received and filed for record at the executive chamber in Annapolis, Md., on the 1st inst. The agreement was signed by Gov. John Lee Carroll and Attorney General C. J. M. Gwynn on the part of the railroad company, and A. P. Gorman on the part of the Chesapeake and Ohio Canal Company.

☞ The West Line Railroad, New Jersey, was sold at the Court House, Newark, on the 3d inst., to J. J. Flanagan for $50,000, under foreclosure of a $3,000,000 mortgage. The rolling stock was also bought in by the same party at nominal prices.

☞ A party of explorers, with a military escort, and headed by Gen. Rosser, Chief Engineer of the Northern Pacific Railroad, left Bismarck on the 1st inst. for Fort Keogh. The object is to ascertain the value of the Northern Pacific land grant between the Missouri and Yellowstone rivers. Hon. Dorillius Morrison, of Minneapolis, accompanying the party, and will report on his return to certain New York capitalists, who think of building the road to the Yellowstone and accepting from the Northern Pacific Company 5,000,000 acres of land as their consideration.

☞ "On the 24th ult.," says the London Railway Times, "his Excellency Musurus Pasha inspected Mr. Haddan's system of steam caravans, designed by the inventor to open up rough countries like Asia Minor and to act as test lines for grand undertakings like the Euphrates Valley Railway. Sir F. Goldsmid and his Excellency discussed the best point of departure for this line, and the Gulf of Ayas, as proposed by Capt. Cameron and Mr. Haddan, was regarded as by far the best."

☞ The Mary Morgan, the thirtieth iron boat built by the Harlan & Hollingsworth Company, of Wilmington, Del., for the late Charles Morgan, now Morgan's Louisiana and Texas Railroad and Steamship Company, left for Galveston, Texas, on the 8d inst. The Mary Morgan, though smaller than the average Morgan steamer, is one of the best finished and equipped boats ever constructed by the Harlan & Hollingsworth Company.

☞ The new railroad from Tarport to Eldred, entitled the Kendall and Eldred Railroad, is completed and in running order. The line passes through a rich producing section, commencing at the mouth of Kendall creek and passing up the valley of the same to Boyd Valley, thence over the mountain to Ricksford and Duke Centre.

☞ The Brattleboro and Whitehall Railroad has been surveyed and located from Brattleboro, Vt., to South Londonderry, about 35 miles. Specifications and profiles will be ready for examination about the 15th inst., after which it is expected that bids will be received for building the road.

☞ On the 24th ult., the Receiver of the Detroit and Milwaukee Railroad applied to the Wayne Circuit Court for permission to purchase 1,000 tons of steel rails, which was granted. The quantity called for will complete the line with steel rails. The line will then be in first-class condition for its entire length.

☞ The Mayor of Cincinnati has appointed Aug. 14 as the day for holding a special election on the proposition to issue $2,000,000 in bonds for the completion of the Southern Railroad, according to the contract recently made by the Trustees.

☞ A company has been incorporated with a capital stock of $20,000, to build a narrow gauge railroad between Chillicothe, Ohio, and Hillsboro. The road will be built up the Paint Creek Valley, and will make an easy grade.

RAILROAD EARNINGS—MONTHLY.

Middlesex Central Railroad.

At the annual meeting of the Middlesex Central Railroad Company, held on the 31st ult., it was stated that the cash in hand after the receipt of the six months' rent due was ample to meet all the liabilities of the company. The amount received from the Boston and Lowell Railroad Company for their lease during the year was $15,000. Three small claims have been presented for settlement during the year. The following Board of directors was elected: William H. Hilt, Jr., of Brookline; Spencer W. Richardson, Nathan Carruth, Nathan Cushing and Jacob Edwards of Boston, and George Keyes of Concord. The question whether the road should be extended to the State Prison, and connect with the Framingham and Lowell Railroad, was considered, and finally referred to the directors.

Statement of the Public Debt of the United States, August 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$1,083 33
6 per cent. 1881 bonds, 1861	18,415,000 00	92,075 00
6 per cent. bonds, 1881 (Oregon,) 1861	945,000 00	4,725 00
6 per cent. 1881 bonds, 1861	189,321,350 00	946,606 75

5 per cent. bonds, 1860	10,000 00	600 00
6 per cent. 5-20 bonds, called 1862	429,600 00	498 06
6 per cent. 5-20 bonds, called June, 1864	95,100 00	720 43
per cent. 5-20 bonds, called 1865	325,200 00	63,577 22
6 per cent. Consol. bonds, called, 1865	7,413,750 00	167,944 06
1-10 to 6 per cent. treasury notes, prior to 1846	82,525 35	2,668 06
1-10 to 6 per cent. treasury notes, 1846	6,000 00	206 00
6 per ct. treasury notes, 1847	950 00	57 00
3 to 6 per cent. treasury notes, 1857	1,800 00	102 00
6 per ct. treasury notes, 1861	3,000 00	364 50
7 3-10 per cent. 3 years' treasury notes, 1861	16,800 00	1,148 15
5 per cent. 1 year notes, 1863	51,305 00	2,577 35
per cent. 2 year notes, 1863	38,650 00	2,125 65
6 per cent. compound interest notes, 1863-64	273,080 00	55,198 71
7 3-10 per cent. 3 years' treasury notes, 1864-65	156,500 00	7,472 00
6 per cent. certificates of indebtedness, 1862-63	5,000 00	313 48
4 to 6 per cent. temporary loan, 1864	3,060 00	256 06
3 per cent. certificates called	5,000 00	394 31
Aggregate of debt on which interest has ceased since maturity	$9,009,640 26	$378,763 98

DEBT BEARING NO INTEREST.

Demand notes, 1861-62	$62,267 50	
Legal tender notes, 1862-63	346,681,016 00	
Certificates of deposit	51,200,000 00	
Fractional currency, 1862-3-4	16,455,598 17	
Coin certificates, 1863	43,022,300 00	
Silver certificates	2,608,730 00	
Unclaimed interest		3,007 03
Aggregate of debt bearing no interest	$460,029,911 67	$3,007 03

RECAPITULATION.

	Amount Outstanding.	Interest.
Debt bearing interest in coin, viz:		
Bonds at 6 per cent	$733,561,250 00	
Bonds at 5 per cent	703,266,650 00	
Bonds at 4½ per cent	246,000,000 00	
Bonds at 4 per cent	112,850,000 00	
	$1,795,677,900 00	$25,762,472 03
Debt bearing interest in lawful money, viz:		
Navy pension fund, 3 per cent.	14,000,000 00	35,000 00
Debt on which interest has ceased since maturity	9,009,640 26	378,763 98
Debt bearing no interest, viz:		
Old Demand and legal-tender notes	$348,743,283 50	
Certificates of deposit	51,200,000 00	
Fractional currency	16,455,598 17	
Coin and Silver Certificates	43,631,030 00	
	$460,029,911 67	
Unclaimed interest		3,007 03
	$2,279,717,451 93	$26,179,243 04
Total debt, principal and interest, to date, including interest due and unpaid		$2,304,896,694 97

AMOUNT IN TREASURY.

Coin		$207,007,852 49
Currency		1,108,317 63
Currency held for redemption of fractional currency		10,000,000 00
Special deposit held for redemption of certificates of deposit as provided by law		51,200,000 00
		$269,316,170 12
Debt, less amount in Treasury, Aug. 1, 1878		$2,035,580,524 85
Debt, less amount in Treasury, on the 1st ult.		2,035,783,831 82
Decrease of debt during the past month		$206,306 97
Decrease of debt since June 30, 1878		206,306 97

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$129,425 60
Kansas Pacific bonds, 1862-64	6,303,000 00	31,515 00
Union Pacific bonds, 1862-64	27,236,512 00	136,182 56
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	8,000 00
Western Pacific bonds, 1862-4	1,970,560 00	9,852 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	8,141 60
Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $36,835,039 84; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $29,953,595 61.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 5th inst., the sixty-fifth call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 5th day of November next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 69,501 to 70,000, both inclusive; $100, Nos. 120,001 to 123,000, both inclusive; $500, Nos. 84,001 to 86,000, both inclusive; $1,000, Nos. 157,001 to 163,500, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $100, Nos. 18,451 to 18,550, both inclusive: $500, Nos. 10,701 to 10,750, both inclusive; $1,000, Nos. 35,851 to 36,100, both inclusive; $5,000, Nos. 10,257 to 10,400 both inclusive; $10,000, Nos. 19,801 to 20,500, both inclusive.

☞ The Nicaragua Government Engineer has presented his report concerning the building of the railroad between Corinto and Leon. The total length will be under 45 miles and the estimate cost $250,000

Philadelphia Stock Exchange.

American Railroad Journal.

Saturday, August 10, 1878.

Financial and Commercial Affairs.

The week has been one of singu'ar activity in the Stock market. The Money market, however, has remained as heretofore torpid and plethoric. Instead of the ordinary mid summer stock dealings of fifty or sixty thousand shares per diem, the sales have ranged during the past week from 150,000 to 250,000 shares daily. Just how much the extreme ease of the money market has contributed to facilitate this extraordinary stock traffic it would be hard to determine; but without hazarding any speculation it is enough to say that too much idle money has greatly encouraged speculation on the Stock Exchange.

The present contest of the bulls and bears has lasted a month without serious injury apparent to either. Not a failure of importance has occurred from the prolonged battle. Even the knowing ones profess not to know who has been materially affected by the constant and considerable fluctuations of the market.

The volume of dealings at the Stock Board were, on Saturday, 164,000 shares; Monday, 191,700; Tuesday, 170,100, and Wednesday, 151,064. As heretofore the dealings have been confined to some half dozen stocks; the miscellaneous list in general not being much affected either from sympathy or from actual dealings.

There has been an upward movement in Erie old shares for which there does not appear to be any reason beyond the fact that a considerable amount of the old shares had paid the assessment of $4, thereby becoming "assented stock" of the new corporation, the New York, Lake Erie and

Western. A large amount of the old shares are as yet unassented, one-half or more of the whole 780,000 shares; so there is yet probably enough of it to check any serious corner in the market—enough of it to "go around." The time in which old shares can be "assented" and converted into new will expire in October.

In connection with Erie it is proper to notice an important suit between that railroad (new corporation) and Mr. H. C. Ohlen, in which the rail road is defendant. From the facts as shown in the Supreme Court, a mandamus was applied for by the plaintiff to compel the railroad to transport crude petroleum lying at a station awaiting shipment. The oil tanks used by the road having been held for the sole use of a New York firm, this action was taken by the shipper, Ohlen, to compel the railroad as a common-carrier to transport his freight. The defence was that the plaintiff had his remedy in a suit for damages, but denying the right to ask for a compulsory mandate from the Court. The decision when rendered will be a very important one, no case precisely similar having reached a decision under New York law.

Gold remains unchanged at 100⅛ as at the close last week. A sale of $500,000 gold by the First National Bank on Tuesday is understood by the street as indicating a desire on the part of the Secretary of the Treasury to break the price and bring gold to par if possible. Silver is quoted in London at 52¾d. The gold and silver production of the Pacific Coast mines up to July 1, 1878, is reported at $24,436,800. Of this about 40 per cent was gold, the balance being silver and lead. The lead was estimated at $600,000, leaving in silver $14,000,000. The bullion value of the standard silver dollar is unchanged at .8894.

The subscriptions to the new 4 per cents continue large, on Monday amounting to $1,300,000, and averaging nearly a million per diem. Since our last the Secretary of the Treasury has made two calls for five millions each of 5-20 bonds. This makes $55,000,000 of public debt on which the rate of interest has been reduced 2 per cent since May 1. On $10,000,000 of this the reduction has been effected within the month of August. This makes sixty-six calls in regular succession, and leaves outstanding $52,000,000 of the 5-20s of 1865, new issue. The bonds called and outstanding now amount to $45,000,000, and are payable in amounts of $5,000,000 each, on 22d August, 5th and 20th September, 11th, 17th, 23d and 30th October, and the 5th and 7th November. The dates of call are 22d May, 5th and 20th June, 11th, 17th, 23d and 30th July, and 5th and 7th August. This rapid refunding of the public debt at a much lower rate of interest has disturbed the values of other issues than the one called in. There has been a decline of 1 per cent in the 1867s, and a slight decline in the currency sixes, coupon ten-forties, and coupon fives of 1881. We quote Government securities at the close on Wednesday as follows:

United States 6s, 1881, registered, 107¼@107¾; do. coupon, 107⅛@107¾; 5-20s, 1865, new, registered, 102⅜@102½; do. coupon, 102⅜@102½; do. 1867, registered, 104¾@105; do. coupon, 104¾@104⅞; do. 1868, registered, 107⅛@107⅜; do. coupon, 108@108⅛; ten-forties, registered, 106⅛@106¾; do. coupon, 109⅛@109¼; 5 per cents, 1881, registered, 106¼@106¼; do. coupon, 106¼@106⅜; 4½ per cents, 1891, registered, 104¾@104⅞; do. coupon, 104¾@104⅞; 4 per cents, 1907, reg., 100⅝@100¾; do. coupon, 100⅝@100¾; sixes, currency, 120½@121.

The Bureau of Statistics has furnished figures concerning our imports and exports which are valuable to the financial and commercial world. For the fiscal year ending June 30, 1878, the excess of *merchandise* exports over imports was $257,832,667, an increase over the previous year of $106,680,573. Exports of coin were less by $11,475,911 than in 1877. Total exports in excess of imports $261,744,957. Until 1874 the balance of trade was against us. In that year it was about $18,000,000 in our favor, which was lost again in 1875; the loss that year being some $20,000 000 against us.

This change is probably unparalleled in the history of the commercial world. There is good reason to believe that our surplus for the next year will be as great as the figures just given. The only problem to be solved is can we find a ready market for it?

Philadelphia advices report a dull Money market. The condition of the market not having altered materially for a month past. Good commercial paper scarce and wanted at 4½@5 per cent. Loans and Government Securities were made at 3@4 per cent as a rule, with loans on railroad and miscellaneous securities at 6 per cent.

Pennsylvania Railroad shares sold at 32⅜ fluctuating ¼@½ per cent. Philadelphia and Reading Railroad shares quoted at 17⅛ at the close.

From Baltimore no change in the Money market since our last. Baltimore and Ohio Railroad common stock closed at 86 bid and 90 asked. Sales of Northern Central were made at 14, closing at 13⅞@14.

Boston advices indicate a falling of somewhat in the demand for money, with rates unchanged. Boston's total valuation is given at $631,000,000, a shrinkage of $55,000,000 from last year. But the rate of taxation for this year will be slightly less than $13 on the $1000 against $13 10 per $1000 last year. Trade and sales from first hands are not quite equal to expectations.

Sterling Exchange was firmer for sight the leading bankers having advanced the rate half a cent on Tuesday. The actual market is quoted at 4 82¾ for prime 60 day bills, and 4 86½@¾ for sight.

The week's exports from New York, exclusive of specie, have been $6,241,967 currency value.

Domestic Produce remains in good demand. Prices of wheat have advanced since our last partly from speculative causes. Receipts of grain by lake at Buffalo from Jan. 1 to Aug. 1 this season were (flour reduced to bushels) 32,614,760 bushels against 21,286,157 bushels in 1877 for same time; an increase of 11,328,603 bushels. The whole cereal crop movement, as proved by the receipts at Chicago, Milwaukee, Toledo, Detroit, Cleveland and Duluth, from August, 1877, to August 1878, shows a total of 200,385,490 bushels. This is an increase of 52,290,537 bushels over the previous year.

Metals remain dull. Of Iron, sales have been reported of 600 tons American and 100 tons Scotch on private terms. Prices favor buyers. We quote New Iron Rails at $32@$36; Old Rails at $17@$18; Steel Rails at $44@$45.

Cotton has advanced since our last and on Tuesday middling uplands touched 12 cents per pound. Futures are dull and nominal. Considerable sales have been made during the week both for spinners and for export. We now quote futures as follows: For August, 11.96@12.06; September, 11.70@11.78; October, 11.46@11.53; November, 11.27@11.30; December, 11.24@11.28.

Ocean freights are still irregular. Grain rates by steam to Liverpool are about 8d. per 60 lbs. Grain to fill at 7¾d. Cotton at ¼d. To London by steam for grain, 6d.@6¼d. To Glasgow, steam for grain, 6¼d. per 60 lbs. Flour at 3s. 3,500 packages butter in refrigerators at 115s.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Kansas Pacific 1st mort. 7s, Denver Div. with coup. certif., 64¼; Toledo and Wabash 2d mort., ex Nov., 1877, coupon, 64½; Missouri, Kansas and Texas R. R., 2½; do. 7s, con. S. Redemption of Five-twenty Bonds.

The Treasury Department issued on the 7th inst. the sixty-sixth call for the redemption of 5-20 bonds of 1865, consols of 1865. The call is for $5,000,000, of which $2,500,000 are registered bonds. The principal and interest will be paid at the Treasury on and after the 7th day of November next, and the interest will cease on that day. Following are descriptions of bonds:

Coupon bonds dated July 1, 1865: $50, No. 70,001 to 71,000, both inclusive; $100, No. 123,001 to No. 127,000, both inclusive; $500, No. 86,001 to No. 87,000, both inclusive; $1,000, No. 163,501 to No. 169,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the 1st day of July, 1870: $100, No. 18,551 to No. 18,650, both inclusive; $500, No. 10,751 to No. 10,800, both inclusive; $1,000, No. 86,101 to No. 86,550, both inclusive; $5,000, No. 10,401 to No. 10,600, both inclusive; $10,000, No. 20,501 to No. 20,900, both inclusive.

☞ A certificate of incorporation has been filed in the office of the Secretary of State of Ohio of the Paint Valley Railroad Company, with termini at Chillicothe and Hillsboro, to run through the counties of Ross and Highland, capital stock $200,000, in shares of $50 each, by T. A. Minshall and others.

☞ The new railroad route to San Francisco, via Benicia, Martinez and Oakland, over the California Pacific Railroad and Terminal Railway was to have been opened for travel on the 1st of August. It is expected that through this change the time between Sacramento and San Francisco will be shortened nearly one hour.

☞ A majority of the first mortgage bonds of the Montclair and Greenwood Lake Railway Company have been deposited with Morris K. Jesup, accompanied by the requisite five per cent in cash to defray the expenses of reorganization, in case the conference of the committee of the first mortgage bondholders with the committee appointed by the junior securities fail to agree on a plan of reorganization.

☞ Six hundred thousand dollars of the Denver Extension (Kansas Pacific Railway) bonds have been received by the Bondholders Committee for deposit, according to the new scheme, with the United States Trust Co., where $500,000 have already been placed. Advices have been received that $2,500,000 of bonds are on the way from Europe and they will also be used to further the plans of the Reconstruction Committee.

☞ The officers and directors of the California Pacific Railroad Company, elected on the 31st ult., are: R. P. Hammond, President; George E. Gray, Vice President; J. L. Willcutt, Treasurer; C. T. Crocker, N. T. Smith, C. J. Robinson, J. O. B. Gunn, Directors, and J. Gunn, Secretary.

☞ The officers of the Central Pacific Railroad company, elected on the 31st ult., are: President, L. Stanford; First Vice President, C. P. Huntington; Second Vice President, Charles Crocker; Financial Director, D. D. Colton; Treasurer, E. W. Hopkins; Secretary, E. H. Miller, Jr.

☞ The directors of the Southern Pacific Railroad Company, elected on the 31st ult., are: Charles Crocker, D. D. Colton, H. M. Newhalls, Charles Mayre, N. T. Smith, J. L. Willcutt, Willard V. Huntington.

☞ The grading of the extension of the Northern (Cal.) Railway from Williams to Willow has been commenced. As the work of making the roadbed is very light, it is expected to have the cars running on the new section very shortly.

☞ The earnings of the St. Louis, Kansas City and Northern Railway from January 1, to July 31, 1878, were $1 747,774 66; for the corresponding period last year the figures were $1,604,844 37—increase for present year, $142,930 29.

☞ Mr. Edward Appleton of Boston has been chosen President, and Mr. Fred. L. Chapman of Cambridge Clerk and Treasurer of the Troy and Greenfield Railroad Co.

☞ The Utica and Black River Railroad between Morristown and Ogdensburg has been completed, and the first train from Utica to Ogdensburg passed over the road on the 1st inst.

☞ The Illinois Central Railroad Company has declared a dividend of 8 per cent, payable September 2. The books will be closed August 14 and be reopened September 5.

☞ Messrs. Fisk & Hatch have brought out a fifth edition of their hand-book on Government bonds, which can be had on application.

☞ The new railroad running from Foxburg to Clarion, Penn., was formally opened on the 7th inst.

☞ The Springfield, Jackson and Pomeroy (Ohio) Narrow Gauge Railroad was opened for traffic on the 5th inst.

The History and Progress of the Street Car.

Mr. John Stephenson, famous as a manufacturer of street cars and omnibuses, was interviewed lately by a representative of a morning daily. His history of the street car, its origin and development, is so graphic and readable that we give it entire as a valuable contribution to the annals of American progress.

"The street railroad is altogether a New York institution," said Mr. Stephenson. "The first car was run over the Fouth avenue line in 1832. It was called the 'John Mason' out of compliment to the first president of the road, who was also founder of the Chemical Bank. It was built by me in the old English style, and the idea of a compartment car was carried out. It had seats on top as well as inside, and would accommodate in all sixty persons. Here is a patent I took out in 1833 for certain improvements. You will observe that it is one of the earliest patents issued by the United States Government, being No. 23. It is interesting chiefly because it bears the signatures of Andrew Jackson, President; Edward Livingstone, Secretary of State; Roger B. Taney, Attorney General, and John Campbell, United States Treasurer."

"Who originated the idea of horse cars?"

"It started," said Mr. Stephenson, "among the best class of New York's citizens. It had two or three purposes to serve, the first being benevolence towards the working classes. The upper wards of the city were then unpopulated, and the object was to enable working men to live in comfortable homes and within reach of their employment. Of course the remuneration of capital was an incentive to the enterprise, but in that respect street railways were a failure. During the first twenty years all the original capital was lost, and stock was for a long time procurable at 4 cents on the dollar."

"What progress did street cars make in New York?"

"The Fourth avenue line opened in 1832, with a charter which included only Manhattan Island. About 1838 a new charter was obtained which gave the Harlem road a continuous line through Chatham Four Corners to Albany. The street railway after this, although it maintained a financial identity, merged into the operations of the New York and Harlem Railway. After it had been running about seven years it became a kind of country line and lost much of its city character, the eight-wheel cars running down into the city. The first station was at Prince street, in the Bowery, and there were also stations at Walker street and at Tryon row. At this latter place the terminus remained until 1845, when the eight-wheeled cars stopped at Twenty-seventh street and regular street cars were restored. The cars were then run into the city as far as Fourteenth street by steam. No other roads were opened in New York until 1852, when the Second, Third, Sixth and Eighth avenue lines were inaugurated."

"When did the cars take their present shape?"

"In 1845. Summer cars were introduced in 1833; in fact all early cars had cross benches."

"After New York what places took hold of the system?"

"In 1856-57 Boston and Philadelphia adopted street cars. There were no street cars outside of America until 1869, with the exception of a line built at Birkenhead by George Francis Train. He succeeded, however, in making himself so offensive to the English people that he met with no success. His action put the whole business in England back at least ten years, and so unpopular was the system that a road begun in London was torn up. Tramway lines were built on the Continent, at Brussels and Berlin, about the time of the Vienna Exhibition, but only recently have they been instituted in Paris. In 1869 a road was built at Buenos Ayres, South America, and some years before then the principal Canadian cities had lines of street cars running."

"Are you manufacturing cars for all the world?"

"Pretty nearly. Besides orders for various cities in the Union we have orders in the shop now from London, Paris, Chorillos, Peru; Hamilton, London and Toronto, Canada; Port Adelaide and Gawlertown, Australia; Kingston, Jamaica; Lima, Peru; City of Mexico; St. Petersburg, Russia; Wolverhampton, Swansea, Hull and Liverpool, England; Jalapa, Mexico; Bahia, Brazil; Amsterdam, Holland; Wellington, New Zealand; Berlin, Germany; Rio Janeiro; Christiania, Norway; Hamburg and many other places. We have an order for twenty-five cars for the North Metropolitan Tramway of London, the largest street railway corporation outside of the United States. There were nineteen competitors for the order."

"What opposition have you in your business?"

"There are large establishments at Troy and Philadelphia, and many of the companies build their own cars. They have to have repair men and work so they occupy their time building new cars. In England there are at least half a dozen competitors for the trade, besides tram wagon manufactures."

"How is it that you can compete with the foreign manufacturer in his own town?"

"Shortly after the Hull road had been stocked by us a Birmingham manufacturer accosted Alderman Bannister, of that city, and asked him why he sent the order for the cars to America. The Alderman replied that the town had patronized American industry because it was found that a better car could be procured for £35 less than the Birmingham man could furnish one for. Our cars weigh less by one half than those made in Germany, and the cars we furnished Glasgow are operated with a stable one third less than their own require. The nature of American woods has much to do with our success. The selection and preparation of material is no light job; the process of preparation requires three or four years. Our object is to obtain strength with lightness. The American irons are tougher than the English, and we can get the required strength with less weight than they can. We use white oak, white ash, poplar, basswood, hickory, beech, maple and pine—woods all easily procurable by us, while the English are obliged to use principally teak imported from the East Indies. Teak is used largely in shipbuilding and is always in the English market. The English manufacturer does not seem to possess that quality of discriminating between the different kinds of woods which long experience has given our firm. The selection of wood is a practical science. Their ideas are heavier than ours, and because their woods are inferior they have been obliged to reinforce with iron at the expense of lightness. Our raw material is abundant with us and is inexpensive. Then our labor-saving machinery is such that no small establishment can compete with us. We meet with considerable opposition abroad, and the press is used to raise a cry against any corporation sending money away from home, especially in the present hard times."

"Did the recent war in Europe hinder your trade to any extent?"

"Well, yes. Moscow has two tramways in running order, and Odessa was about to have one when the war broke out. An English company had the concession to build the road, but proceedings were delayed in consequence of the war. We have not heard from them since."

"What has been doing in Sydney, Australia?"

"The old stage firm of Cobb & Co., the members of which were Americans, has merged into the omnibus and tramway company of Sydney. The old 'buses' have been sent to Yokohama, Japan, and are to be placed on the route to Yeddo, a distance of sixteen miles. The 'buses' were manufactured by us, and we are now in negotiation for the supply of cars for the tramway."

"Are not 'buses' becoming obselete?"

"We have just fitted out a new line for Baltimore, but there are very few of the lines left. There are three in this city, one in Boston and one in Chicago. Omnibuses were instituted by me in 1831. I designed the vehicle for Mr. A. Brower and he put it on Broadway. Before that the vehicles used were called 'sociables,' and they had side entrances and cross seats. I served my time in Andrew Wade's shop, which stood where the Oriental Hotel now stands, in Broome street near the Bowery. My principal work was on the 'sociables' and it was while employed on them that I thought out the omnibus. The street cars superseded them."

"What effect will the elevated railroads have on your business?"

"Very little, if any," answered Mr. Stephenson. "Recent reports from London show that the underground railway carried last year 56,000,000 people, the tramways 52,000,000 and the omnibuses 54,000,000. That travel has increased is demonstrated by the fact that seven years before, when there was neither underground nor surface railway, the buses carried only 52,000,000 people. Traffic has increased threefold. There is always a wonderful increase of traffic developed on streets along which cars pass. Take, for instance, Twenty-third street. There was no current of traffic there when it was proposed to build the existing line, and the idea was ridiculed. The road was built and it has brought to the street a traffic which it never had before. The elevated roads will for a time diminish the traffic on the surface lines, but it will be recovered. The elevated roads will carry long distance passengers, those on whom the surface lines lose money. The Third avenue company loses money on every passenger carried to Harlem, but makes it up on those travelling short distances. One-horse cars are the advance step of to day in tramway administration; they are light and move quickly. The only impediment to their use is to be found on a thoroughfare like Third avenue, where sufficient one horse cars could not be placed on the line to accommodate the great body of traffic."

"What is the cost of a modern car, ready for use?"

"From $1,000 to $1,200."

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st ult., inclusive, during the years 1877 and 1878, was as follows:

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1877...	3,000	1,496,100	7,062,800	389,700
1878...	2,700	9,377,200	9,883,500	281,800
Dec....	300	.....	.....	107,900
Inc....	...	7,881,100	2,820,700	.....

The following comparative table shows the quantity of some of the principal articles of produce left at tide water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1876.	1877.	1878.
Canal opened....	May 4.	May 8.	April 15.
Flour, bbls.....	18,000	3,000	2,700
Wheat, bush.....	7,442,600	1,496,100	9,377,200
Corn, bush.....	2,373,200	7,062,800	9,883,500
Barley, bush.....	114,500	389,700	281,800
Rye, bush	827,000	165,500	728,500
Oats, bush.....	1,691,100	861,600	2,056,700
Malt, bush.....	334,900	264,500	190,400
Feed, lbs.....	829,600	.....	.....

☞ The Altoona Mirror says that freight engines are now run on the Pennsylvania Railroad from Altoona to Derry and return on the plan of twelve engines to do the work of twenty. There were formerly twenty engines running through, but under the new order twelve do the work of twenty. This is to save engines and to make equal work for all the employes.

☞ The United States Rolling Stock Company has declared its semi-annual dividend of 8s. per share (two per cent in gold), payable September 1, on its outstanding capital of $5,000,000.

Hard Times and the Railroads.

In spite of all the wisdom that has been uttered about hard times, and in spite of the discussion that is constantly kept up, the one great cause is either overlooked altogether or underestimated. During the four years of the war there was ample employment for all classes of people. A million men on one side were engaged in cutting the throats of half a million or more on the other. The remainder of the population was employed at high wages or large profits; money and speculation were abundant, for the government was mortgaging the future and spending the proceeds at the rate of three millions a day. The war ended in April, 1865, and the vast armies were thrown out of government employment; more than this, immigration, which had dwindled down small during the war, revived, and fleets of ships were bringing foreigners to this country in search of employment by hundreds of th usands. There was no complaint about lack of work or insufficient wages—no hard times. Everything went forward in a booming fashion, the armies from the battlefields of the South and the other vast armies from Europe pouring in upon us found no difficulty in locating themselves satisfactorily. What became of all these people? What supported them? Why, we went on mortgaging the future for more money just as we had done during the war, and spent it just as lavishly. The government was no longer the agent who negotiated the funds; corporations stepped in and acted as distributing agents. The government had borrowed some $2 800,000,000 during five years. The corporations borrowed more than double that amount during the next eight years. Of the latter the railroad companies were the most numerous, powerful and hazardous. The latest statistics show the railroad debt of the country to be nearly five billions ($4,806,202,022.) including stock, bonds and floating indebtedness, or nearly double the highest figure the government debt ever reached. More than half this money was raised and expended within the period between the close of the war in '65 and the panic in '73. During this period nearly forty thousand miles of railway was constructed.

The business of building railroads or a grand scale is the largest manufacturing business that can be conceived. It is no exaggeration to say that, directly or indirectly, railroad building employed more than a million men during the period to which we refer. The great transcontinental route was pushed through with a rapidity altogether unparalleled, driving Indians and buffaloes before it. The Western States passed laws allowing cities, towns and counties to mortgage themselves to their heart's content for the construction of new railroads, and the whole country was gridironed over with tracks. On the old road single tracks were increased to double tracks, and double tracks to quadruple tracks; iron rails were taken up to give way to steel rails; connections, extensions, and off-shoots were provided in every direction. Along the line of the new roads the carpenter and builder followed closely upon the first run of the locomotive, and new towns sprung up like mushrooms in the night. All this was giving employment for the time being at high wages to tens of thousands. There were the machine and car shops to build; there were the iron furnaces, founderies and rolling mills to run; there was coal and iron to mine and transport, the timber to cut, the road bed, deep cuts, fills and tunnels to make, and the bridges to build; there were the rails to cast and to lay, the thousands of locomotives and hundreds of thousands of cars to construct; there was constantly a new country to open and to settle, with the manifold employments incident thereto. All this was one vast manufacturing interest, and money was pouring in from abroad to carry it on with unexampled vigor. There was no lack of employment then, no complaint of low wages, no suffering from hard times.

But this gigantic industry came to a sudden standstill when the panic struck it. A general halt was called along the line. The capitalists of Europe who had been so lavish and confident suddenly cut short the money supply. They had suffered losses abroad, and began to tremble for their American investments. The work of building railroads may be said to have ceased as a great national industry. Since 1873 it has consisted mainly of filling up gaps, and furnishing with termini the mass of railroads that begun and ended nowhere. But the general suspension of work, necessitated by the inability to raise any more money for unproductive railroad building, threw out of employment hundreds of thousands of men. The furnaces were blown out, the mills shut down, work on new roads abandoned, and the building of new towns indefinitely postponed. During the years succeeding the virtual collapse of the great railroad industry the hundreds of thousands thereby thrown out of employment have been crowding against those employed in other pursuits and against each other, and they have broken the labor market and kept it down. Meanwhile, of course, other important influences have contributed to the general distress; but they have been cumulative, while the shock from the general collapse of railroad building was the fundamental cause of the hard times from which we have not yet recovered.—*Chicago Tribune.*

Steel Crowding Out Iron.

"If the price of steel keeps on falling," said Mr. Dislogue, of the River Iron Works, Camden, N. J., "it will come into general use and supersede iron. A few years ago steel was so high-priced that but few persons could touch it for ordinary purposes. After nine manufacturers combined and purchased the right to make the Bessemer product, for which, I believe, one million dollars were paid, the price tumbled, until iron rails for steam roads have been driven out of the market, and no one thinks of constructing a railroad unless the rails are of steel. All the lines which were originally of iron have gradually replaced these with steel, until now nearly the whole network of roads in the entire country is of steel. It is cheaper in the end, on account of its durability, while the few dollars difference do not count. A steel bridge could be constructed almost as cheap as an iron one; but there is one objection to this, that is, the steel is not flexible enough, but would cause the bridge to be stiff. This might result in its being jostled out of position and be a cause of continual annoyance. However, steel will no doubt enter largely into the construction of these structures at no distant day. Why, a house of steel could be erected at nearly the same cost as one of brick, and if prices continue to drop the experiment might be tried. They could be put up in less time than other buildings and would stand fire better than iron."

Steam Road Wagons.

The Wisconsin Steam Road Wagon Commissioners have made their report to the Governor. After giving a history of the trip of the Oshkosh from Green Bay to Madison, a distance of 201 miles, at an average of six miles an hour, at times passing over grades 1,400 feet to the mile, they come to the following conclusions:

The wagon has hauled loads, plowed, and otherwise accomplished in a successful manner every test mentioned in the law or suggested by the commission. They are not, however, satisfied that this machine is, in the language and spirit of the law, a cheap and practical substitute for the use of horses and other animals on the highways and farms. As at present constructed, it is unquestionably of great advantage in plowing, thrashing, and hauling heavy machines from one farm to another; for heavy teaming on the highway, etc., but the commission is not prepared to say that a machine requiring an outlay of $1,000, with a daily expenditure of from $2 to $6, is a cheap or practical substitute for farm animals. They recommend that the next Legislature make a suitable award for payment in perfecting a machine, but, under all circumstances, cannot make the award of $10,000 offered by the Legislature of two years ago.

Imports of Dry Goods at New York.

Trichinæ in Pork.

H. Kreissman, Consul General of the United States at Berlin, informs the Department of State, under date of July 9, 1878, that a Ministerial decree has been issued discontinuing the microscopical examination of American fat pork heretofore required. The requirement has been a great embarrassment to importations of pork into Prussia from the United States. Its object, of course, was to discover trichinæ. Thorough investigations, says the Consul, have resulted in establishing the fact that no trichinæ ever exist in the purely fat portions of pork, and that whenever any trichinæ have been discovered, it has always been in the meat or the muscles attaching to the fat pork.

A Mountain of Tin.

Tasmania, or Van Dieman's Land, the large island to the south of Australia, is rapidly becoming noted for the quality and extent of its tin supplies. Four years ago the value of its exports of tin and tin ore was $35,000, while last year they amounted to nearly $1,500,000. One of the most productive regions is the Mount Bischoff district, but this has now been eclipsed by the discovery of a tin mountain at Mount Heemskirk, on the west coast. The "wash-dirt" is some twenty feet thick, and produces about 25 per cent of tin; but the existence of solid seams of the metal, traversing the mountains in veins several feet in depth and width, has been demonstrated. Some "nuggets" weighing several hundred weight each have been found, yielding nearly cent per cent of pure metal. Mixed with the tin, too, is a small quantity of gold, about ten ounces to the ton, not sufficient in itself to render it worth seeking, but adding considerably to the tin miner's profits.

☞ The survey of the Springfield, St. Paris and Sidney (Ohio) Railroad is finished. At Sidney an effort is being made to cause the stock already subscribed to the Columbus and Northwestern Railroad, amounting to about $30,000, to be transferred to the Springfield, St. Paris and Sidney Railroad.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Aug. 1, 1878.

A DIVIDEND OF THREE (3) PER CENT. HAS been declared by this company, payable on the 2d day of September next, to the holders of the capital stock of the company, as registered at the close of the 14th day of August, after which and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.
FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.
WHEELS and AXLES MOUNTED COMPLETE.

PATENT
MINERAL WOOL.
ABSOLUTELY FIRE-PROOF,
UNDECAYING
AND THE BEST
Non-Conductor of Heat, Cold and Sound.
USED EXTENSIVELY FOR
DEADENING WALLS AND ROOFS OF
Dwellings and Ice-Houses,
LINING BOILERS, FURNACES, STEAM AND COLD WATER PIPES, ETC.
Alexander D. Elbers,
P. O. Box, 4461. 26½ BROADWAY, N. Y.

Safety Railroad Switches
WITH
MAIN TRACK UNBROKEN.
RAILROAD CROSSINGS, FROGS,
and other
ROADWAY SUPPLIES.
MANUFACTURED BY
THE WHARTON RAILROAD SWITCH CO.,
Office, 28 South 3d Street.
Works, 23d and Washington Ave.
PHILADELPHIA.

Hopkins' Patent Lead-Lined
JOURNAL BEARINGS.
USED ON NEARLY ALL THE
Leading Railroads of the United States and Canadas.
NON-HEATING,
PERFECTLY SELF-FITTING,
CHEAPER AND BETTER THAN ANY OTHERS.
D. A. HOPKINS,
Patentee and Manufacturer,
113 Liberty Street, New York.

Can I Obtain a Patent?
This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.
ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.
Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,
HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either
COAL OR WOOD BURNING;
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

G. F. THOMAS, 549 & 551 Broadway, New York.

R. Stuart Willis,
ATTORNEY & COUNSELOR AT LAW.
NOTARY PUBLIC.
290 Broadway, New York.

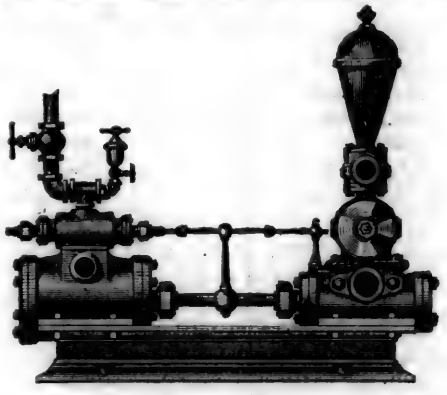
Special attention paid to Railroad, Mining and Manufacturing Interests.

SELF-OILING
CAR AXLE BOX.

No Waste of Oil. No hot journals. 82,000 miles run without re-oiling. Also

SHAFTING BOXES.

Call and examine boxes and certificates, or send for descriptive circular. J. B. TOMLINSON,
80 & 82 White St., New York.
Or, MARSHAL B. STAFFORD,
JAMES H. COVEL,
93 Liberty Street, New York.
☞ Trial Box furnished free on application.



EDWARD W. SERRELL,

Gold, Silver and Paper.

The next great political issue will be a financial one. Much as we are given to experimenting, and quick as we have been generally to seize upon correct and shrewd conclusions in our national affairs, a hundred years of experience has not yet made us financially wise. Our present policy does not meet our wants and we are earnestly looking for a better one.

There is a good reason for this state of things. Many of our own people and our more mature neighbors are disposed to sneer at our condition as a hopeless one, and from it predict the inadequacy of our national means to the end—a failure of republicanism. Let no man despair. Never was there less ground for discouragement than now. Our resources of national strength are abundant and practically inexhaustible. The first century of national life has only brought us up to manhood. Now for the first time we are looking for a chance to employ our strength. We have only now passed out of minority, and at this moment the whole world is before us in which to "strike out for fortune."

The principal reason for the present uncertain financial future is a simple one. In wondering why our national finances seem continually out of line we forget that our own rapid motion is so eccentric that no human policy can quite keep up with us. That is the secret cause of our trouble. The condition of the nation is changing daily, but we have tried in vain to keep our moneys after the fashion of our fathers in a stocking. We have much more money than our fathers had, we use it in many ways unknown to them, and as a whole their policy is obsolete and will not fill modern requirements.

Having become a nation of producers, in the future we shall be intent upon cultivating new markets. Reciprocity is the keystone to commercial prosperity. If we sell we must also buy. The balance must be paid for at settlement; and this payment of the balance due to or from us is the matter upon which our financial policy for the future hangs.

There is nothing complicated or abstract in this explanation, and there is small room for fallacy in what approaches the self-evident. Our future financial policy must be such as will provide best for our settlements with the commercial world. Our domestic settlements are subordinate, and do not require such elaboration since man meets man under equal conditions and a common law.

This much is natural and proper preliminary to the question, What currency best suits all our wants?

The commercial world has agreed upon gold and silver as the two most easily interchangeable commodities. The relative value of these commodities to each other and to other articles of trade must be governed by the abundance or scarcity of the commodities. Extraordinary production of wheat cheapens it. Extraordinary production of gold cheapens that commodity also but not in the same manner; one being interchangeable, the other not. Another difference would arise from wheat being a perishable commodity and gold not. The practical effect of a cheapening in gold would be a rise greater or less in other commodities usually trafficked for gold. And this result we have seen in our own midst. The discovery of the California mines was the direct cause of a marked cheapening of gold; or if desirable to view it from the other side, a marked appreciation in value of all other commodities—gold remaining stationary. So now, the extraordinary production of silver recently has cheapened that metal; and being an interchangeable commodity, we shall presently see general values affected to some extent as in the case of gold.

All commerce being but the exchange of commodities, and the only commodities universally interchangable being gold and silver, the want or non use of gold and silver must of necessity place us at a disadvantage beside the rest of the world. Paper is only the admission of poverty—the admission of indebtedness and the promise to pay on the part of the debtor. This promise to pay is a very convenient equivalent for the commodity to be paid, when both debtor and creditor having equal rights and interests agree to the convenience. But no such promise to pay will serve a similar convenience outside of domestic trade; and there is a necessary and proper limit to this paper convenience within the machinery of domestic commerce. Paper money is not and cannot be a commodity to be bartered for. It is the evidence of an unequal trade where the debtor has promised to pay at another time. Paper money acquires its value only from the known or accredited ability of the debtor to keep his word—to redeem his promise made. That ability of the debtor cannot be known to all the world, so his promise to pay is only current near home. Paper money is not for that reason available for our foreign commerce, although convenient and desirable to an extent at home. For the same reason the promise of the Federal Government to pay gold and silver is more desirable than the promise of an incorporation, a single State or a single individual. The ability of the whole nation to pay is certainly greater than the ability of a very small fraction of it.

Paper money issued by the Government, then, will be received with more confidence and will serve the ordinary wants of the nation as a con-

venient substitute for gold and silver better than any issued by incorporations or individuals.

It would seem that the requirements of our commerce demand all three, gold, silver and paper to meet the wants of both foreign and domestic traffic. And when all come from one source, the Federal Government, there is no apparent reason why all three should not jointly and severally do all that a sound currency can do to facilitate the transaction of current business.

Political economy requires the use of a metallic currency in order to stand equal with our neighbors. Modern finance in its details of vast transactions, and rapid transfers of values demands a convenient and simple equivalent for coin to facilitate business. Commerce will by its demands indicate with sufficient certainty the relative amounts of each currency needed for use.

Unfortunately in all this working out of the financial problem for the future there is no proper place for politics. That a place will be made by zealous political leaders is almost a matter of certainty. New theories in Federal finance will now be in order, and out of the chaff patient winowing must bring the wheat.

☞ At the annual meeting of the Southeastern Railway, held at Montreal on the 7th inst., the following directors were elected: Hon. Bradley Barlow, James O. Halleron, C. W. Foster, B. B. Smalley, Asa B. Foster, S. W. Foster, A. B. Chaffo, J. G. Richardson, E. L. Chandler, Nathaniel, Pettes. At the directors' meeting, the following officers were elected: Hon. Bradley Barlow, President; James O. Halleron, Vice President; A. B. Chaffo, Secretary and Treasurer; A. B. Foster, General Manager; C. W. Foster, General Superintendent.

Nashville, Chattanooga and Saint Louis Railway.

The number of miles of road operated by the Nashville, Chattanooga and St. Louis Railway Co. is 453½, viz: Main Line, 321; Jasper Branch, 19½; Shelbyville Branch, 8; Tennessee and Pacific Railroad, 30; McMinnville and Manchester Railroad, 35; Winchester and Alabama Railroad, 40. The receipts from operations of the Main line, Shelbyville and Jasper branches, during the year ending June 30, 1878, were as follows:

From freight		$1,221,025 82
" passage		476,048 29
" mail		37,857 54
" rents and privileges		25,258 60
Total Main line and branches		$1,760,190 25
" Tennessee and Pacific R. R.		55,267 68
" McMinnville and Manchester Railroad		22,957 09
" Winchester and Alabama Railroad		33,393 68
		$1,871,808 70

Expenses, viz:

Maintenance of way	$314,051 46	
Motive power	274,054 20	
Maintenance of cars	114,679 04	
Conducting transp.	250,207 18	
General expenses	60,627 75	
Total M. L. and Br.	$1,013,619 63	
" T. & P. R. R.	24,144 91	
" McM. & M. R. R.	14,371 56	
" W. and A. R. R.	18,134 04	
		1,070,270 14
Net earnings:		
Main Line & Branches	$746,570 52	
Tenn. and Pacific R. R.	31,122 77	
McMinn. & Man. R. R.	8,585 53	
Win. and Ala. R. R.	15,259 64	
		$801,538 56

In addition to the operating expenses as above, the following payments have been made during the year:

Interest on bonded debt	$452 400 00	
Interest on floating debt	14,887 55	
Interest on cost of Tennessee & Pacific R. R.	13,206 44	
Difference in cost of steel over iron rails, 25 per cent on $129,190 85	32,297 71	
Extra ties used in laying 34 miles of steel rail, 600 to the mile extra	5,100 00	
Iron bridge over Stone's River, on Tennessee and Pacific R. R.	12,011 22	
Paid on account of iron bridges on Chattanooga division	18,600 81	
Twenty-five Nashville and Northwestern R. R. bonds indorsed by this company, due July 1, 1878	25,000 00	
Paid on account of right of way, Nashville and Northwestern R. R.	2,133 58	
Two dividends paid to the stockholders	131 505 91
